*Proceedings of the Governor of the Punjab in Council  
in the Department of Revenue and Agriculture,  
No. 7316, dated 8th March 1921.*

READ—

Letter No. 251—325-P-1, dated the 14th February 1921, from the Junior Secretary to the Financial Commissioners, Punjab, submitting the Financial Commissioners' remarks on the Annual Report on the Punjab Colonies for the year ending 30th September 1920.

REMARKS.—Agricultural conditions in the Lower Jhelum Colony in the year under review were favourable. Harvests were good, prices and rents ruled high, and the rates obtained in sales and leases of agricultural land increased. In the towns, too, the rents of houses and shops have risen and record prices have been obtained at auctions of sites. Horse-breeding operations were successful, thanks mainly to the peasant breeder. The Safedposh grantee is reported to take little interest in horse-breeding, and only two out of the five stud farms are really satisfactory.

About 53,000 acres are available for allotment, but much of this area is not yet irrigable, and a considerable proportion consists of inferior soil. It would appear, therefore, that the prospect of providing in this Colony for grantees disappointed elsewhere is not very satisfactory. Nor have the dry Thal rakhs afforded much relief hitherto, even although the area of each grant in this dry tract has been doubled to compensate for the want of irrigation.

The Colony towns are prosperous, but their public funds are not in proportion to the private prosperity of their inhabitants. The remedy is obvious, and, if the townsmen will not help themselves, they cannot expect Government to increase the contribution originally made in order to give the towns a start. The cramped position of Sargodha gives ground for anxiety, and, if necessary, measures should be taken to ensure that the development of the headquarters of a flourishing district shall not be warped and stunted by the accident of its surroundings.

The Co-operative movement has got a good hold in the Colony, and progress has been made with the provision of

facilities for education. The state of communications is not satisfactory, and it is to be hoped that the Communications Board may be able to effect some improvement now that its attention is to be drawn to the matter.

2. The Lower Bari Doab Colony is at present the most interesting of all the Punjab colonies, and the report this year has done the subject justice. It portrays the miracle of the transformation of a desert into a fertile garden where wheat and cotton are grown on something like scientific lines, and novel experiments in agriculture, fruit-growing, cattle-rearing, horse-breeding, and the distribution of water are in progress, villages and towns are springing up, roads are being made, and Co-operative methods are spreading.

The main feature in the history of the Colony during the year has been the allotment of grants to military men selected under the orders of the Commander-in-Chief. About half the total area reserved for the Army has now been allotted and many new problems have arisen in consequence. That they will be dealt with in a spirit of sympathy and tactfulness is indicated by the Colonization Officer's experiment of handing over to committees of Indian officers the responsibility for reporting breaches of conditions, thus eliminating the opportunity for vexation and corruption which subordinate Revenue officials enjoyed under the old system. Military grantees, whose social status makes their presence in their original districts advisable, have now been exempted from the condition of residence.

The year was fairly successful from the agricultural point of view, although a hail-storm and late rains went some way to spoil what promised to be a bumper spring harvest. Prices were good, and their effect is seen in the results of the auctions of land which fetched an average of Rs. 593 per acre. The recent slump in the value of cotton will probably check the tendency to excessive cultivation of this crop, which has threatened to become an evil through over-taxing the soil and causing neglect of fodder crops. The Colonization Officer is optimistic with regard to the chances of reclaiming inferior lands, and special inducements are being offered to tenants with this object; but, as the Financial Commissioner has noted, success has not yet been achieved with the "bara" land, of which there

is a very large area in the Colony. Colony towns are progressing, but, as in the Lower Jhelum Colony, their financial position is weak and Government grants meant for original works have been wrongly spent upon maintenance. The state of communications is not satisfactory, and the Financial Commissioner has suggested that in future schemes of colonization communications should form an integral part of the project. This recommendation will receive the careful consideration of Government. It is quite clear that a more speedy development of communications in the colonies is essential if their progress is not to be seriously impeded.

Mr. Puckle's work has received handsome acknowledgment from the Commissioner and Financial Commissioner. His report indicates the enthusiasm with which he has taken up his work and gives proof of its success. His commendation of Khan Sahib Rajab Ali, Lala Dharu Lal, and his other assistants is obviously deserved.

3. The Upper Chenab Colony has made some progress, but is far from having reached a satisfactory position. An inferior soil, with irrigation confined to the autumn harvest over a considerable portion of the Colony, has militated against its development. The grantees cultivate rice mainly and then return to their original homes for the spring harvest. The past year, however, gave signs of some improvement. Wells are being constructed, and the colonists are beginning to settle permanently on their grants. As in the other colonies the big grantee has been the least successful in the management of his land. Orders have recently been passed, which should lead to greatly-increased efficiency in irrigation arrangements. Vexatious, though well meant, restrictions on the irrigation of well lands have been removed, and the entire system has been simplified. It is to be hoped that the present year will see further advance in the process of settling down in this Colony.

4. The report on the Upper Jhelum Colony conveys very little idea of its condition and progress beyond the fact that the harvests were good. The next report should be somewhat more illuminating.

5. The report on the Colonies was due with the Local Government on the 1st February, but was not received till the 21st of the month. In future it should be submitted on due date.

ORDER.—Ordered that the above remarks be printed and circulated with the report ; also, that they be published in the *Punjab Gazette*, be communicated to the Financial Commissioners, Chief Engineer, Irrigation Works, Punjab, the Agent, North-Western Railway, the Inspector-General of Police, and forwarded to the Government of India, Department of Revenue and Agriculture, with the usual number of copies of the report.

By order of the Governor in Council,

D. J. BOYD,

*Revenue Secretary to Government, Punjab.*

No. 251-325—P-1.

FINANCIAL COMMISSIONERS' OFFICE:

*Dated Lahore, 14th February 1921.*

FROM

KHAN SAHIB MALIK ZAMAN MEHDI KHAN,

*Junior Secretary to the Financial  
Commissioners, Punjab,*

TO

THE REVENUE SECRETARY TO  
GOVERNMENT, PUNJAB.

H. A. Casson, Esq., C.S.I., I.C.S.

SIR,

I AM directed to submit the annual reports on Colonization Operations in the Punjab for the year ending 30th September 1920, with the Financial Commissioner's review thereon.

I have the honour to be,

SIR,

Your most obedient servant,

ZAMAN MEHDI KHAN,

*Junior Secretary to the Financial Commissioners,  
Punjab.*

## Financial Commissioner's review on the Reports of the Punjab Colonies for the year ending 30th September 1920.

### LOWER JHELUM CANAL COLONY.

1. Last year it was remarked (paragraph 1 of the review) that "the demand for special help in district administration in the form of a Colony Assistant, definitely told off for Colony work, can no longer be resisted." Another year's further experience has confirmed the Financial Commissioner in his view and he thinks that the appointment of a Colony Assistant with full powers is an absolute necessity. An extra officer was appointed temporarily who is referred to in the Deputy Commissioner's report as the Colony Assistant, but no orders have yet been received sanctioning his permanent addition to the sanctioned scale of officers.

2. The Deputy Commissioner in his report has alluded to the conferment of proprietary rights on horse-breeders. The question is not local, but involves very important Imperial interests, and further bristles with many difficulties. There has been and still is a great diversity of opinion on the subject among all officers representing different interests, who have had anything to do with this Colony. The whole question is *sub-judice* and the Financial Commissioner does not think it advisable to express a definite opinion at present.

3. Owing to serious deficit in the Government land on the Lower Bari Doab Canal, it was proposed last year to release the Dhrema and Risala Rakhs from the Military Department, give these areas to the Military grantees, and provide suitable grazing land for the 53rd Silladar Camel Corps elsewhere, but as a result of correspondence with the Commissioner and the Military authorities, it has been found that no camel-browsing area is available in the neighbourhood of Sargodha, and that in any case it would be necessary to reserve  $\frac{1}{3}$  of these Rakhs for camel-browsing. Further no information is available as to what area would be commanded under the new remodelling scheme, and the reply of the Chief Engineer is awaited on the subject.

4. Two thousand and forty acres were allotted during the year under report as compared with 1,443 acres last year. Out of this area, 650 were devoted to exchanges

for grants made originally on the Lower Bari Doab Canal and 814 acres to recruiting reward grants. Though 2,040 acres more were allotted during the year under report, yet the total-allotted area shows a deficit of 8,423 acres as compared with the last year's figures. There are, it is said, differences under different heads as well. The same confusion is visible in the balance area available for allotment. In Statement No. I, this area is shown to be 54,729 acres, but in the body of the Report it is remarked that 1,019 acres are available out of the area previously allotted, but subsequently vacated, and in addition to this 60,977 more acres are available. Then further on it is mentioned that excluding 7,484 acres set apart for different purposes the net area available for allotment is 52,593 acres. The Financial Commissioner will ask the Deputy Commissioner to overhaul his files, and registers and give correct figures in next year's report. The explanation that new calculations have been made, and the figures given are correct, is not a very illuminating one.

5. It is very satisfactory to note that the colonists have had another prosperous year. Prices have ruled high, and harvests have been good. Thus the total sown area was 416,923 acres during the year under report as against 408,495 acres of the last year showing an increase of 8,428 acres. The area under cotton has further expanded by 13,312 acres, last year's figures being 56,573 acres. The proportion of matured area to sown area was the same as last year, i.e., 96 per cent. The increase in the total sown area, and especially the marked increase in the area under cotton were due to the stimulating effect of high prices that have prevailed for several years past, but the fall in the price of cotton, if it continues for a year or two more, is bound to result in contraction of the area under that crop. The high cash rents received by the grantees for leased lands, and the enormous prices offered by bidders for shop sites in the Colony towns (Rs. 3,49,143 per acre in Phullarwan) testify to the prosperity of the tract. The number of the co-operative banks has not been given, but the total capital of these Societies is Rs. 10,14,712. The Colony seems to be well served in the matter of education also. There are three High Schools, one Normal School, two Anglo-Vernacular and two Vernacular Middle Schools, six Lower Middle and 67 Primary Schools.

6. The state of affairs regarding communications which is set forth in the latter part of paragraph 14 of the Report will be brought to the notice of the Communications Board for any action they may feel able to take.

7. The Colony Assistant now has the full powers of a Collector under the Land Acquisition Act, and Colonies Act, and is Assistant Collector, 1st grade, under the Land Revenue and Tenancy Acts.

#### LOWER BARI DOAB CANAL COLONY.

8. The very high prices fetched by land auctioned during the year (average Rs. 593 per acre for 3,465 acres, and highest price Rs. 1,105 per acre) are believed by the Colonization Officer to represent actual values and not merely an artificial boom in land due to mistrust of other investments. He points out that on the basis of cash rents now paid, the yield, even on this high average price, is 4 to 5 per cent. This brings out the extraordinary leniency of the present rate of land revenue (two rupees per matured acre) which would appear to be not more than a twentieth part of the rent. But the fall in the world price of cotton will doubtless leave its effect upon cash rents and land prices, as it has already affected the progress of building operations in the market towns of the colony.

9. It is satisfactory that the allotment of military reward grants, so long delayed, has at last been begun, and that approximately half of the total (171,500 acres in the Lower Bari Doab Colony) has now been distributed. There is a very large demand among these grantees for land in Gujrat, where the area available for military reward grants is 4,000 acres only, and large numbers of soldiers whose homes are in the north-west of the province must inevitably be disappointed. The experiment of offering land in the Thal, in the proportion of two acres for one, has attracted no one, notwithstanding the prospects of the future extension of perennial Canal irrigation to this tract. The great variety of race among the soldier grantees and the distance of their land from their homes and the consequent obstacles to permanent residence, will create some special difficulties in the administration of the Lower Bari Doab Canal Colony. The result of Mr. Puckle's experiment of handing over, in soldier villages, the responsibility of reporting breaches of conditions to committees of Indian Officers, will be watched

with interest. He has rightly sought an alternative to the vexatious system of allowing reports to be made by patwaris on these matters. The system of reporting breaches of conditions by patwaris was condemned by the Colonies Committee of 1907-08, as a weapon for illegal gratifications. Enquiries will be made from local officers as to the system prescribed after the report of the Colonies Committee. Probably one wholesome effect of the settlement of military officers in large numbers in this colony will be that the subordinates will be purged of bribery and corruption.

10. The proposal that Indian officers who hold positions of importance in their home districts should be excused from personal residence, on the precedent of the landed gentry, will, as Mr. Puckle has noted, tend to relieve friction and also to remove from the competition for local offices those whose allegiance would always be divided. But the unusually large number of men of some distinction and wide experience of the world will make tact and consideration always specially essential in dealing with the Lower Bari Doab Canal Colony.

11. The remarkable growth in the area under American cotton, 135,644 acres in 1918, 192,865 in 1919, 225,399 in 1920, continues. The Financial Commissioner notes that the Colonization Officer holds that cotton growing is being overdone, with bad results to the agriculture of the Colony. Mr. Roberts, the late Principal of the Agricultural College at Lyallpur, endorses the opinion of the Colonization Officer and says that many zamindars, who had temporary cultivation grants, were sowing from 9 to 15 acres of cotton per square. He is of opinion that farming would be sounder if less cotton was grown. The Financial Commissioner is in perfect agreement with the opinions of the Colonization Officer and Mr. Roberts, but no arbitrary rule as to how much area is to be brought under a particular crop, seems to be either practicable or advisable. The zamindar in his farming is guided by the market prices. The crop which fetches the highest price is bound to be popular with him. The extraordinary expansion in the area under cotton is due to the boom in the cotton trade that has been a common phenomenon for several years past, but the recent slump in cotton prices will lead to a considerable reduction of area under that crop, and to a readjustment of area.

12. Dealing with the subject of special leases of inferior lands, the Colonization Officer has remarked that, given tenants who can stand two or three unproductive harvests, and given plenty of water, there is very little land which cannot be reclaimed by methods which the ordinary zamindar is capable of applying. Certain classes of tenants have the grit to improve inferior land, when they know that better land is not to be had : but, so far as the Financial Commissioner is aware, no one has yet achieved any results with the " bara " land, of which there are, approximately 52,500 acres in the Colony. The experiments on the Agricultural Department's farm at Kahuta continue.

13. The enormous area of temporary cultivation (381,016 acres in Kharif 1919, and 442,215 acres in Kharif 1920) continues to mark the special obstacles to permanent allotment in the Lower Bari Doab Canal Colony but it must now diminish rapidly with the arrival of the soldier grantees. When the latter were on field service such a system was inevitable and with all its faults has proved very useful. It has provided an outlet for excess Canal water, which otherwise would have run to waste, has brought enormous amount of money to the Government and has helped to produce good crops.

14. The remark made by the Colonization Officer under head 13 of the Report that " none of the towns are at present self-supporting and a portion of the Government grant is annually absorbed in balancing the budget for ordinary expenditure in administration," indicates a somewhat serious misunderstanding. There is no Government grant for general purposes in these towns. Under the authority of Punjab Government letter No. 1017-S., dated 25th June 1915, the towns receive a proportion of the proceeds of the sales of Crown lands within their limits, up to a stated maximum, for expenditure on *initial requirements*. But it is evident that the initial requirements contemplated by these orders were works and the cost of maintenance for works, not the ordinary recurring expenditure of the town administration. The Commissioner suggests that the District Boards are not contributing their fair share to the expenditure. But the remedy seems to lie in raising more money by local taxation, as is apparently contemplated by the Colonization Officer, who is the President of the Notified Area Committees.

15. The Communications Board has entertained an Engineer for Agricultural tramways. He has been investigating the possibilities of a net work of light railways or tramways for the area of the Sutlej Valley project, and it is possible that tramways will prove the solution of the communication difficulty in the Lower Bari Doab Canal Colony. That Colony was provided liberally with "dirt," or kacha, roads, for which large annual grants have been made by Government for six years past. But the "dirt" road, and the bullock cart, or the camel, do not meet the requirements of a prosperous colony : and the Financial Commissioner has recommended that communications of a much improved type should in future Colonies be made a part of the project, to be carried through *pari passu* with the extension of irrigation and paid for out of the proceeds of the sale of Crown lands, or from a loan secured upon the sale of such lands in order to secure early development.

16. The full development of the colony is yet far, but the year under report is one unbroken period of progress, and prosperity. There has been a considerable expansion of cultivation in the area permanently allotted. 498,721 acres were sown during the year under report, as compared with 401,591 acres last year. The tract which was once a wilderness is now a garden of waving corn and cotton and is not only dotted with villages, but with towns and Mandis, 587 new villages have either been constructed or are under construction. In the villages pucca mosques, Dharmshalas and guest houses are becoming common features. 113 new Co-operative Societies were started during the year under report, and their total number now stands at 270, while the number of supply unions is 15. New experiments in the shape of fruit farming, and cultivation of cotton on scientific methods, which are likely to have an important bearing on the future prosperity of the colony, are being attempted. Their progress will be watched with great interest. Efforts are being made to introduce and popularize the system of volumetric supply of water for irrigation purposes, which, if successful, will result in great economy of canal water.

17. Sir John Maynard endorses the Commissioner's appreciation of Mr. Puckle's work, which has been begun with energy, devotion and good judgment : and also Mr. Puckle's commendation of the officers who have worked under him.

The Review of the Report for the Lower Bari Doab Canal Colony was mostly drafted by Sir John Maynard himself.

#### UPPER CHENAB CANAL COLONY.

18. This small Colony lies in two districts. One portion comprising 54,410 acres is situated in the newly created Sheikhpura District and the other comprising 30,672 acres in the Lyallpur District.

19. It is very gratifying to find that some of the difficulties of the Sheikhpura portion of this Colony are coming to an end. It may be said at the outset that its soil is naturally poor, mostly impregnated with kallar, and suitable at present only for the sowing of rice. Most of its chaks are kharif chaks, *i.e.*, supply of canal water is confined only to the kharif harvest. There have been complaints about the deficient and irregular supply of canal water. Most of the abadkars were like migratory birds, who used to sow rice crop, harvest it and then return to their original homes, but with the construction of abadis, the settling down of abadkars and the sinking of wells, the outlook appears to be brighter, and more hopeful. There has been a noticeable increase of 6,216 acres in the cultivated area, as compared with the figures of the last year—3,066 acres in the kharif and 3,150 in rabi. The abadkars of the Hafizabad and Wazirabad Tahsils present a difficult problem as they are reputed to be still notorious for going off to their original homes in the rabi, but with the good example of other abadkars before them, it is hoped that even they will soon realize their folly and will eventually settle down on their lands. The Financial Commissioner trusts that better control, as a result of the creation of the new district, will accelerate the pace of development for this unfortunate and hitherto much neglected colony.

20. It has now generally been recognised by the colonists that success in this colony, to a large extent, lies in the sinking of more wells. There are now 101 wells, of which 21 were sunk during the year under report. Besides 24 more are under construction. This satisfactory result would not have been achieved and the colonists would have continued to drift on as before, had it not been for the starting of two brick kilns—one at Kala Shah Kaku and the other at Marh Bhangaon—which owe their inception to the initiative of Sir John Maynard. The Financial Commissioner is glad to find that the expectations formed of the

utility of these kilns have been more than realized at least in the case of the kiln at Kala Shah Kaku. Its contractors, Syed Maratab Ali Shah and Afzal Ali Shah, have faithfully carried out the conditions of their contract, and have supplied bricks to 37 wells. The results in the other case have been rather disappointing, but the contractor was handicapped by adverse circumstances. The Deputy Commissioner should, however, watch his proceedings, with a view to confiscation of his grant if he fails to comply with the conditions. But what is even more important than the supply of bricks is that the action of these contractors has been instrumental to a large extent in shaking off the lethargy of the colonists, has stimulated them to start 12 kilns of their own, and has thus taught them a valuable lesson of self help.

21. The lease of Rakh Kuthiala in favour of Raja Daljit Singh and Sir Zulfiqar Ali Khan for raising water by power generated from Canal falls was a novel experiment. The Financial Commissioner realizes the difficulties with which a venture of this sort is beset in its initial stages, which have been rendered more difficult by the conditions resulting from the war, but cannot shut his eyes to the obvious fact that the lessees have failed to rise to their responsibilities, and have made no real attempt to carry out conditions of their lease. No advance has been made upon the state of things last year, rather the position is even worse. Two out of the three tube wells have been sold. The lessees applied for protective leases for the tube wells sunk by them, and for other ordinary wells found by them in the Rakh, but were informed that the conditions of their lease precluded the possibility of such concessions: Mr. Casson will watch the progress of this enterprise with interest, and hopes that the consultations of the lessees with the Jata Company, and the Kashmir Engineer will lead to tangible results. The tenants have 10 years within which to bring half the area of their lease under cultivation by means of Hydro-Electric power. 3½ years only have elapsed so far.

22. The planting of trees is receiving attention, but hitherto the efforts of the abadkars in this direction, except in cases where the soil is good and retains moisture, have not been attended with much success. The land is for the most part kallar and no other tree, except kikar, appears to

find the soil congenial, but, the Financial Commissioner thinks, that this state of things will not last long : with the gradual disappearance of kallar and deposits of silt owing to canal irrigation, further progress should be possible.

23. The Colony seems to be well served in the matter of education. There are 5 Primary Schools for a population of 5,809 souls, and the Deputy Commissioner is contemplating the opening of another. The Co-operative movement also seems to be making headway. Five banks with a capital of Rs. 4,700 have been started : the report is silent as to what medical arrangements exist, or are contemplated. Postal arrangements are faulty in the extreme, and much leeway remains to be made up in the way of communications, though this Colony has been very liberally treated in this matter. Rs. 40,000 were allotted for the construction of roads, but no information is available as to how that money has been utilized. An enquiry will be made from the Deputy Commissioner on the point. The agricultural experimental rice farm still remains in abeyance and the land earmarked for this purpose is at present given out on temporary cultivation. In a tract of country where rice is the staple crop and where it is of the best quality, a rice factory is a great desideratum. The establishment of such a factory will be a real boon to the Colonists.

24. Complaints regarding the shortage of canal water continue. The whole question of the principles and percentages of irrigation to be laid down for the future for the Upper Chenab Canal has been referred to Government in Senior Secretary's letter No. 251-533-B.-14 of the 25th January 1921, and it would serve no useful purpose to discuss this large question in the present report. It may be said, however, that there is a prospect that irrigation arrangements will be much simplified and improved, while the amount of water provided during the Kharif season both on the Raya and main line branches which serve the Colony will eventually be increased. It is unlikely that Kharif irrigation can be given after the 15th October except under exceptional circumstances, but it is hoped that it will always be possible to give it until that date.

25. There is a further complaint from Sheikhupura District regarding the assessment of grass. Paragraph 46 of Report. This is not quite understood. A grass rate (Rs. 1.4-10 per acre) exists on this canal. What really

happens is that in this colony rice is sown in May and June, but planting out does not take place till July. The cultivator spreads any spare water which he gets in May and June over the area he intends to plant out with rice, both to soften the ground and to cause the seeds of weeds and grass to germinate so that he can clean the land before planting out the rice crop. He also gets some excellent grazing meantime for his cattle. It sometimes happens that the whole area so flooded cannot eventually be planted out with rice, and in such cases it is assessed at the grass rate. This seems perfectly fair. The case is not one for a "Rauni" rate as the fields of this kind get more than one watering and they are in no way fields under preparation for the Rabi. The area assessed to grass rate in Kharif has been 1.7 of the total area assessed to water rate, and in the Rabi .04.

26. The colonists in the Lyallpur portion of the Colony are leaving their isolated hamlets in the rectangles, and are settling in the abadis. The demand for village sites seems to be keener. It shows that the colonists have begun to realize the advantages of a corporate life. The movement will also facilitate administration. This year the cultivated area has further expanded and shows an increase of 3,863 acres over the figures of the last year, but the Kharaba figures for kharif are high. The abadkars have yet to learn that intensive rather than extensive cultivation is more profitable in the long run. Communications still leave much to be desired. Nothing seems to have been done in this direction during the year under report.

#### UPPER JHELMUM CANAL COLONY.

27. Last year the Financial Commissioner in paragraph 19 of his review on the Colonies Report remarked that the area given out on temporary cultivation had risen from 4,225 acres in 1917-18 to 10,956 acres in 1918-19, but from paragraph 5 of the Deputy Commissioner's report for the current year, it now transpires that the so-called increase was rather apparent than real, as it included areas under forest plantations also. It is a pity that the district report does not make the position clear as it is silent as to what area was comprised in forest plantations. This year the area let out on temporary cultivation was 5,148 acres, but, for the reasons given above, no comparison with the last year's figures is possible, as the latter are not available. The anomaly regarding non-levy of malikana on lands let out on temporary cultivation noticed last year, was removed

during the year under report. Such lands will bear malikana at the rate of Rs. 2 to Rs. 16 per acre according to their quality.

28. The construction of the Mandi at Pindi Bahaud-Din is proceeding apace. Government has accorded administrative sanction to the construction of certain works, such as road metalling, street pavements and drainage, etc., in this market at an estimated cost of Rs. 2,22,079. The Financial Commissioner has asked for Rs. 10,000 more to be spent in collection of material, sanction to which is awaited. The request of the owners of the land taken up for the Mandi, that they should be given land in exchange in lieu of cash has been acceded to by Government. The auction of factory sites was deferred by the Financial Commissioner as the Railway Department had decided nothing about the Railway sidings. This delay is resulting in much loss to the traders and the zamindars.

29. The year under report was marked by good harvests and high prices. The cultivated area has considerably expanded, showing an increase of 11,113 acres—6,157 acres in kharif and 4,956 in rabi—over the figures of the last year. The kharaba figures are negligible, being 4 per cent. of the sown area in kharif and 2 in the rabi.

#### SIDHNAI AND SOHAG PARA COLONIES.

30. The Crown tenants in the Sidhnai Canal Colony have purchased proprietary rights in 10,920 acres for Rs 62,559 during the year under report. Of this sale money about Rs. 22,603 were outstanding in October 1920. Last year it was reported that 5,226 acres yet remained unsold, but from the report received in this office it appears that last year the area of pending cases, in which final orders had not been passed, had been included in the sale cases. The correct area, which remains unsold, is 11,089 acres, or  $\frac{1}{5}$ th of the total. In the Sohag Para Colony, proprietary rights were purchased in 3,018 acres for Rs. 28,511 and thus the total area in which the crown tenants have purchased proprietary rights from August 1917 up to 30th June 1920 now comes to 31,898 acres, while the area for which money has been paid in part is 398 acres and 6,058 acres are such in which right to purchase has not yet accrued.

ZAMAN MEHDI KHAN,

*Junior Secretary to Financial Commissioners,  
Punjab.*

# Lower Jhelum Canal Colony.

## SHAHPUR DISTRICT.

1. *Survey and demarcations.*—No survey or demarcation work was carried out during the year under report.

2. *Conditions.*—Sales of occupancy rights in the Colony were as follows during the year, but the average prices are misleading:—

|                        | Amount of land sold, in acres. | Total price. | Average price per acre. |
|------------------------|--------------------------------|--------------|-------------------------|
|                        |                                | Rs.          | Rs.                     |
| Non-horse breeding ... | 899                            | 5,88,810     | 599                     |
| Horse breeding ...     | 707                            | 1,63,000     | 230                     |
| Total ...              | 1,606                          | 7,01,810     | 436                     |

The sales by non-horse breeding grantees have increased and those by horse breeders have decreased, as compared with last year, but the increase in the former is inconsiderable, as the figures include a large holding amounting to about 24 squares sold by a European gentleman.

Practically speaking then there is a decrease in sales both among horse breeders and non-horse breeders.

H. P. TOLLINTON.

Excluding this holding there is a decrease in comparison with last year which is perhaps an indication of the prosperity of the tract. The rule of primogeniture for horse breeding grantees and the desire to increase their holdings at the original homes of vendors are the main causes of the sales. Two sonless grantees sold their grants.

The average price per acre, as compared with that of last year, is as follows:—

|                       | Last year. | This year. |
|-----------------------|------------|------------|
|                       | Rs.        | Rs.        |
| Non-horse breeding... | 155        | 599        |
| Horse breeding ...    | 185        | 230        |

There has been an increase in the price of lands, but the figures for non-horse breeding grantees have been inflated by the inclusion of the abnormal price obtained by the European above mentioned as his land was close to Sargodha town and was bought by a member of a non-agricultural tribe. Excluding his 24 squares sold for 4½ lakhs, we find that non-horse breeding land averages Rs. 347 per acre, but this is based only on 227 acres, many of them unusually desirable. Eight hundred and seventy-nine squares were leased during the year under report, as against 771 last year, as follows :—

|                       | Number of squares leased. | Total lease money. | Average per square. |
|-----------------------|---------------------------|--------------------|---------------------|
|                       |                           | Rs.                | Rs.                 |
| Horse breeding ...    | 327                       | 1,37,636           | 390                 |
| Non-horse breeding... | 552                       | 1,87,561           | 340                 |

The increase, which seems to be genuine, is due to the high cash rents obtained now. Leases to money-lenders for the payment of debts are included in these figures, but the majority are ordinary leases and all are for periods of less than eight years. Generally speaking, only parts of horse breeding grants are leased out. Two cases in which whole horse breeding grants had been let, without making satisfactory arrangements for the mares, were reported by the Superintendent, Army Remount Department, and the grantees have been made to get the leases cancelled. The Sufedposh horse breeders let more land on lease than the Abadkar horse breeders do. Higher rents are obtained by horse breeders, because better land was originally allotted to them than to non-horse breeders. The annual report of the Superintendent, Army Remount Department, deals in detail with the carrying out of horse breeding conditions. The following table compares the progress of horse breeding during the year under report with that during last year :—

| Year.       | Number of mares covered. | Number of foals born. | Percentage of foals born in 1918-19 to mares covered. | Number purchased. |
|-------------|--------------------------|-----------------------|-------------------------------------------------------|-------------------|
| 1918-19 ... | 3,598                    | 1,614                 | 48.88                                                 | 404               |
| 1919-20 ... | 3,363                    | 1,782                 | 49.52                                                 | 374               |

The average price of the young stock purchased was Rs. 199-6-7 per head. The Superintendent, Army Remount Department, reports that the condition of mares and young stock in the Colony was good throughout the year. The Abadkars with one mare are the most satisfactory horse breeders. Sufedposh grantees are very disappointing and few among them take any real interest in horse breeding. Out of five stud farms two are reported satisfactory, one improving and two very bad. The rains in 1919 were better than those in 1918 and consequently the fodder position was better during the year under report. While high prices can be got for cotton, however, it is not easy to induce horse breeders to grow enough fodder to meet the needs of their mares, young stock and cattle.

During the year under report unsatisfactory horse breeders were reported by Superintendent, Army Remount Department, for action and warning to the following extent:—

| Class of grantees.                | For action. | For warning. |
|-----------------------------------|-------------|--------------|
| Sufedposh     ...     ...     ... | 2           | 5            |
| Abadkar     ...     ...     ...   | 34          | 56           |

The number of cases was much fewer than last year, possibly because the Superintendent, Army Remount Department, who was single handed; had more work than he could manage. Fines amounting to Rs. 3,250 were imposed on 48 grantees. Half of the grants of three grantees were confiscated temporarily and were leased to good horse breeders. Another grant of two squares was permanently resumed. Two grantees out of those complained against were allowed to sell their grants and one to alienate to his heir. The whole of one Sufedposh grant of nine squares carrying six mares was confiscated for five years for neglect amounting to cruelty to animals. The two

The general result of horse breeding during the year was satisfactory, and the measures taken to keep horse breeders up to the mark were successful.

H. P. TOLLINTON.

cases of private stud farms pending last year were decided. The holder of one has been allowed two years in which to produce a definite number of young animals fit for purchase by Government and the case of the other, who had shown some improvement, was filed.

The Colony Assistant inspected almost all Zakhiras and road side trees and reported on the cases. A large number of these was decided during the year under report and nearly all of the remainder have been decided in October. In a few cases in which the trees were in a very bad condition the grants have been confiscated altogether, but in most cases the Zakhiradars and Darakhtpals have been granted occupancy rights in one-half and two-fifths of their grants respectively. The parts resumed have been handed over to the District Board for five years as ordered by Government. A separate supervisor has been appointed to look after the trees in the Colony and adjacent villages.

### 3. *Allotment.*—Allotments during the year under

Statements Nos. I and II.

report were as follows :—

In Statement I total area of State land in column 3 is given as 540,328 acres.

Last year it was given as 548,756 acres.

No explanation of difference.

Similarly allottable area has been shown as 484,363 acres, whereas last year it was given as 479,000 acres.

Heading of Statement I<sup>1</sup> is incomplete.

Names of branches are not shown.

Total allotments given in body of report do not agree with last year's figures plus allotments made during year under report. It is not enough to say that new calculations have been made and the present figures are the result.

|                                                             | Acres. |
|-------------------------------------------------------------|--------|
| Proprietary (sale by private treaty) ... ..                 | 169    |
| Landed gentry grants (exchanges from Lower Bari Doab Canal) | 650    |
| Police reward grants ...                                    | 127    |
| Recruiting reward grants ...                                | 814    |
| Military reward grants ...                                  | 220    |
| For the abadi of two Chaks ...                              | 56     |
| Towns... ..                                                 | 4      |
| Total ...                                                   | 2,040  |

H. P. TOLLINTON.

A horse-breeding grant of 51 acres was confiscated on account of non-compliance with horse-breeding conditions and of absence.

Total allotments in the Colony now stand as below :—

|                                      | Acres.         |
|--------------------------------------|----------------|
| 1. Cavalry Abadkar Ghoripal ... ..   | 30,290         |
| 2. Abadkar Ghoripals ... ..          | 159,730        |
| 3. Cavalry Sufedposh Ghoripal ... .. | 5,609          |
| 4. Sufedposh Ghoripal ... ..         | 15,495         |
| 5. Private Stud Farm grantees ... .. | 5,034          |
| 6. Army Remount ... ..               | 11,640         |
| 7. Seed Farm ... ..                  | 155            |
| 8. Regimental Stud Farms ... ..      | 14,356         |
| 9. Infantry grantees... ..           | 30,864         |
| 10. Civil grantees ... ..            | 21,236         |
| 11. Jangli grantees ... ..           | 58,043         |
| 12. Towns ... ..                     | 481            |
| 13. Proprietary ... ..               | 5,133          |
| 14. Landed gentry grants ... ..      | 1,568          |
| 15. Police reward grants ... ..      | 391            |
| 16. Recruiting reward grants ... ..  | 1,214          |
| 17. Miscellaneous ... ..             | 68,476         |
| Total ... ..                         | <u>429,715</u> |

These figures do not tally with the last year's. New calculations have been made this year and the figures given are the result. The total area allotted has been found to be 8,428 acres less than that entered in last year's report and there are differences in the areas allotted under different heads. The decrease in the total is due to the transfer of the Mona Dépôt to Gujrat District and is not a real decrease. It appears that deduction was not made at the time of the transfer.

Out of 1,321 acres mentioned in last year's report as earmarked for the deficit of Upper Jhelum Canal only 356 acres have been allotted as the grantees preferred to take from other unallotted areas. Fifty-four acres more have been resumed and thus 1,019 acres out of the area previously allotted and subsequently vacated are available for allotment. In addition to this 60,077 acres commanded and uncommanded are available for allotment, but of these 7,484 acres have been set apart for different purposes, so that the net area for allotment is 52,593 acres. Much of this, however, will be commanded only when the remodelling scheme is carried out. The Irrigation Department has reported that it will be able to irrigate about 500 squares in the near future, on the Sobhi and Jhanda rajbahas, and orders have

been received from Government that this should be reserved for military grantees. The land is mostly very poor stuff. The Colonization Officer, Lower Bari Doab Canal, has informed me that some military grantees ask for exchanges to this Colony, and in this connection I am in correspondence with him on the subject. People who belong to the Northern Punjab are willing to take inferior land on the Lower Jhelum Canal for various reasons. Not only have they an affection for their rugged hills, but the cost of going to and fro is much less, and they find it an immense advantage to be able to take their cattle to the Lower Jhelum Canal in times of drought. Proximity to their homes also eases the tenant question. There is, however, a limit to their affection for home, and most of those who agreed to take two rectangles in the Khushab barani Thal rakhs instead of one rectangle on the Lower Bari Doab Canal are now anxious for the smaller grants on the Lower Bari Doab Canal. A very dry year and rumours of postponements of the Sind Sagar Canal no doubt have much to do with this.

This is a pity, as it contracts the area available on the Lower Bari Doab Canal which is already in serious deficit.

H. P. TOLLINTON.

Mutual exchanges were allowed in 18 cases. One exchange was allowed in a case of a newly-allotted grant on account of difficulties of irrigation.

4. *Cultivation of the permanently-allotted area.*—The areas sown and matured during the year under report and last year are as follows :—

| Area.            | Kharif<br>1918. | Kharif<br>1919. | Rabi<br>1919. | Rabi<br>1920. | TOTAL.   |          |
|------------------|-----------------|-----------------|---------------|---------------|----------|----------|
|                  |                 |                 |               |               | 1918-19. | 1919-20. |
|                  | Acres           | Acres.          | Acres.        | Acres.        | Acres.   | Acres.   |
| Area sown ...    | 116,849         | 129,268         | 291,646       | 287,655       | 408,495  | 416,923  |
| Area matured ... | 106,678         | 121,078         | 285,579       | 279,998       | 392,257  | 401,076  |

Important crops were sown on the following acreages : —

| Year.                       | Cotton. | Sugarcane. | Wheat.  | Toria. |
|-----------------------------|---------|------------|---------|--------|
|                             | Acrea.  | Acrea.     | Acrea.  | Acrea. |
| 1918-19 .      ...      ... | 56,573  | 4,840      | 167,024 | 36,355 |
| 1919-20      ...      ...   | 69,685  | 4,083      | 168,132 | 42,594 |

Thus there has been an expansion of the Kharif and a contraction of the Rabi crops, though there is an increase in the main Rabi staples, *i.e.*, wheat and toria. On account of the high prices obtained cotton has increased in popularity and seems to be gradually displacing sugarcane, which requires much more watering and labour. The fall in cotton prices which came after this year's sowings has yet to take effect. The proportion of the matured to the sown area was the same as last year, *i.e.* 96 per cent. The matured Kharif area was 93 per cent. of the sown area, as compared with 91 per cent. last year. This was due to the better rains. Rabi crops showed the same proportion as last year, *i.e.*, 97 per cent. The kharaba in the Rabi was mostly in the crops sown late on account of rotational closures of the canal. Outturns in both the harvests were good; though that of cotton was reduced by more than one sort of disease.

5. *Temporary cultivation.*—About 12,500 acres of unallotted land were given out on temporary cultivation, 10,192 acres were sown, and 9,395 acres matured.

Assessment, collection and balances might usefully have been noticed.  
H. P. TOLLINTON. The land on temporary cultivation was given generally to men with war or recruiting services. The allotment for the year ending with Rabi 1921 has been made on a much larger scale, mainly to men who actually served during the great war or to their immediate relations

and also to those who did good recruiting work. This temporary cultivation allotment work has thrown a very heavy strain upon the staff, and it is always likely to be heavy so long as Government insists that these temporary cultivation leases can stand only for two harvests and have to be done all over again each year. The effect upon farming is not quite so bad as might be expected for many temporary cultivation grantees let their land, and it is likely to be taken in many cases by the same tenants year after year. The full agricultural benefits of continuity, however, cannot be expected. And if leases are granted to the same persons separated annually by a formal interval of only a day or so an expectation of permanency of tenure is likely to be engendered. The system which obtained when I took over the district was to refer each case to the Executive Engineer concerned with an inquiry about water and this led to enormous delays not to mention the power put into the hands of canal patwaris. Unfortunately no registers were maintained, so the information obtained about water was not readily available for this year. I now maintain registers for all temporary cultivation grants, and do not have to refer to the Executive Engineer in every case as in response to my request the Superintending Engineer kindly provided me with maps showing what lands are commanded. These maps are sometimes found to be unduly optimistic, especially on parts of the Northern Branch of the Lower Jhelum Canal, but, roughly speaking, an automatic remedy provides itself. The temporary cultivation grantee if not a local man (and generally he is not) finds that his best course is to accept a very low rent and to leave it at that; his tenants are then content to sow only a small area. Next year the information gathered this year will enable us to re-adjust matters. I hope also to be able to send up proposals for disposing of some of the temporary cultivation areas by auctioning the annual leases.

6. *Receipts by way of Capital.*—Of Rs. 32,080 outstanding at the end of last year for prices of town sites at Sillanwali and Bhalwal, Rs. 29,080 have been recovered and Rs. 3,000 struck off as the vendor of a shop site at Sillanwali did not pay the balance over and above his earnest money and the sale was cancelled under the Commissioner's orders. It will be put to auction again.

Statement No. IV.

During this year sites for houses, shops and godowns in the Colony towns were sold by auction as under :—

| Towns.         | Detail of sites. | Area sold. | Total price. | Average price per acre. |
|----------------|------------------|------------|--------------|-------------------------|
|                |                  | Marlas.    | Rs.          | Rs.                     |
| Phularwan ...  | Residential ...  | 476        | 1,78,600     | 60,083                  |
| Do. ...        | Shop ...         | 28         | 61,100       | 3,49,148                |
| Do. ...        | Godown ...       | 160        | 56,400       | 56,400                  |
| Shah Nikdur... | Shop ...         | 28         | 5,105        | 31,767                  |
|                | Total ...        | 690        | 3,01,205     | ...                     |

Out of this Rs. 2,96,665 have been realized. The balance (Rs. 4,540) is due for two residential sites. Sanction has been given to cancellation of the sales and confiscation of the earnest money. The prices at Phularwan eclipsed the results of all previous auctions. The height of the prices was due to the general rise in values, to the great prosperity which the opening of the Upper Jhelum Canal has added to this place, to the boom in Colony town building sites and houses and to the heavy bidding by a big investor from so far off as Dera Ismail Khan. Shah Nikdur is a small place and the prices obtained were beyond expectations. The boom has now somewhat subsided and a good many purchasers of Bhalwal sites at any rate are regretting their bargains.

Six squares of agricultural land were sold by private treaty at full market value to Lala Ganda Mal, retired Tahsildar. Rupees 17,500 of the total price (Rs. 37,132) have been realized. The land sold was below average in quality. It is a matter for profound thankfulness that the Financial Commissioner has now stopped these sales, for the lucky purchasers are apt to have peculiar views upon market rates and to be very persistent about them.

Rupees 13,035 were outstanding last year on account of Nazrana for the grant of occupancy rights and Rs. 2,246 was the demand for this year. Rupees 13,086 have been realized and Rs. 2,195 are in arrears. The amount is due from

jangali Abadkars. The demand on account of acreage rate including the last year's balance was Rs. 43,678: all has been realized. The present year's demand was for new allotments.

7. *Acquisition of Proprietary and Occupancy Rights.*—No proprietary rights were given during the year under report. The question of giving proprietary rights in this Colony is under the consideration of the higher authorities, and certain proposals have been sent up as regards the maintaining of horse-breeding conditions in the event of the grant of proprietary rights.

Occupancy rights were given in two Khatas of horse-breeding grants and in 117 khatas of other grants during this year.

8. *Mutation cases.*—The number of mutation cases decided was 1,218 including 509 inheritance cases. Seventy-two cases were sanctioned in favour of widows. Last year's numbers were 1,717, 726, and 83.

The peculiar and troublesome characteristic of mutation work in this Colony is that in all inheritance cases relating to horse breeders and in all disputed cases relating to other gantees final orders are passed by Deputy Commissioner and thus Tahsil officials, Colony Assistant and Deputy Commissioner all have to deal with the same cases

Colony Assistant has got the powers now.

and this involves increase of work in all offices. If the powers of a Collector be granted to the Colony Assistant as I have recommended he will be able to dispose of other cases, but those relating to the succession of horse breeders will continue to come to the Deputy Commissioner as under the law only he is empowered to decide these cases. This multiplication of work in a very heavy district all goes to help towards inefficiency and to preventing the Deputy Commissioner and others from being properly in touch with the people.

9. *Settlement Proceedings.*—Under the orders of Government, contained in letter No. 1381-S., (Rev.), dated 22nd June 1920, from the Revenue Secretary to Government, Punjab, to the Senior Secretary to the Financial Commissioners, the term of the current settlement of the Lower Jhelum Canal tract has been fixed at Rabi 1922. The forecast report will be submitted shortly and Settlement operations will presumably begin next year.

### 10. *Village Sites*.—Ninty-nine residential sites and

Preparation of *jama-bandis* for village sites in all Crown villages was sanctioned last year, but none have been prepared. Deputy Commissioner's attention is being drawn to this.

30 shops were allotted and 51 residential sites and 10 shops were confiscated. Last year the numbers were 77, 29, 13 and 9. The number of sites allotted has increased because of the new allotments of squares. The number of sites confiscated includes those allotted

H. P. TOLLINTON.

long ago, but not built upon. In many cases it has been found that the Abadkars only take extra *ihatas* in order to store manure in them, and as this is an undesirable practice, a number of such sites was confiscated by the Colony Assistant during his inspections of the Chaks. Owing to the heavy work (electoral rolls, census, etc.), which has fallen on Patwaris this year, it has not been possible to take up yet the work of preparation of *jama-bandis* of village sites.

In connection with the Panchayat system mentioned in last year's report, the village Panchayats have been formed and *hidayats* have been issued for their guidance. The results will be noticed in next year's report. Sanction was obtained to the substitution of another Zail for the one mentioned in last year's report as "riddled with quarrels."

### 11. *Lambardars and Zaildars*.—This head will be

I suppose he means next year.

H. P. TOLLINTON.

dealt with in the Revenue Administration Report of the District. As Lambardaris in the Colony generally have a square attached to them, the post is attractive and much sought after. Only in 3 or 4 cases, in which the late Lambardars had sold their holdings, have persons other than heirs been appointed.

12. *Census*.—Some preliminary work in connection with the Census to be held next year has been done this year.

13. *Towns and Markets*.—The Colony towns Phularwan, Bhalwal, Sillanwali (Notified Areas) and Sargodha (Municipality) are all prosperous, but all more or less in want of funds.

*Phularwan in Bhalwal tahsil*.—In the year under report the income of the Notified Area Committee was Rs. 12,508 and expenditure Rs. 10,495. A total of Rs. 4,849 was spent on the drainage of the grain Mandi (Rs. 1,053), the extension of the Tum-tum Adda (Rs. 1,837),

'sweepers' quarters and compound walls for be Gadda Khana and the cattle pound.

Some roads in the Mandi are about to be metalled.

Much needed sites for shops and godowns were sold by auction and some people think that when buildings on them are finished possibly a reduction in rents may take place. Of that, however, I am not very sanguine for very high prices were paid for sites and the cost of construction is heavy. As much as Rs. 4,13,760 per acre was paid for the dearest shop site and Rs. 1,08,900 per acre for the most expensive residential one. The land boom was at its height when the sales took place.

The Miana-Gondal-Phularwan Road is being raised and metalled, but the District Board has had much difficulty first in getting the Railway waggons for the stone and latterly in removing the stone from the Railway sidings.

A terminal tax had not been sanctioned at the end of the period under report and schemes for drainage and better drinking water are still under consideration.

The place does a great trade and is increasing in importance, yet owing to the difficulty of finding a house for a post office at a low rent the Superintendent of Post Offices threatened to deprive the place of a post office altogether which led the people to subscribe a fund for rent. When I protested against the impropriety of this

Deputy Commissioner  
should make a separate re-  
ference on this.

threat the Superintendent of Post Offices repeated it and questioned my right to protest. I am glad to say that the Postmaster-General does not support him, but the Superintendent has not yet complied with certain orders on the subject by the Postmaster-General. It seems to me most unfortunate that the Post Office does not put up its own building in so important a business centre.

*Bhalwal*.—The income of the Notified Area Committee was Rs. 18,534 and expenditure Rs. 14,002. Thirty-seven residential sites were sold by auction last year and houses are being built on them. Water-works are under consideration. Houses are wanted, but some of the purchasers have regretted the prices they paid for sites.

*Sargodha*.—The total income was Rs. 1,62,142 (including matured war loan amounting to Rs. 75,000), expenditure Rs. 98,291. Most of the sites sold last year have been built upon. Notices are being issued to those few vendees who have failed to build. The much needed extension of the grain Mandi has been sanctioned as also have proposals to sell as residential sites some of the area destined for shops in block No. 20. Twenty-four shops and 35 residential sites are to be sold by auction on 17th January—1921 along with 20 Mandi shops.

A proposal was sent up to build quarters for Government Clerks and the Financial Commissioner has intimated that he will support a scheme for 40 quarters for Clerks to begin with. There has been considerable delay owing to the type plans of the houses not being received from Government, but now that these have come, proposals will go up for administrative sanction.

*Sargodha town* is unfortunately placed in rather a cramped site, hemmed in by the Northern Branch of the Lower Jhelum Canal (and the Remount Depot beyond it) by the Railway, the Government Seed Farm and by lands sold for gardens. Many small bungalows of

\* We are doing what we can to hurry on the scheme for houses for Government servants, and for people of small means.

H. P. TOLLINTON,  
Commissioner.

Indian gentlemen in the Civil Station beyond the Railway are unoccupied. The idea of those who bought the sites seems to have been, in many cases, to obtain land on which to plant a garden; to make a profit by selling site and buildings, or in the last resort, to occupy the house temporarily in the event of plague breaking out in the city. Just possibly when more water connections can be given more will be occupied; large additional tanks are being dug and other additions are being considered by the Sanitary Engineer to Government.

*Sillanwali*.—The income of the Notified Area Committee was Rs. 21,916 and the expenditure Rs. 79,932. A drainage scheme was sanctioned last year and the work has been taken in hand by the Public Works Department. Thirteen residential sites were sold by auction, and with the exception of 3, all have been built upon.

A toll tax on animals and vehicles has been sanctioned. The Notified Area Committee is not as efficient as it should be.

*General.*—The rents of houses and shops have risen rapidly in all Colony towns and are said to have gone up this year by about 50 per cent. and still to be rising. Conditions of sale are often violated by the use of houses as shops and *vice-versâ*, and by storing grain, etc., in shops and houses. Some action is being taken against such infringements. Notices had some effect at Sargodha in checking the storage of grain in buildings not meant for this purpose and from most of them the grain has been removed. Further action, however, will be required to prevent the houses from being used as shops. People all want to get shops in certain localities and will pay absurdly large sums for the corner of a verandah rather than occupy a spacious shop elsewhere at a lower rent. There are no godowns in Bhalwal and Sillanwali and proposals for sanction of some in these places will probably be submitted shortly.

Trade is flourishing, but there have been some very considerable losses in cotton and cotton seed. Heavy loss was also caused by fire in two factories,—one at Sargodha and the other in Phularwan.

Inspections by officers and prosecutions have somewhat improved conditions in factories, but the rules are still violated in too many cases. On the whole, the Colony towns are all prosperous, especially Sargodha and Phularwan. Their public funds, however, are not in proportion to the private prosperity of their inhabitants. Proposals for the increase and extension of terminal taxes at Sargodha have been sent up. Sargodha had suffered in that some blocks of the town, the sites for which were auctioned as far back as in 1916, are still without metalled roads, drainage and water-supply. People naturally wonder at what seem arbitrary rules, which prevent Local Bodies from being given a share of the proceeds when sites are sold, if once grants up to a limit of 3 lakhs (fixed on a prewar basis) have been given from this source.

Health has been good throughout the year though there were a few cases of cholera at Bhalwal.

The bazaar at Hundewali has not yet proved successful. That at Nikdur is doing better. Seven more shop sites were sold by auction and fetched an average price of Rs. 729. The sale of residential sites is under consideration.

14. *Communications.*—No addition has been made this year to the 455 miles of roads which already exist in the Colony, nor have metalled roads been extended beyond the 65 miles which existed last year. Great difficulty is experienced in getting labour, stone and carriage. Rupees 18,414 were expended on repairs to metalled roads. Rupees 20,461 were expended on raising the Phularwan-Miana-Gondal Road, Rs. 15,557 on the collection of materials for the Sillanwali-Sahiwal Road, and Rs. 831 on a small part of the Bhera-Bhalwal Road. The sad thing about Colony roads is that metal is laid out for a certain distance, but ends with the boundaries of the Colony: beyond that old towns and villages which have been drained of their prosperity by the Colony are left lamenting. The District Board has more than it can do to maintain existing pakka roads. Thus from two points Sargodha and Sillanwali Colony roads start promisingly towards the old town of Sahiwal, but neither gets so far.

15. *Miscellaneous.*—Co-operative Societies have made some further progress during the year. Four sale societies have been closed, but eight new Banks have been opened. The total funds are now as follows:—

|                         |     |     |     | Rs.      |
|-------------------------|-----|-----|-----|----------|
| (1) Central Bank        | ... | ... | ... | 8,13,407 |
| (2) Union Banks         | ... | ... | ... | 8,289    |
| (3) Other Village Banks | ... | ... | ... | 6,92,926 |

*Schools.*—The three High Schools and the Normal School at Sargodha are doing well, but the two sectarian high schools have not yet built on their sites in block 17. The Normal School has not yet been moved to Lala Musa. A site has been allotted outside the town for the Government High School and its Boarding House. The two Anglo-Vernacular Middle Schools at Bhalwal and Bhagtanwala are also prospering. A new Vernacular Middle School has been started at Phularwan. That at Chak 101, S. B., has made good progress and an agricultural farm has been attached to it. Six Lower Middle Schools are the educational additions of the year. The District Board Primary Schools have increased by three, and now total 67.

Private Primary Schools have decreased by four owing to the conversion of Elementary Schools into District Board Schools. The number of Girls' Schools in the Colony is still 5, of which one is conducted by the District Board and 4 by

Private institutions. A Private Middle School has been started in a Sikh Chak, but it has not yet been recognized.

*Illicit Cultivation.*—Rupees 433 were realized on account of fines for illicit cultivation as against Rs. 413 last year. These fines were inflicted mostly on persons who had grown crops other than food crops for which temporary cultivation was granted or had cultivated Government *Bagaya* land without sanction. The unauthorised penal rate of Rs. 15 per kanal was done away with and Rs. 15 per acre substituted. Persons who cultivated crops of unauthorized kinds, were let off on payment of an enhanced rate of land revenue.

The relations between the Civil and Canal Departments were throughout the year generally very cordial, but I think that Irrigation Department Sub-Divisional Officers might remain somewhat less aloof. There have been some complaints of shortage of water, but not very many, considering the dryness of the season. The Officers of the Canal Department appear to have tried to remove genuine grounds for complaint, but the itch to sow an area larger than that entitled to irrigation is so great that it is almost impossible to satisfy all. Cultivation was above the scale sanctioned.

Colony work was considerably increased by the necessity of disposing of Zakhira and Darakhtpal grants in accordance with the orders of the Government and the inspection of trees and preparation of files occupied much time of the new Colony Assistant, as this work was not carried out by Rai Sahib Lala Girdhari Lal before he left in October 1919; and there was no real Colony Assistant for three months. Moreover, temporary cultivation has not been given in this Colony at random to all comers but to persons with war services (mostly soldiers and their immediate relatives) and investigation into the claims of the applicants has involved much labour and time. It will probably be impossible to continue this system.

These Zakhiradar and Darakhtpal resumptions and temporary cultivation has also brought a lot of work to the Deputy Commissioner.

The schemes devised by my predecessor for the reduction of Colony work are mostly in the stage where they make more work than they save. Colony work has been

particularly heavy during the year owing to there being for three months no regular Colony-Assistant and thereafter one with only limited powers. In paragraph 1 of his note on the reports of the Punjab Colonies for last year it was stated that the demand from Shahpur District for special help in District administration, in the form of a Colony Assistant, definitely told off for Colony duties in the Lower Jhelum Canal, can, in the Financial Commissioner's opinion, no longer be resisted. The appointment, however, has not yet been formally announced and the acting Colony Assistant has fewer powers than former officers. Once a Colony Assistant is formally added to the District staff it will be worth while to recommend that the Colony Assistant be made an *ex-officio* member of the Sargodha Municipal Committee in place of the Assistant Commissioner or Senior Extra Assistant Commissioner, and it will then be much easier to nip in the bud the more flagrant breaches of Colony conditions in the matter of buildings and alterations to them. To those inhabitants of the district who are not so fortunate as to have grants in the Colony or to have established successful businesses in the Colony towns the Colony is apt to seem a curse. It produces much grain and fodder, but it drains non-canal-irrigated areas of tenants and labourers, and thereby raises the prices of commodities; and it keeps all officers who have anything to do with it in a perpetual state of overwork most damaging to their efficiency and to their health. The District is far too big.

Not much advance has been made with the proposal for a dairy farm allotment mentioned in last year's report. The purchaser of a large number of squares at Sargodha told me that he was going to set up a modern dairy farm, but as nothing seems to be being done I have been on the look out for a likely place. The remodelling scheme is likely to provide one near the Railway Station, but the land is very inferior. The Director of Agriculture will be consulted.

16. *Extensions.*—The supply of canal water has been extended to only 375 additional acres of land during this year. Remodelling is being carried out in a part of the Sohaga tract and is projected elsewhere. The Jhanda and Sobhi distributaries will probably be able to irrigate some 400 or 500 squares of land, to which canal irrigation has not hitherto been extended, but the land is of very inferior quality.

17. *Establishments.*—The post of Colony Assistant was held by Rai Sahib Girdhari Lal from 1st October 1919 to 21st October 1919. Chaudhri Lal Hussain Khan from 22nd October 1919 to 28th January 1920. Chaudhri Muhammad Ismail from 29th January 1920.

The first-named was an excellent officer, but not a rapid worker and he left a good deal of work behind him. The second had only recently emerged from the Probationary Extra Assistant Commissioner stage. The last-named is a man of much experience in Revenue matters and had also previously been in the Colony. He has done very well and tactfully and has made some impression upon the arrears of work, though handicapped by not having as extensive powers as those exercised by Rai Sahib Lala Girdhari Lal. I have recently sent up a recommendation about this, which, if accepted, will reduce his labour as well as the Deputy Commissioner's.

The work of the Tahsil officers has generally been satisfactory, though too often dilatory. Frequent changes of Colony Naib-Tahsildar at Sargodha have not conducted to efficiency in the disposal of work.

H. H. JENKINS,

*Deputy Commissioner, Shahpur District.*

# LOWER JHELM CANAL COLONY.

## STATEMENT No. I.—ALLOTMENT, 1919-20.

| Number. | Name of Branch. | Total area of State land. | Alloable area. | Culturable and ir-<br>rigable portion of area in column 3. | Culturable area as found by the new colony soil survey. | Allotted area.                       | Balance unallotted. |

# Lower Bari Doab Canal Colony.

## MONTGOMERY DISTRICT.

1. *Survey and demarcations.*—Government waste land lying to the south of Wan Radha Ram Railway Station (plot H) leased to Rai Bahadur Ganga Ram was placed this year under survey operations. Ninety-six thousand seven hundred and seventy-one killas were laid down on the ground. This includes the "killabandi" of three proprietary villages in Okara Tahsil which, on account of the extension of irrigation, were also surveyed.

The "jamabandis" of 74 proprietary villages which had already been brought under rectangular survey were prepared during the year, bringing the total up to 119. In 68 new villages where occupancy rights had been conferred, "jamabandis" were completed.

2. *Conditions.*—During the year under report conditions governing the grant of land were published as follows :—

- (1). Tree-planting grants.—*Punjab Government Notification No. 23591, dated 5th November 1919.*
- (2). "Bara" land.—*Punjab Government Notification No. 22031, dated 15th September 1920.*
- (3). "Inferior land."—*Punjab Government Notification No. 22032, dated 15th September 1920.*

All three sets of conditions are founded on the ordinary peasant conditions, i.e., five years tenancy-at-will, followed by five years as occupancy tenants, at the close of which periods proprietary rights can be purchased at market rates subject to a maximum of Rs. 100 per acre. In the case of tree-planting grants the recipient must plant and for a period of five years be responsible for a row of trees on each side of the road at the rate of one mile for every  $12\frac{1}{2}$  acres allotted. The conditions for "bara" and "inferior" land are intended to encourage the development of land which is too bad to tempt the temporary cultivator and not good enough to be allotted on the ordinary peasant terms involving payment of water rates, revenue and malikana. The two sets of conditions are substantially the same except that for inferior land, i. e., land which is not so

difficult as 'bara,' the scheme described by Mr. Beazley in paragraph 5 of last year's Colony Report is applied.

The eventual purchase price of "bara" will not be more than Rs. 100 per acre or less than Rs. 15 and of "inferior" land not more than Rs. 100 per acre or less than Rs. 25.

The observance of conditions shows steady improvement. Ordinarily speaking, continued absence from the village and obstinate refusal to build a house are the only causes of confiscation. During the year only 991 acres were resumed, as against 2,200, in 1918-19. To this total the Rawalpindi Division, as usual, was the chief contributor, with the Multan Division a good second. But as restorations of land previously resumed amounted to 906 acres it may be taken that most of the hopeless cases have now been weeded out. The sinking of wells and the planting of trees on village sites are progressing satisfactorily.

So much for the "abadkari villages." I wish it were possible to say the same of the reward grantees and landed gentry. Generally speaking, they set a very bad example. Especially they are negligent in the matter of maintaining suitable agents. Any ragamuffin on Rs. 15 a month is considered good enough. I have lately ordered the resumption of the grant of one of the most obstinate offenders and hope that one example may suffice. There are however plenty of candidates for confiscation. The grantees of cattle-farms are, on the whole, doing well. The condition of Chaudhri Jahangir Khan's farm is very creditable to him. Raja Fazal Dad Khan's farm was severely visited by "rinderpest" last February. Khan Sahib Allah Dad is unfortunate in the situation of his grant and the quality of the land.

The inadequacy of the staff of the Civil Veterinary Department presents that regular and frequent inspections of these cattle farms by an expert agency which is necessary if they are to yield the best results.

H. J. MAYNARD.

In his case shortcomings should be received with a certain amount of leniency for a year or two. My inspections of these farms have not been thorough and must of necessity be amateurish. They were however inspected by the Chief Civil Veterinary Officer and his report is encouraging.

3. *Allotment*.—The following table shows under the various heads the area set apart in the revised scheme of

colonization, the area actually allotted on 30th September 1920 and areas earmarked for distribution :—

| Head.                                                     | Distribution according to revised scheme of colonization. | Actually allotted up to 30th September 1920. | EARMARKED.                                                    |                                                          |                                           | Total allotted and earmarked. |
|-----------------------------------------------------------|-----------------------------------------------------------|----------------------------------------------|---------------------------------------------------------------|----------------------------------------------------------|-------------------------------------------|-------------------------------|
|                                                           |                                                           |                                              | Area of grants sanctioned by Government but not yet allotted. | Area reserved for "official", horse breeding rectangles. | Area reserved for other special purposes. |                               |
|                                                           | Acres.                                                    | Acres.                                       | Acres.                                                        | Acres.                                                   | Acres.                                    | Acres.                        |

(a) Or allotted since the close of the year under report.

(b) Excluding old forest areas temporarily reserved.

(c) Dairy farm, Fish Hatchery.

(d) Including 24,498 acres reserved for lambardars and kamins.

(e) Including 1,719 acres allotted on tree-planting conditions.

(f) Reserved for Delhi Khalsa Committee.

(g) Not included in the revised scheme.

The following table shows allotments made during the year :—

|                                                             | Acres. |

About 7,500 acres in all have been handed over to the Deputy Commissioner, Criminal Tribes, but formal allotment orders are only passed when he sends in the names of the permanent tenants.

Three thousand four hundred and sixty-five acres were auctioned in March at an average price of Rs. 593 per acre, as against Rs. 493 realised last year. The highest price per acre was Rs. 1,105. These prices are, I think, genuine, and on the basis of cash rents at present paid for land would bring in a return of from 4 to 5 per cent.

The landed gentry and reward grants sanctioned by Government are now almost disposed of. The balance will be taken up during the course of the winter.

Under the head "Hereditary Agriculturists" is included 1,719 acres allotted on "tree-planting" conditions. Sanction was received during the year to allot 12,500 acres under this head, the area to be debited against the allotment reserved for Hereditary Agriculturists and Compensatory Grantees. The work of allotting these grants is complicated. The road for which the grantee is to be responsible must be as near as possible to the land which he receives in consideration. Not only this but a Jat must be found for a grant in a Jat village, a "jangli" for a "jangli" village and so on. However the skeleton scheme for all the roads in the

There are disadvantages in every method which has yet been devised to secure the planting of trees. In the Montgomery District the former practice was to plant by District Board agency, and the progress made under this system was very disappointing. The new system must receive full and fair trial, because there appears to be no satisfactory alternative when hundreds of miles of new roads are to be dealt with. The total mileage in the colony is something like 1,700 miles which means 3,400 miles of trees.

H. J. MAYNARD.

This is the budget for a man who does not work himself. A possible plan which might work in future colonies would be to give out a long stretch of road to a contractor in return for a lease of land for five years or more.

colony is now ready and I hope during the winter to allot most of the land. As to the success of the scheme I am a little sceptical. The results in Khanewal have been satisfactory but there the task was entrusted to men of some substance who took up several miles of road. Every extra mile naturally decreases the average cost per mile of planting and maintenance, and it remains to be seen whether 12½ acres per mile provide sufficient margin for expenses. I am told that to plant and keep up for five years two miles of trees should cost about Rs. 2,500, the profits of one average square for that period.

The other allotments under the heads Hereditary Agriculturists and Compensatory Grantees, are made up of grants given to those who have worked well redeeming bad land, to tenants of long standing in the Colony and to men whose half-square grants barely sufficed for their needs. The allotments have in all cases been made out of balance land generally somewhat inferior in villages already allotted to men of these two classes. The increased totals under these two heads are largely due to the reclassification of villages which had by an oversight become classed as "horse-breeding."

Ninety per cent. of the allotment under the head "horse-breeding peasants" is absorbed by military reward grantees (known to the "jangli" as "rangroots" irrespective of age or service), who have at last begun to come. I only got the regimental lists towards the end of July. Classification of the men according to religions and tribes was a necessity and allotment did not begin until August 30th and closed down on 15th October. The actual number of rectangles distributed is about 3,500, approximately half the total, but not all this area comes into the year under report. Allotment will be resumed in February. The grantees, from every fighting class in the Punjab and North-West Frontier Province, include Afridis from Tirah, Yusufzais, men of Hazara, Khattaks, Dogras, Mazbis, Ramdasias, Labanas, Jats from the Ambala Division and Hindu Rajputs, besides the familiar Jat Sikh and Punjabi Muhammadan, a most cosmopolitan community. Their disposal, if any regard at all is to be paid to their own wishes, presents a complicated problem since the first act of every other man is to petition for an exchange. The alternative of the Thal, even at two acres for one, has attracted nobody, but there are many candidates for Gujrat. Experience shows that almost any class of land, if so be that it is in a village where friends or relations live, is willingly accepted, otherwise the grantee unhesitatingly dubs "naqis" land which I rate as average or above average. There is no doubt that any areas which may be available outside the Colony would be eagerly snapped up by those whose homes are nearby.

The decrease in the area earmarked as "official" rectangles is due to the weeding out of such land from villages which have become predominantly held by colonists other than horse-breeding peasants. The sanctioned area is

85,000 acres and this will be exceeded when the " official " rectangles reserved for lambardars in the new military villages are included in the total.

About 10,000 acres of inferior land have been allotted on " half-resumable " conditions. The conditions were not published until September, consequently no formal allotment orders have yet been made and the area is not included in this year's total. I have recently seen most of these grants. The scheme bids fair to be a success and proposals for its extensions will be submitted shortly. It is the only way in which we can hope to get this class of land cultivated. It does not pay to tackle it on ordinary temporary cultivation terms.

The British Cotton Growing Association has taken over the grant of 7,105 acres near Khanewal. Their manager will be Mr. Roberts of the Lyallpur Agricultural Colony. An area of 623 acres between Renala and Okara has been leased to Mr. F. J. Mitchell for fruit-growing. His manager, Mr. Paul, is a well-known practical fruit grower and the scheme has every chance of success under his very enthusiastic and thorough supervision.

4. *Cultivation of the permanently allotted area.*—The total area sown on land permanently allotted was 489,721 acres as compared with 401,591 acres last year. The percentage of " kharaba " on such land fell from 8.78 to 7.9. The cotton crop of 1919 was good and the prices obtained were high, ranging from Rs. 18 to Rs. 21. This was very satisfactory from the point of view of the zamindar, but as the spring and summer saw a slump in cotton prices some of the dealers in the mandis lost heavily. This will have an effect on prices this winter.

The following table shows the fluctuations of the prices of cotton and wheat in the Colony mandis during the years. —

| Town.             | October 1919. | November 1919. | December 1919. | January 1920. | February 1920. | March 1920. | April 1920. | May 1920.  | June 1920. | July 1920. | August 1920. | September 1920. |

American cotton continues to gain popularity. In kharif 1919 the total area on all kinds of land under American cotton was 192,865 acres as against 135,644 acres in kharif 1918, and for kharif 1920 the area has increased to 225,399 acres. Most colonists grow some *desi* cotton for their own use.

Up to the end of March there was every hope of a bumper wheat harvest. About the end of the month a hailstorm moved across the Colony, completely ruining the crops on its course. Luckily the breadth of the storm was narrow. Persistent rains towards the close of the harvesting season reduced the quality of both grain and straw. On the whole the harvest was normal. Sixty-seven thousand two hundred and sixty-two acres of Punjab-11 were sown.

Thanks to the entire absence of rains, a breach in the Upper Chenab Canal which caused a closure for nearly 20 days at the end of August and beginning of September and short supply in the rivers during the last two months, this year's cotton crop will probably be considerably inferior to last year's. This may not be an unmixed evil. Good land is being overtaxed by continued croppings of cotton, and inferior land, which is capable of bearing good fodder crops, is being made weaker still by attempts to grow cotton on it. The zamindar is reducing his acreage of kharif fodder crops to a dangerous minimum and if the failure of cotton on inferior land together with a fall in the price results in a reduction of the area under cotton it would be no bad thing for the general condition of farming in the Colony.

5. *Temporary cultivation*.—The total area leased to temporary cultivators was 381,016 acres for kharif 1919 and 442,215 acres for kharif 1920, as against 348,411 acres and 361,271 acres for the corresponding harvests of last year. The total area sown was 295,016, of which 86 per cent matured. Last year's figures were 231,307 acres and 84 per cent. This close approximation to the theoretical proportion of sown area to total area is proof of the general adequacy of the irrigation arrangements.

The imposition of a sliding scale of malikana has had satisfactory financial results. The income from this source (all classes of land) for the past year was Rs. 9,38,907 as compared with Rs. 4,25,465 last year. There will be a progressive falling off in revenue as permanent allotment goes on.

The old two-year leases of land under "kalrathi" conditions are being terminated as they fall in. The resumption of allotment and consequent curtailment of the area available for temporary cultivation has increased the demand for special leases of inferior lands. We have available the "inferior land" conditions and there would be little difficulty in finding capable tenants for the extension of this scheme. It seems probable that, given tenants who can stand two or three unproductive harvests and given plenty of water, there is very little land which cannot be reclaimed by the methods which the ordinary zamindar is capable of applying.

The experiments in reclamation on the Agricultural Department's farm are continuing.

6. *Receipts by way of Capital*—The demand for the year on account of land auctioned or otherwise sold amounts to Rs. 30,31,458, as against Rs. 21,69,450, last year. Of this sum Rs. 28,59,552 has been recovered. The balance Rs. 1,71,906 is still due. Some of this has been paid since the close of the year, but a certain amount represents sums due from purchasers whose land has been definitely resumed for failure to pay instalments.

7. *Acquisition of Proprietary and Occupancy Rights*.—Proprietary rights were granted in an area of 9,427 acres acquired by purchase.

Sanads of occupancy rights were conferred on Government tenants holding 56,491 acres.

8. *Mutation Cases*.—The number of mutation cases decided was 1,792 as compared with 1,513 last year.

9. *Settlement Proceedings*.—Nil.

10. *Village Sites*.—Building was started in 128 new villages during the year and the number of estates in which villages have been or are being constructed is now 567. The number of wells completed rose to 254, while 14 are under construction. Tree-planting on village sites is making moderate progress and in a fair number of villages "pakka" mosques, dharmshalas and guest-houses are beginning to appear. "Malba" funds have now been established in most villages and the question of the rent to be paid by shopkeepers and village menials has been settled.

At present the duty of reporting all breaches of conditions, such as failure to build a house or to plant trees, absence without leave, etc., is laid on the patwari, who sometimes exercises his powers in the fashion of Jacks-in-office all the world over. This will not commend itself to the military reward grantees, a class not tolerant of petty tyranny. I propose in the new villages of soldiers to try the experiment of handing over the responsibility of reporting breaches of conditions to village committees of Indian officers.

11. *Lambardars and Zaildars*.—Seventy-nine new lambardars were appointed during the year and the total number of permanent lambardars is now 1,112. A new naib-zaildar was appointed for Shabhor zail on 4-L, which was too large for the zaildar to manage unaided. The establishment of new police stations in the Montgomery district and the settlement of the military reward grantees will necessitate a revision of zail boundaries all through the Colony. The composition of some zails has changed considerably.

Lambardars and zaildars have generally speaking discharged their duties satisfactorily, except in landed gentry and reward grant villages where the arrangements leave much to be desired. Competition for the post of lambardar is very keen. With the influx of about 1,500 or 2,000 Indian officers the difficulty of satisfying legitimate aspirations will be greatly increased. It is in view of this that I have lately suggested that the provisions of clause 16 of the landed gentry conditions which excuses the grantee from personal residence should be applied to Indian officers who already hold positions of importance in their own districts. Such a course would eliminate men whose allegiance would always be divided between the Colony and their old districts and leave the field open for those grantees who are prepared to make the Colony their first interest.

12. *Census*.—Census operations started during the year and are progressing satisfactorily.

13. *Towns and Markets*.—The following table shows the progress made with the construction of the four towns to Chichawatni Road, Mian Channu, Khanewal and Jahanian which are in the Colonization Officer's charge :—

| Towns.           | MANDI SHOPS.           |                              | BAZAR SHOPS.           |                              | COMBINED SHOPS.        |                              | RESIDENCES, FACTORIES, FLOUR MILLS. |                              |                        |                              |                        |                              |

| Jahanian         | ...                    | 27                           | 6                      | 6                            | ...                    | 28                           | ...                                 | 3                            | ...                    | 3                            | 1                      | 1                            |

NOTE.—In the case of Jahanian, the statement does not tally with that of the previous year, but the present one is correct.

There is still a difficulty in obtaining building materials and railway waggons and in view of this the progress in construction is satisfactory. But there are signs that the recent very rapid progress of these towns is slowing down a little. Contributory causes are the considerable losses which many merchants suffered owing to the fluctuations of the cotton market and the general tightness of the money market. Rents show a slight downward tendency and there is a resultant reluctance on the part of those who bought sites this year to begin building operations. A short halt in progress at this period will do no harm. It is better than over-development followed by collapse. The prices paid for sites during the year are shown in the following table and indicate no general lack of confidence in the future of the towns :—

| Towns.           | MANDI SHOPS.                  |                                          |                                          | BAZAR SHOPS.                  |                                          |                                          | COMBINED SHOPS AND RESIDENCES. |                                          |                                          | RESIDENCES.                   |                                          |                                          |

Prices at Khanewal show a slight falling off. This may be attributable to the fact that the town is very closely connected commercially and financially with Multan where the past year has seen more than one business crisis. Jahanian is in a different position. Development here depends very largely on road construction. The town should be the trading centre of the prosperous tract to the south, but the roads towards Multan are better and much trade is diverted in that direction. The tract on the opposite side of the town is backward in allotment. I see no reason to doubt the eventual success of the mandi. It is badly in want of more railway facilities, especially for goods traffic. At the height of the wheat exporting season when the station and the mandi were choked with grain three weeks passed during which hardly a single waggon was available. The passenger service has been improved.

The Superintending Engineer, Derajat Circle, tells me that he knows of no such proposal.

E. R. ABBOTT,

3-12-20. *Offg. Commissioner.*

The town is still without a telegraph office. There is a rumour afoot that the Lower Sutlej Division is to be moved from Multan either to Khanewal or Jahanian. Its establishment at the latter place would perhaps provide the much-needed stimulus to the progress of the town.

Mian Channu continues to go forward. It is hoped that the trouble caused by floods may be lessened now that the surrounding villages are being allotted. Increased cultivation should absorb some of the surface water. On the other hand the spring level is reported to be rising with undue rapidity. Chichawatni Road progresses quietly.

The progress of public works financed by Government

I am not satisfied that the District Boards of Montgomery and Multan are doing their duty by these towns apart from the cost of the Engineering staff which is a fair charge against the Government grant for works, the cost of administration of a notified area is usually small and should certainly not be paid for by the Government. The fact seems to be that the District Boards have not been called upon to pay their fair share of the cost of schools and dispensaries in respect of the services rendered to the villagers who live outside the towns.

E. R. ABBOTT,  
3-12-20. *Offg. Commissioner.*

grants has been satisfactory. Sarais and dispensaries are open at Khanewal, Mian Channu and Chichawatni. All three towns are calling for accommodation for indoor patients, but the additional recurring cost is prohibitive unless the District Boards concerned are ready to contribute generously. Various other works such as dhobi ghats, slaughter-houses, etc., have been completed. It is hoped to make progress with roads this winter.

None of the towns are at present self-supporting and a portion of the Government grant is annually absorbed in balancing the budget for ordinary expenditure in administration. This state of things is likely to continue for some time. The question of broadening the basis of taxation is under consideration.

The work involved by general administration and public works of these four notified areas increases steadily and proposals have been sent up for extra staff which is especially necessary in the Colony Engineer's department. The work of allotment, particularly complicated in its closing stages and the ordinary administration of the colony make it difficult for the Colonization Officer to exercise a sufficiently thorough control over these towns. Most of the supervision is done, in the case of Jahanian, Khanewal and Mian Channu, by the already overworked Sub-Divisional Officer, Khanewal. A large amount of public money is being expended in these towns. Possibly the solution would be to combine the office of Colony Engineer with that of Secretary to the notified area committee.

14. *Communications*—The following table shows the work done on unmetalled roads in the Multan and Montgomery portions of the Colony:—

| District.      | Alignment<br>of road. | Dagbelling<br>of road. | Jungle and<br>sand clearance. | Earthwork. |
|----------------|-----------------------|------------------------|-------------------------------|------------|
|                | Miles.                | Miles.                 | Miles.                        | Miles.     |
| Multan ...     | 41.30                 | 38.60                  | 43.50                         | 52.40      |
| Montgomery ... | 66                    | 66                     | 21                            | 2.35       |
| Total ...      | 110.30                | 104.60                 | 64.50                         | 54.65      |

Communications are the crying need of the Colony now. There is no doubt that if road-making could be taken up—possibly by the Irrigation Department—a little before or at the same time as the extension of irrigation, enhanced prices would be obtained for land auctioned; witness the difference between the prices obtained here for land near a station and for similar land 10 or 15 miles away.

There is at last some hope that at least the approach roads to the mandi towns may be metalled during the coming year. Metal is obtainable but waggons are not.

I have already noted on the new scheme of roadside tree-planting. The planting already done in Khanewal is encouraging. Both District Boards are engaging trained arboricultural experts to assist the grantees in their work.

15. *Miscellaneous.*—During the year some anomalies of the present rule of successions to tenancies of Government land were removed and the position of an original female tenant and the question of succession after her were regularised by an Amending Act to the Colonization of Government Lands (Punjab) Act, 1912.

Two new Police Stations were opened in April in the Montgomery Tahsil. Crime is increasing, but not more than proportionately to the increase of population. The curtailment of temporary cultivation will deprive many “janglis” of their land and the result will probably appear in the crime reports. The number of cattle-pounds has risen to 29. More are needed.

Forty-six new chaukidars were appointed. The total number is 551. The present pay is generally reported to be inadequate, especially in other than abadkari villages where the chaukidar does not get his two acres as a village menial.

Forty-five new Post Offices were opened during the year, bringing the total up to 65. One of the greatest difficulties of the Postal Department was finding village postmen and mail runners. This difficulty has been got over for the time being by giving these men 2 acres each as if they were village menials.

Forty-eight new primary schools were opened during the year.

One hundred and thirteen Co-operative Societies were started, bringing the total up to 270, while the number of Supply Unions has risen to 157. The Demonstration Farm is doing useful work. The greatest credit is due to the co-operative staff for this work which is of the utmost importance and value. Even the “janglis” are being induced to co-operate. A meeting which was held to discuss the question of forming societies to take canal water on the Volumetric System, distribution being managed by the societies themselves, was distinctly encouraging in the amount of support received. The Colony Agricultural Society flourishes and is doing good work especially in encouraging the growing of cotton in rows and interculture. Several members have asked to be supplied with reapers.

Fourteen new patwarkhanas were opened, bringing the total up to 95. More are urgently wanted.

16. *Extensions.*—In the year under report irrigation by lift commenced for the area known as plot G (south of

Wan Radha Ram), area 10,425 acres, and on Jarahi Minor (8 B. R.), area 6,875 acres.

" Projects for lift irrigation relate to Plots L, K and H, total area 28,813.

17 *Establishments.*--Mr. J. G. Beazley held charge of the office of Colonization Officer until 13th February 1920, when I took over from him and held charge for the remainder of the year under report. Khan Sahib Rajab Ali held charge of the office of Assistant Colonization Officer throughout the year. The office of Extra Assistant Colonization Officer was held by Malik Allah Bakhsh, M.B.E., until 29th March 1920, when he was relieved by Mirza Aslam Beg. Lala Dharu Lal was Sub-Divisional Officer, Khanewal, throughout the year.

The work of the colony staff was increased by demands in connection with the preparation of Electoral Rolls and by the commencement of census operations. The staff as a whole worked efficiently. One Naib Tahsildar and three Kanungos were put under suspension on suspicion of having taken bribes in connection with the distribution of temporary cultivation. The former's appeal against the Commissioner's order of dismissal is pending before the Financial Commissioner.

I am indebted to Khan Sahib Rajab Ali for the benefit of his experienced advice which has been invaluable to a new comer. Mirza Aslam Beg has taken up his duties with keenness and efficiency. Lala Dharu Lal has a very heavy task in Khanewal. It would be creditable to him to get through his work at all; that he not only copes with it but deals with it with despatch and thoroughness is a great testimony to his ability and industry. The Colony Tahsildar, Chichawatni, Mir Nazir Ahmad's indefatigable keenness has been of great assistance to me.

Mr. Soni held charge of the office of Colony Engineer during the year. His professional work has been very satisfactory and he has also been of considerable help in general matters, affecting the colony towns.

I endorse Mr. Puckle's appreciation of his staff and in particular bring to notice the work of Lala Dharu Lal at Khanewal. Of Mr. Puckle's own work, speaking with much experience of former Colonisation Officers, I have nothing but praise to offer.

E. R. ABBOTT,  
*Offg. Commissioner.*

3-12-20.

If this report has exceeded the prescribed length I must shelter behind the invariable excuse of my predecessors for a similar fault, the variety and interest of the work of a Punjab Colony.

F. H. PUCKLE,  
*Colonization Officer, Montgomery.*

|                                                                | Total to date    | ...          | ...          | 45,197    | 45,197    |

\*Decrease in the number of proprietary villages is due to the fact that in Khane-wal and Okara some crown waste villages were shown in the previous statement as proprietary villages and decrease of 104,000 acres in the area under settlement or remeasured is due to re-adjustment and recalculation.

## Upper Chenab Canal Colony.

### SHEIKHUPURA DISTRICT.

1. *Survey and demarcations.*—No survey or demarcation was made during the year under report.

2. *Conditions.*—No new statement of conditions was issued during the year.

3. *Allotment.*—(i) One hundred and twenty acres were distributed in October 1919 to those  
Statements Nos. I & II. abadkars whose grants had to be doubled on account of their land being in Kharif channel chaks.

(ii) Seven hundred and fifty acres were restored in accordance with the Financial Commissioner's orders to the original grantees whose grants had been resumed for breach of the condition of residence. These abadkars have now settled down.

(iii) One hundred and sixty-two acres in Chak No. 37 were sold to Mr. Benjamin under orders of the Financial Commissioner, at the rate of Rs. 150 per acre.

(iv) Sixteen acres were allotted to one Mukarab Khan in Chak No. 48 for planting a garden by order of Khan Bahadur Mirza Sultan Ahmad, Colonization Officer.

(v) Altogether 144 acres were resumed by Government owing to the persistent neglect of certain abadkars. Twenty four acres were resumed on account of the transfer of a grant from a Kharif channel chak to a perennially irrigated chak.

(vi) The allotment of the 80 rectangles sanctioned for distribution among the holders of small holdings in the villages adjoining the Colony has not yet been carried out. The matter was taken up, but the lists originally prepared were found incomplete and a number of other points arose. Hence it was impossible to make the allotment before the irrigation season commenced. It will now be carried out in the course of the present cold weather.

(vii) No land was auctioned during the year.

4. *Cultivation of the permanently allotted area.*—(i)  
Statement No. III. There has been an increase of 6,216 acres—Kharif 3,066 and Rabi 3,150—in the cultivated area as compared with the last year.

(ii) This highly satisfactory and promising increase in cultivation is due to the following reasons :—

(a) The efforts of the Colony Officers to persuade the abadkars to stick to their chaks and improve their grants proved more successful than in the previous years. Attendance throughout the year was distinctly good as compared with previous years.

(b) The number of wells is rapidly increasing in the Kharif channel chaks. Twenty-one new wells were sunk during the year and as many as 24 are under construction.

(c) Besides the two kilns at Kaka Shah Kaku and Marh Bhangoan, the abadkars put up 12 zamin-dara kilns and baked their bricks successfully and comparatively cheaply. The people appear to be now making a real effort to sink wells and to have realized that it is impossible to be prosperous in these chaks unless wells are sunk.

(d) There were good rains during the year and there was consequently less kharaba.

(e) Till recently the general idea among the abadkars was that this kallar soil was not suited to rabi crops. This idea was the real cause of much absence from chaks and the unsettled look of these petty hamlets. Experience has now shown that after a few years of cultivation and the application of the silt-bearing canal water it is possible in places to grow Rabi crops with the aid of well water.

(iii) These facts show that the future of the colony is beginning to be more hopeful. Unfortunately the failure of the rains this

I agree that the prospects of this backward little colony are beginning to look somewhat more hopeful.

H. J. MAYNARD.

a considerable area of crops will, I fear, result in a set-back. A few more years of good rainfall and the consequent success of the rice crop would have been a great stimulus to the prosperity of the colony.

5. *Temporary Cultivation.*—(i) Altogether 5,836 acres were given out for temporary cultivation. Out of this area only 1,182 acres were brought under cultivation which shows an increase of 331 acres in Kharif and 239 acres in Rabi over the figures of the preceding year. This increase is due to the causes which have been fully dealt with under

head 4. Experience showed that it was embarrassing to these temporary grantees to allot the area at the end of every year. Accordingly it was ordered that the grantees of the previous year should continue to hold the land for one year more on temporary cultivation unless they had failed to cultivate their land in the preceding year. It was also ordered that outsiders should not be given any land for temporary cultivation as the Zamindars of the adjoining villages and after them those of this district should have a preferential claim on the colony.

(ii) Less complaint is now heard of the scarcity of tenants which was a serious handicap in the less favourable days of the colony. The increasingly prosperous outlook of the colony is drawing tenants of the right stamp and the abadkars too do not absent themselves now.

*Vide* paragraphs (vi), (vii) and (ix) below.  
This statement appears to need some qualification.  
L. FRENCH—22-11-20.

6. *Receipts by way of Capital.* Statement No. IV, attached herewith, shows the receipts by way of capital and the balance. No remarks are needed.

7. *Acquisition of Proprietary and Occupancy Rights.*—Only one grantee, Abdul Latif, acquired proprietary rights in respect of 68 acres in Chak No. 8 during the year under report. This man's grant had originally been resumed for non-compliance with the conditions but he eventually complied with them and the grant was restored.

8. *Mutation Cases.*—The mutations attested during the year are detailed as under :—

|                        |       |     |    |
|------------------------|-------|-----|----|
| By Deputy Commissioner | ...   | ... | 6  |
| By Revenue Assistant   | ...   | ... | 6  |
| By Naib Tahsildar      | ...   | ... | 21 |
|                        | Total | ... | 33 |

9. *Settlement Proceedings.*—No remarks.

10. *Village Sites.*—(i) The abadkars have generally constructed their residential *ahatas*.

(ii) The village bazars and lanes are generally in good condition.

(iii) The planting of trees in the chaks is receiving attention. With the closure of the canal in the Rabi trees commenced withering and died away before the ensuing Kharif. Now that wells are increasing, it is hoped that the

abadkars will succeed better by arranging to water these seedlings from their wells. In some places where the land is good and retains moisture enough to maintain these plants during the Rabi, the trees are in good condition.

(iv) It is, however, to be regretted that the Kikar <sup>Probably it will not be is the only tree that appears to find a</sup> <sup>always so.</sup> congenial soil in the colony.

L. FRENCH - 27-11-20.

(v) Chak No. 23 is at present without an abadi of its own. The site proposed is subject to floods and a better site is not available. Proposals for the construction of a Bund round the abadi are under consideration.

(vi) Chak No. 50 has no abadi. The Murir Hassan, abadkars put up some *kothas* which were washed away by floods and these grantees have not the grit to persevere. They are applying for the exchange of their grant to Chak No. 44 which is very prosperous and is near Kala Shah Kaku Railway Station. Abadkars of the Murir Hassan type can seldom succeed in a colony like the present where some perseverance and labour is required. They are not prepared to rough it and have remained absent from the colony for the greater part of the year.

(vii) In the perennially irrigated chaks the abadkars are in good condition. Of the Kharif chaks, those allotted to Labanas are distinctly superior to the rest. Rakh Baoli Lahna Singh, Rakh Kuthiala and Rakh Ohhaoni abadkars are—very many of them—still notorious for going off to their original villages in the Rabi. They belong to Hafizabad and Wazirabad tahsils where they own sufficient land. Drains in these tahsils have done something to remove the evil effects of water-logging there and these abadkars, who are not conspicuous for energy, find more attraction in their old settled homes. It is somewhat of a problem for this colony how to deal with these Hafizabadis and Wazirabadis.

(viii) There are altogether 101 wells in the colony

78 irrigation wells.

23 drinking wells.

Twenty-four wells are under construction and will be complete very shortly.

(ix) The settling down of three new shopkeepers and 15 new Kamins in the colony is very promising and is an eloquent testimony to the better aspect of the colony. A flour-mill run by an oil engine has lately been erected and started work in Chak 17. One hundred

These facts look like the beginning of an improvement.

H. J. MAYNARD.

and eight *ahatas* were allotted during the year ; out of which 39 have already been constructed.

11. *Lambardars and Zaildars*.—(i) There are altogether 63 headmen in the colony. Out of this number three are on probation for one year and were appointed during the year under report.

(ii) The temporary Lambardars were confirmed during the year. No headman was dismissed

(iii) There are no separate Zaildars and Safedposhes in the colony. There are, however, two Safedposhes in old circles from among the colonists in Chak Nos. 2 and 9, respectively.

(iv) In the Kharif chaks Lambardars feel great inconvenience in realising the revenue from abadkars who still persist in absenting themselves in the Rabi. These headmen have very often to pay a part of the demand from their own pocket and then go to the original homes of the defaulters to realize the dues. The Zaildars adjoining the colony have failed to interest themselves in colony matters and do not give any help in collection of revenue.

(v) These are serious evils and it will be a matter for consideration when the zail arrangements of Sharakpur tahsil come up for revision in connection with the partition of the tahsil into the two new tahsils whether separate zails should not in some cases be formed for these colony chaks. I hope shortly to submit a separate report on the question of the grant of Lambardari rectangles.

12. *Census*.—(i) There has been no regular census in the colony so far. Census operations have been started in the province this year and accurate results will be available at the end of it.

(ii) In September 1920, however, the Revenue Assistant carried out a census of these colony chaks purely from the point of view of information and interest, and the results—probably fairly accurate—are as below :—

|                            |     |     |     |       |
|----------------------------|-----|-----|-----|-------|
| Men                        | ... | ... | ... | 2,241 |
| Women                      | ... | ... | ... | 1,472 |
| Children (male and female) |     |     | ... | 2,096 |
| Total                      |     |     | ... | 5,809 |

13. *Towns and Markets.*—There is no town or market in this colony. The colony produce, at present, finds its way to one of the three adjoining markets—Lahore, Nankana Sahib and Warburton.

14. *Communications.*—(i) No new road was constructed during the year under report.

(ii) A few miles were repaired on the Sheikhupura-Marh road and work is now again in progress. It is hoped that work will be started on the Marh-Nankana Sahib road during the current year. These roads when completed should facilitate the export of produce from the chaks near Marh.

The Communications Board has paid particular attention to the needs of this colony in making its grants for road construction: and is pressing the Canal Department to make a bridge over the Deg Diversion Channel.

H. J. MAYNARD.

(iii) The Canal Department have for some harvest past been collecting an acreage rate to meet the cost of culverts but as yet very little seems to have been done. I have been in correspondence with the Canal Department on the subject and hope that shortly the main roads will be supplied with culverts.

This too should be taken up with the Irrigation Department by Deputy Commissioner.

L. FRENCH—22-11-20.

(iv) On the village paths from chak to chak the water-courses are mostly unbridged.

15. *Miscellaneous.*—(i) The land granted to Raja Sir Daljit Singh and Nawab Sir Zulfiqar Ali Khan in Rakh Kuthiala is generally in the same state as was reported last year. Three tube wells—one each in Chak Nos. 25, 26 and 29—were worked for purposes of irrigation. The dear price of kerosine oil and the general reluctance of tenants to conform themselves to this manner of irrigation made the scheme a failure. Accordingly two of these have been sold and only one now remains. In Kharif 1919 only 136 acres were brought under cultivation and in Rabi 1920 only 273 acres. I visited this grant myself and

The title is "Khan" not "Nawab."

L. FRENCH—23-11-20.

The writer of this paragraph is evidently not aware that the grantees in Rakh Kuthiala are bound by the terms of their grant to raise water by means of power derived from the canal falls. If they attempted to carry out their engagement, the price of kerosine oil would have no effect upon the undertaking. But they have, so far, made no real attempt to carry out conditions.

H. J. MAYNARD,

Financial Commissioner.

from the figures given to me by the man in charge it

would appear obvious that at the present cost of kerosine oil it is impossible to make a profit out of rice cultivation by pumping unless there are favourable rains. If all the water required by rice has to be supplied by means of the pump, the expenditure involved exceeds the return.

(ii) The grantees have baked bricks and they propose to sink wells and work them by means of electricity. The Tata Company, Bombay, and the State Engineer, Kashmir, are being consulted in the matter.

(iii) The one tube well that is working at present has brought under cultivation only about 77 acres of land. As the harvest inspection is not yet finished, exact figures cannot be given.

(iv) The Engineer and the pensioner Tahsildar have been dismissed by the grantees and two new men have been employed instead.

(v) The experimental Rice Farm has not as yet come into existence. The land has been leased out by the Agricultural Department and no practical steps have been taken to start the farm.

(vi) The 23 acres of land set apart for a rice factory are still lying vacant. Sayed Muratab Ali Shah and Afzal Ali Shah, kiln contractors at Kala Shah Kaku, have applied for a site for starting a private rice factory. Proposals have been submitted in this connection.

(vii) The order passed by the Government to the 4th Cavalry in Chak No. 4 to quit their land was cancelled later on. The cavalry used to allow their horses to roam about grazing and consequently these horses died of a local disease popularly called 'Pheta.' During the year under report they did not allow their horses to graze freely by way of experiment and no casualty is reported. The land is good and there are a fair number of tenants. During the year 733 acres were brought under cultivation as against 514 last year.

(viii) The abadkars generally complain that the canal patwaris assess the abadkars for grass by entering Rauni in the papers.

(ix) There are altogether five Zamindari banks in the colony; out of these three were started during the year with a capital of Rs. 4,700. The Co-operative movement is gaining ground.

(x) A post office has been opened at Kala Shah Kaku Railway Station. There are, however, no postal peons either there or at the post office at Marh Bhangoan to deliver letters in the adjoining chaks and the usefulness of these post offices is to that extent minimized. Recommendations for opening post offices in Chaks 3, 8, 13 and 18 have been sent up already.

(xi) The cattle-pound at Marh Bhangoan was brought into use only  $1\frac{1}{2}$  months ago. Nothing can at present be said about its usefulness. Rs. 1,000 only was distributed as takkavi for sinking two wells. The last rice crop was unusually good and the colonists have money of their own for sinking wells. Further, the large sum of Rs. 56,500 was distributed in the previous year and those wells have not been completed as yet. The kiln at Kala Shah Kaku has so far supplied bricks for 37 wells but the kiln at Marh Bhangoan has so far supplied bricks for two wells only. The contractor of the Kala Shah Kaku kiln has, I think, carried out his contract in a business-like manner. The contractor of Marh Bhangoan is somewhat handicapped by its distance from the railway. He seems to have considerable difficulty in getting coal and hence brick burning has been delayed. It is probably, however, partly due to a lack of business capacity on his part as the other contractor seems to have no difficulty in getting the coal, though possibly he has to pay a heavy price for it.

I believe the difficulty to be real.

L. FRENCH—22-11-20.

(xii) No epidemic was reported during the year : 18 men, however, died of snake bite.

(xiii) Three criminal and four revenue cases in the colony were decided by the Colony Naib-Tahsildar.

(xiv) Five Primary Schools have been started in Chaks Nos. 3, 8, 13, 18 and 44. A school would be desirable in Chak No. 21 too.

(xv) Several abadkars are desirous of obtaining small grants of land for planting gardens in the Colony. These gardens, if planted, will conduce to the prosperity of the Colony. There are at present no instructions on the subject. It will be certainly in the interests of the colony development if a few rectangles in various Chaks were set apart for this purpose and the Deputy Commissioner authorized to allot plots say up to 10 acres to suitable applicants.

(xvi) The four rectangles reserved for allotment to well-finders in the Colony have not so far been distributed and there seems to be little likelihood of their being ever distributed as no well-finder of the required stamp is forthcoming. These might be utilized to meet the demand for garden plots.

(xvii) Considering that at present rice is the chief crop in the Colony, it will add to the abadkars' prosperity if private rice factories were established at Kala Shah Kaku and Marh Bhangoan. Proposals for one at the former place have recently been submitted.

(xviii) In last year's report certain remarks were included by the then Colonization Officer regarding the supply of water in the Raya Branch. It is regretted that on subsequent enquiry these remarks were found not to be strictly accurate.

(xix) The same complaint that was made last year regarding the scarcity of water is still made and I think it desirable to make a few remarks on the subject. The truth of the matter is that there is really little demand for water before June as the staple crop of the Colony is rice. No doubt it would be extremely desirable if the colonists were to grow other Kharif crops, but from what I have seen of the soil of the Colony the bulk of it is not of such a nature as yet to grow anything but rice satisfactorily. In time with cultivation and the deposit of the silt in the canal water the soil may eventually attain a better texture but it will take some years to accomplish this.

(xx) From what I can gather the position is this that the colonists wait to plant out the rice till the first rain and then hope to mature it with the aid of the canal water and subsequent rainfall. If the rain is delayed (as was the case this year when there was practically no rain except for a day or two in the beginning of August) or when heavy rain causes abnormal floodings, as was the case last year, the planting out of the rice crop is delayed.

(xxi) The decision of the Canal Department to cut off irrigation from these Kharif chaks on the 15th October no doubt results in considerable damage to the crop, which would be largely improved if water could be given for another 15 days.

(xxii) This year it appears that a number of breaches on the Muridke Distributary and the Kala Shah Kaku Branch occurred, most of these being in the Sialkot District.

(xxiii) As regards the chaks in the Sheikhpura District, complaints have arisen this year. I have visited some of these chaks and find that the condition of the crops is distinctly poor, a large area of rice being a total failure. It is possible that in some cases villagers may have sown a somewhat larger area than they were entitled to, but there can be no doubt that the failure is due to the fact that the canal irrigation unaided by rain is unable to mature area sown. I understand that there has been a shortage of supply in the rivers and hence a diminution in the supply available for these channels. This has necessitated fairly frequent closures which have had prejudicial effects on the success of the crops.

(xxiv) The case of Chak No 5 is specially bad, but I am taking this up with the Executive Engineer. There have also been complaints that the size of outlets has been altered on some of these distributaries and that extra outlets, previously allowed, have been closed this season. I am not in a position to say how far this is accurate, but would suggest that these chaks call for a special consideration and liberality on the part of the Canal Department.

Statements Nos. V and VI. 16. *Extensions.*—No remarks.

17. *Establishments.*—(i) On the constitution of the Sheikhpura District with effect from November the 1st, 1919, the post of Colonization Officer ceased to exist. The Revenue Assistant, Lala Daulat Ram, Budhwar, has been in charge of the colony work under the Superintendence of the Deputy Commissioner. He has devoted considerable time and attention to the work of the colony and has acquired a thorough knowledge of it and its needs, which he is always ready to press.

(ii) M. Din Muhammad was the Colony Naib-Tahsildar up till 12th August 1920 when he was succeeded by M. Hazara Singh. M. Din Muhammad had a thorough knowledge of the colony from its early days and his work was recognized by acceptance of his name as a candidate for the post of Extra Assistant Commissioner during the year.

M. Din Muhammad's work in this Colony was of a very good quality.

—H. J. MAYNARD.

(iii) The three Colony Patwaris have now been absorbed in the regular staff of the Sharakpur Tahsil. There is no separate Field Kanungo of the chaks. At present one Colony Moharrir is employed but in submitting the scale of establishment for the district, I have suggested that it is essential that there should be also a Colony Clerk to deal with the English part of the correspondence which has been somewhat neglected in the past.

M. M. L. CURRIE,

*The 3rd November 1920.*

*Deputy Commissioner.*

---

L. FRENCH,

*The 22nd November 1920.*

*Additional Commissioner,  
Lahore Division.*

# Upper Chenab Canal Colony.

## LYALLPUR DISTRICT.

1. *Survey and demarcations.*—Nil.
2. *Conditions.*—There is nothing fresh to report under this head.

3. *Allotment.*—No grants of land have been made  
Statements Nos. I and II. during the year under report.

4. *Cultivation of the permanently allotted area.*—The  
Statement No. III. cultivated area during the year under  
report was 18,615 acres as against  
14,753 in the last year. The increase of 3,863 acres is  
due to the high price of food-grains and cotton. There  
is a large number of lessees in these chaks and they culti-  
vate as much land as possible in order to meet payment of  
the lease money.

The percentage of Kharaba indicates that cultivation  
is not yet up to the mark of the older tracts. The soil too is  
in parts very poor and the attempts of the class of tenants  
usually found in the Upper Chenab Colony to get good  
results out of inferior land are not often successful.

5. *Temporary Cultivation.*—Only 45 acres were given  
out this year on temporary cultivation as against 86 in the  
previous year.

6. *Receipts by way of Capital.*—There is a balance of  
Statement No. IV. Rs. 2,268 still outstanding from last  
year's demand of Rs. 6,691 owing to  
the postponement of instalments in two cases. These were  
allowed because the grantees in question were absent on  
military duty.

Of the balance, Rs. 16,426, outstanding at the end of  
the year under report, Rs. 13,790 have since been recovered.

Grantees are now very keen on paying up instalments  
and acquiring proprietary rights, very probably to enable  
themselves to sell the land advantageously.

7. *Acquisition of Proprietary and Occupancy Rights.*—  
During the year under report proprietary rights were  
granted to 10 auction purchasers and 32 disappointed  
Jhelum grantees in 597 and 2,700 acres respectively.

8. *Mutation cases*.—Mutation cases decided numbered 120 as against 53 in the previous year. The increase is chiefly due to the preparation of records of rights, which was completed during the year.

9. *Settlement proceedings*.—The measurements and preparation of records of all the 27 villages have been completed during the year.

10. *Village Sites*.—One hundred and fifty village sites were allotted during the year under report. The demand—not without success—is keener now, and every effort is being made to induce zamindars to reside in the village *abadi*. There is still a certain number of them who prefer to live in their rectangles, but they are slowly moving to the village site.

In one village—Chak No. 17—it has been found necessary to extend the present *abadi* by about half a rectangle.

The abadkars have generally settled and the Colony is making progress.

There are at present 5 wells in the Colony chaks, all used for drinking purposes.

11. *Lambardars and Zaildars*.—Two temporary Lambardars—both disappointed Jhelum grantees—were confirmed.

No Lambardar was dismissed on account of inefficiency.

Land revenue is paid in promptly both by tenants and Lambardars.

12. *Census*.—Nil.

13. *Towns and Markets*.—Nil.

14. *Communications*.—No road has been constructed during the year under report. Projects for the following are in hand :—

(1) Jaranwala-Baraghar.

(2) Bucheke-Nankana.

15. *Miscellaneous*.—The colonists, especially those owning land in the villages situated on the tail of the minor distributary, generally complain of the scarcity of water-supply.

It does not of course follow from this that water is really short, but anything like fixity in supply is not to be expected in reason for some years more.

Statements Nos. V and VI.

16. *Extensions*.—Nil.

17. *Establishments*.—Mr. J. D. Penny, Assistant Commissioner, held charge of the Colony during the first two months of the year under report. His place was taken by Pandit Avatar Kishen Kaul, Extra Assistant Commissioner, the present Assistant Colonization Officer.

Lala Hakumat Rai, Settlement Naib-Tahsildar, two Kanungos and 10 Patwaris continued to work in the Colony up to the 10th August 1920, when Settlement operations came to an end.

A mohasib on Rs. 25 per mensem is entertained at Sadr. His term expires on the 31st March 1921.

GOPAL DAS, E. A. C.,  
for *Deputy Commissioner*,  
*Lyallpur*.

\*In column No. 3 an increase of 42 acres is due to a more accurate calculation of the area.

In column No. 4 an increase of 329 is due to the fact that 229 acres of allotable uncommanded area became commanded and were allotted.

In column No. 5 the increase is merely due to an accurate totalling.

In column No. 5 (a) the increase is due to the fact that 301 acres, which were uncommanded, became commanded.

In column No. 6 an increase of 884 acres was due to the following reasons:—

|                                                                              | Acres. |

# Upper Jhelum Canal Colony.

## GUJRAT DISTRICT.

1. *Survey and demarcations.*—Measurement work was completed in 15 Chaks during the previous years, and in the year under report in 18 Chaks. The work is progressing very satisfactorily and will be carried on in the remaining Chaks next year.

2. *Conditions.*—The same as before. Nothing particular to note.

3. *Allotment.*—The total area of Crown waste was 47,332 acres, of which 4,658 acres were let out on leases, etc., leaving 42,674 acres available for allotment. Of this 1,212 acres are uncommanded and 337 acres are ghair-mumkin=1,549 acres, and thus the remaining net area is 41,125 acres.

Out of this area 35,360 acres were allotted during the previous years and 380 acres during the year under review, leaving 6,934 as available balance as detailed below :—

Classes of abadkars might usefully have been specified.

H. P. TOLLINTON.

| <i>Commanded.</i> | <i>Uncommanded.</i> | <i>Ghair-mumkin.</i> |
|-------------------|---------------------|----------------------|
| 5,385             | 1,212               | 337                  |

There were 9 exchanges during the year under review, mostly owing to the land being uncommanded.

Areas might usefully have been given.

H. P. TOLLINTON.

Complaints regarding cattle-lifting are still considerable, but the operation of the Thikri Pahra system will, it is hoped, reduce them to a great extent. The colonists are availing themselves of this advantage with interest.

4. *Cultivation of the permanently allotted area.*—Of the allotted area 33,231\* acres were sown during the year, of which 3 per cent. failed. The Kharif crop failed 4 per cent. and the Rabi failed 2 per cent. Thus both the crops were good and the failure is merely nominal.

Statement No. III.

| <i>*Kharif 1919.</i> | <i>Rabi 1920.</i> |
|----------------------|-------------------|
| Acres.               | Acres.            |
| 14,326               | 18,905            |

Recoverable demands should have been given.

H. P. TOLLINTON.

|                                                                                                                                                                                                                                                                  |            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| 5. <i>Temporary Cultivation.</i> —Five thousand one hundred and forty-eight* acres of land were allotted on temporary cultivation during the year under report. Out of this area 4 per cent. failed. The Kharif crop failed 5 per cent. and the Rabi 4 per cent. |            |
| *Kharif 1919.                                                                                                                                                                                                                                                    | Rabi 1920. |
| Acres.                                                                                                                                                                                                                                                           | Acres.     |
| 2,410                                                                                                                                                                                                                                                            | 2,738      |
| (The last year's figure 10,956 included the area of the forest plantation which has now been excluded.)                                                                                                                                                          |            |

The people have derived large profits from temporary cultivation and the cultivation of food-grains has also been very extensive.

Formerly the tenants paid only land revenue and water rate, but from the next Kharif Malikana at the rate ranging between Rs. 2 to Rs. 16 per acre according to the quality of the land will be levied from them.

No mention of total demand collection and balances of total land revenue connected with temporary cultivation.

H. P. TOLLINTON.

Orders from the Financial Commissioner have now been received that land on temporary cultivation should not be given in future as the permanent military grantees are about to come in.

#### 6. *Receipts by way of Capital.*—Nil.

Statement No. IV.

#### 7. *Acquisition of Proprietary and Occupancy Rights.*—Nil.

8. *Mutation Cases.*—There were 21 mutation cases during the year under review. Almost all were of deaths.

9. *Settlement Proceedings.*—Nil.

10. *Village Sites.*—In two Chaks house sites were allotted during the year under report. In two Chaks these were also allotted in the last year and the houses are under construction.

During the year under report 17 wells have been sunk in addition to 13 wells already constructed.

There are now 30 wells sunk in all, which is good progress.

11. *Lambardars and Zaildars.*—Lambardars were appointed in six Chaks during the year under report and in others the Lambardari cases are pending, and the different claimants are competing with one another by developing their lands and by constructing good houses.

One of the colonists has been appointed a Sufedposh during the year under report.

12. *Census*.—Nil.

13. *Towns and Markets*.—The construction of the Baha-ud-Din Market is going on with zeal and promptness.

The Public Works Department have collected stone for the Market roads but nothing has yet been done towards construction. The same is the case in regard to drainage.

The Railway Department have not decided anything so far about the siding, on account of which the auction of the factory sites is deferred, which is causing a great loss to both the traders and the zamindars.

14.—*Communications*.—In most cases village roads bridges and culverts have been constructed which have given great facility to the public.

15.—*Miscellaneous*.—Nil.

Statements Nos. V & VI.

16. *Extensions*.—Nil.

17.—*Establishments*.—

1. M. Ram Singh, Colony Naib-Tahsildar, throughout the year.
2. Taj Muhammad, Field Kanungo, throughout the year.
3. Six Patwaris including one Muharrir for the Naib-Tahsildar, all at the rate of Rs. 12 per mensem, throughout the year.
4. One Muharrir at Sadr throughout the year at Rs. 15 from October 1919 to January 1920 and at Rs. 20 from February to September 1920.

This staff has worked under the supervision of: Rai Sahib Chaudhri Kesar Ram, who during the years 1916 and 1917 was Extra Assistant Colonization Officer for this Colony and is now Revenue Assistant of the district since 11th October 1918. The Rai Sahib has done excellent work in connection with this Colony. Bakhshi Ram Singh also did good work.

Statement No. II should have given allotments by years.

H. P. TOLLINTON.

There are too many blank sheets.

H. P. TOLLINTON.

RAGHBIR SINGH,

*Deputy Commissioner, Gujrat.*

1922.

REVIEW ON THE ANNUAL REPORT ON THE PUNJAB COLONIES, FOR THE  
YEAR ENDING 30TH SEPTEMBER 1921.

*Proceedings of the Governor of the Punjab in Council  
No. 251-325-P., dated the 15th March 1922.*

REMARKS.—As the Financial Commissioner in charge of the administration of the Canal Colonies has during the year become Secretary to the Local Government in this Department, it has been unnecessary for him to add the separate review which has hitherto been forwarded with the reports submitted to Government.

2. The chief problem and obsession of Colony officers during the year has been the discharge of the commitments already undertaken by the Punjab Government in respect of the allotment of land and in particular the discharge of the obligation to find suitable land to complete the distribution of the reward grants promised to Indian soldiers. This problem has affected in more or less degree all colonies for which reports are still submitted and also the Lower Chenab Canal Colony, a report on which is not now required. In consequence it has been necessary to turn a deaf ear to all proposals for new grants and in fact during the year the only allotments which have been made are of grants already promised or for which provision was made in the revised scheme of Colonization of the Lower Bari Doab Canal. The chief hope of being able to satisfy in a satisfactory manner the obligations to military grantees now lies in the restoration to the Punjab Government, of the land allotted to various cavalry regiments for stud farm grants which owing to the abolition of the Silladari system have now been abandoned. A request has been made to the Government of India that these grants should be put at the disposal of the Local Government and orders are still awaited.

3. Agricultural conditions throughout the year were particularly unfavourable and on the Lower Bari Doab Canal the situation was greatly aggravated by the disastrous shortage of water during the winter. It is particularly unfortunate that such conditions should have obtained in what to many of the military grantees was their first year after allotment. Many grantees have no doubt, in consequence, been greatly discouraged by the reduction in the profits expected from their grants, but the excellent condition of the present

*Rabi* harvest will do much to allay the apprehensions which have been aroused. His Excellency the Governor in Council desires to acknowledge the manner in which Mr. M. S. Dhody, Superintending Engineer, and the other Canal officers of the Lower Bari Doab Canal contributed to alleviate the situation.

#### LOWER JHELUM CANAL.

4. On the Lower Jhelum Canal, with the exception of the final disposal of the old grants for plantations and for roadside arboriculture, the only allotments which have been made, have been in exchange for grants sanctioned on the Lower Bari Doab Canal and transferred to this canal. It is not quite clear on what conditions some of these allotments have been made. It is desirable that the position in regard to them should be examined with a view to their being put on a proper footing. The question of the conferment of rights on the colonists in this colony has been reported to Government during the year and the recommendations of the Local Government have been forwarded to the Government of India for their orders.

5. It is estimated by the Deputy Commissioner that about 36,000 acres of commanded land are available for allotment in this colony. The decision to irrigate 3 *Rakhs* in the Sobhaga Jungle, on the Jhang District boundary, which were excluded from the Colonization Scheme 1909, is one the propriety of which seems open to question. The further report of the Deputy Commissioner is awaited. On principle in view of the shortage of water at certain periods of the year it seems undesirable to waste available supplies upon inferior land. Military grants for which a special statement of conditions was issued were offered during the year in Jungle Sobhaga but the land is so inferior that very few grantees accepted grant in this area and many of those who did do so now regret their decision. The general distribution to military grantees of available land in this colony outside Jungle Sobhaga was postponed pending a decision whether this land would be necessary to compensate existing horse breeding grantees for any loss which might be occasioned by the alteration proposed in the Horse Breeding Scheme. It has now been decided that this land will not be required and arrangements will be made to carry out the distribution which was suspended by the orders of the Financial Commissioner in the early part of the year.

6. The result of horse breeding in the colony cannot fairly be judged by one year's figures. It may, however, be deduced from the decline in the foaling percentage accompanying the increase in the number of mares covered that the efforts of the Army Remount Department to compel recalcitrant owners of mares to have their animals covered does not in fact lead to any appreciable increase in the number of foals. The decrease in the number of animals purchased is serious. The number of fillies sold for replacements is not reported and in any case the price so obtained only amounts to the exchange between two colonists of a filly for its value. That the horse breeding colonists should be compelled to breed a class of animal which is bred for a particular purpose and is not easily marketable and should only be able to sell to Government one in eight of the foals born appears to His Excellency to constitute a distinct grievance and to indicate a considerable waste of energy and possibly of Government money. What happens to the surplus stock is not apparent, but it would seem desirable to make arrangements to assist breeders to dispose of their unwanted animals. The figures reported under sales and leases of land indicate as is natural that land with horse breeding conditions attached is less valuable than land free of such conditions but the difference on the figures reported is not as great as might be expected.

The punishments which it has been found necessary to inflict for breach of horse breeding conditions are not in the aggregate very serious. As regards the suggestion that a fine of more than Rs. 100 should be legalised it may be pointed out that the necessary legislation appears hardly justified by the number of cases in which even the full fine now impossible is inflicted. The proposal to devote the sum recovered as fines to rewards to good horse breeders if sanctioned will no doubt contribute to encourage breeding.

7. It is somewhat surprising that in an old established colony as large an area as 23,000 acres should have been given out on temporary cultivation during the year. The Governor in Council fully agrees that temporary cultivation is a most unsatisfactory system and should be terminated by the permanent allotment of the area available at as early a date as possible. It is hoped that much of this land will be taken up this year by military reward grantees and inquiries have been made whether available

land in Jungle Sobhaga cannot now be permanently allotted to the *Jangli* or local tribes.

#### LOWER BARI DOAB CANAL.

8. Except under the heads Horse Breeding Peasants and Hereditary Agriculturists and compensatory grantees the revised scheme of colonization has practically been worked up to. Under the latter head allotments have been given on tree-planting conditions which were agreed to for an area of 12,500 acres in 1920. In addition the allotments of inferior land on the special half-resumable conditions have been proceeded with. It would appear that the allotments in both cases have given an enormous amount of trouble. The existence of the inferior land however has made the special conditions necessary to induce tenants to take up land unfit for colonization on normal lines and there is every reason to hope that the trouble taken over the tree planting grants will provide the District Boards concerned with the fully stocked avenues which are essential on roads in this inhospitable country without the usual initial expenditure.

9. Very great difficulty has been encountered in finding suitable land for the military reward grantees to whom 178,000 acres in all has to be allotted. Rather more than one-fifth of the area or 39,000 acres were still unallotted on the 30th September last. Only 13,000 acres more are likely to become available for grant on the Lower Bari Doab Canal during the current year. The situation will however be considerably eased if the military authorities agree to put the area of the defunct Regimental Stud Farms at the disposal of the Punjab Government. The schemes to allow these military grants to be given on the Thall and on the Sobhaga area of the Lower Jhelum Colony proved abortive. It is now intended that available squares in the rest of the Lower Jhelum Colony shall be offered to military grantees. It was understood locally that orders to this effect had issued last year and the disappointment felt when the mistake became known was profound. A large number of the grantees are north-country men and it is only to be expected that the possibility of getting grants on the Lower Jhelum Canal will lead to some unsettlement among those who have already taken possession of grants on the Lower Bari Doab Canal. As a last resort if the land so

made available proves insufficient it may be possible to allow *chiragah* on the Lower Chenab Canal to be reduced as a special case from 20 to 10 per cent. and allot the difference in suitable chaks to military grantees.

10. The horse-breeding scheme has at last been taken in hand and approximately 1,000 "Official" rectangles have been allotted during the year on horse-breeding leases out of the full quota of 3,400. These early lessees have been fortunate in being able to obtain broodmares from the abolished cavalry stud farms and also had the pick of the market. The Financial Commissioner found at the recent Horse Show at Montgomery that an exceptionally fine lot of mares had been collected, and that the scheme has been launched with every prospect of success. The Governor in Council wishes to record his gratitude to Captain E. H. Howe for the results already achieved, results which have been possible only by the exercise of great powers of organization and by strenuous and unremitting effort. Captain Howe, however, would be the first to admit the powerful support which he has received from Mr. Puckle.

11. The remarks of the Colonization Officer on the subject of the grants to depressed classes, which are additional to those to members of criminal tribes detailed in the allotment scheme, are of interest. The final proposals of the Financial Commissioner in regard to the nominees of the Protestant Missionary Bodies have not yet been dealt with by Government. Government, however, will be prepared to deal sympathetically with any proposal to remove any hardship which may have arisen out of the conditions on which land is to be sold to these people.

12. Little progress has been made with the problem of bringing under cultivation the *bara* soil of this Colony. The experiment being carried out by the Agricultural Department has produced negative results so far. The land which is held on the special '*bara*' conditions under the supervision of the Agricultural Department has only recently been allotted and it is too soon as yet to expect results. One whole chak has now been leased to a capitalist who besides capital has experience and enthusiasm. The development of this lease will be watched with interest.

13. It would appear that 500,967 acres were sown on a total area of 717,446 acres permanently allotted at the end of this year. As, however, over 140,000 acres were allotted during the year, it is impossible to draw any conclusion from the proportion of cultivation to allotted area. The outstanding features have been the shortage of water and the failure of American cotton. Remedial measures have been taken as regards the water supply and the cotton failure has engaged the earnest attention of the Agricultural Department.

14. The area under temporary cultivation has been greatly reduced although in *Rabi* 1921 as much as 272,247 acres were under this unsatisfactory system. It was found that the malikana rates had, in view of the unfavourable conditions, been pitched too high and they had to be reduced. It is, however, important that high rates of malikana should be levied on temporary cultivation which is eagerly sought after in all colonies. The temporary cultivator is frequently exceedingly difficult to eject from his holding.

15. Mr. Puckle's suggestion for differential water rates has been accepted in principle in the Lower Chenab and Lower Jhelum Colonies. The objections to *kharaba* are patent and decisive. There appears to be no reason why differential rates should not be adopted on the Lower Bari Doab Canal where differences of soil are very marked and lower rates without *kharaba* introduced in inferior chaks the colonization of which has been completed. Where colonization is still in progress it would appear to be undesirable to abolish *kharaba* at present.

16. The introduction of the normal institutions of a settled district proceeds slowly. Progress is much hampered by the fact that the colony is in two districts and falls under the jurisdiction of two District Boards. Communications are still bad; schools, post offices, hospitals have still to be provided. Improvements depend on the provision of funds and the present is not a time at which any considerable amount of money can be made available. Progress is however being made.

#### UPPER CHENAB CANAL.

17. A further area of some 3,700 acres has been allotted during the year and about 13,500 acres still remain.

for allotment. It is not clear why lambardari and kamin grants have been given on temporary cultivation as there appears to be no great objection to these allotments being made on a permanent basis as elsewhere.

18. Neither of the district reports gives any clear indication of the existing conditions in the colony but it appears that they are improving even in the *kharif* chaks and the development of well irrigation in these chaks is reassuring. Without means of irrigation in the *rabi* it is unreasonable to expect colonists to settle in the villages.

19. The Colony suffers in some degree from being in two districts but more from the fact that the Lyallpur villages have for some years been under orders for transfer to Sheikhpura District. This long-delayed transfer will it is hoped now take effect from 1st April 1922.

#### UPPER JHELUM CANAL.

20. This small colony has been practically entirely allotted as only 10 rectangles of commanded land remained for allotment at the close of the year. The temporary cultivation on land reserved for military grantees will now cease as the land is being taken up by the permanent colonists.

21. The necessity of securing well irrigation in the *rabi* harvest to supplement the canal supply has apparently driven certain of the colonists already to sink wells for irrigation. The movement appears to be one to be encouraged in the interests of the colonists themselves.

#### GENERAL.

22. The recoveries during the year on capital account for the various colonies dealt with in the report are :—

|                       |     |     | Rs.       |
|-----------------------|-----|-----|-----------|
| Lower Jhelum Canal    | ... | ... | 3,44,939  |
| Lower Bari Doab Canal | ... | ... | 18,46,176 |
| Upper Chenab Canal    | ... | ... | 87,666    |
| Upper Jhelum Canal    | ... | ... | 7,002     |
| Total                 | ... | ... | 22,85,783 |

In addition recoveries of this nature are made in the older canal colonies for which reports are no longer submitted.

On the Lower Jhelum Canal the recoveries were mainly on account of sites sold by auction in colony towns the whole demand for which has been recovered.

On the Lower Bari Doab Canal the demand is entered under the head Auction but includes demands on account of sales by private treaty. The situation as regards the recovery of instalments of the price of land auctioned on this canal is somewhat alarming as the purchasers gave high prices for their lots and have been faced by abnormally bad seasons. In addition however to the special concession referred to by the Colonization Officer the Financial Commissioner has recently allowed the postponement by six months of the series of instalments where any purchaser desired this concession and it has been found possible to cancel in many cases the orders confiscating lots for non-payment of instalments. The return of normal conditions will enable most of the purchasers to complete their payments with a small addition to the total demand for interest.

Large balances are shown on the Upper Chenab Canal mainly under auction in the Shahpur Tahsil. These are not explained in the Sheikhpura District Report and the situation requires further elucidation.

The Upper Jhelum Canal shows a clean sheet.

23. The finances of colony towns have forced themselves upon the attention of Government during the year. On the Lower Bari Doab Canal the towns were constituted notified areas at an earlier stage than in the older colonies and each town has been guaranteed half the proceeds of the sale of sites for five years up to a maximum total which in the case of Montgomery town will be Rs. 3 lakhs and elsewhere Rs. 4½ lakhs. Similar valuable concessions were made in the case of the older colonies. These have however given somewhat uneven results. On the Lower Chenab Canal and Lower Jhelum Canal the towns have far outstripped their expected development and additional land has been sold for new quarters which involve considerable capital expenditure on the local committees. Government has under consideration the question of how far additional grants are justifiable. The situation is complicated by the circumstance that there are several sources from which municipal committees derive Government grants-in-aid.

Of the towns in process of establishment those on the Lower Bari Doab Canal are with the exception of Jahanian in a flourishing condition. The development of

Jahanian, however, will be greatly assisted by the colonization of the Nili Bar from the Lower Sutlej Canal system. On the Upper Jhelum Canal the town of Baha-ud-Din is not in a flourishing condition but it is not clear why the Notified Area Committee does not as yet derive any income from the town. Its finances will always suffer from the fact that it has apparently no allotment of land as have colony towns generally from the rents of which funds are obtained. The town, however, has been generously treated by Government and the Public Works Department have in hand paving, metalling, drainage and water supply schemes.

24. Government has no information how far the right of purchase has been exercised by tenants in the older colonies and desires that the necessary information should be collected and the result reported.

25. The Governor in Council desires to acknowledge the successful manner in which Mr. Puckle has faced and overcome the difficulties with which he has been confronted during the year on the Lower Bari Doab Canal and also the excellent work done by Khan Sahib M. Rajab Ali, Rai Sahib Lala Dharu Lal and M. Nazir Ahmad.

On the Lower Jhelum Canal Mr. Jenkyns has worked enthusiastically. His report has been written with care and is suggestive.

The reports of the other colonies exhibit a tendency to obscure the general position by the inclusion of a mass of trivial detail.

ORDER.—Ordered that the above remarks be printed and circulated with the report, also that they be published in the *Punjab Gazette*, be communicated to the Chief Engineer, Irrigation Works, Punjab, the Agent, North-Western Railway, the Inspector-General of Police, and submitted with two copies of the report to the Government of India, Department of Revenue and Agriculture.

By order of the Governor in Council,

E. R. ABBOTT,

*Financial Commissioner (Development),*

*Secretary to Government, Punjab.*

# Lower Jhelum Canal Colony.

## SHAHPUR DISTRICT.

1. *Survey and demarcations.*—No survey or demarcation work was done during the year under report.

2. *Conditions.*—The Colony lands sold by the grantees during the year are as follows :—

|                    |    |     | Amount of land sold (in acres). | Total price. | Average price per acre. |
|--------------------|----|-----|---------------------------------|--------------|-------------------------|
|                    |    |     |                                 | Rs.          | Rs.                     |
| Non-horse-breeding | .. | ... | 178                             | 87,060       | 450                     |
| Horse-breeding     | .. | ... | 504                             | 1,99,850     | 396                     |
| Total              |    |     | 682                             | 2,79,910     | 410                     |

The area sold is considerably less than last year and all sales were made by persons anxious to buy land elsewhere. Non-horse-breeding figures include sales of several small tenancies of  $3\frac{1}{2}$  kilas by Zakhiradars who have been granted occupancy rights in one half of their grants. The area sold by the horse-breeders consists of 6 Abadkari and two Sufedposhi grants. Two of the former have bought other horse-breeding grants in the Colony. Vendees in the other cases were grantees who bought for their younger sons or brothers.

The average price per acre last year and this were :—

|                    |     | Last year. | This year. |
|--------------------|-----|------------|------------|
|                    |     | Rs.        | Rs.        |
| Non-horse-breeding | ... | 599        | 450        |
| Horse-breeding     | ... | 230        | 396        |

Last year's average price for non-horse-breeding grants was inflated, as mentioned in last year's report by the sale of 24 squares close to Sargodha for  $4\frac{1}{2}$  lakhs

and was not a fair average. If that transaction be excluded, last year's average price comes to Rs. 347 per acre so that there has been an increase in the prices for both horse-breeding and non-horse-breeding grants. The areas are hardly large enough to make it possible to deduce anything certainly from the rise. Those Zakhira-dars who have sold have generally got very good prices. One sold his  $3\frac{1}{2}$  kilas for Rs. 5,000.

As compared with last year the amount of the land under lease has increased from 879 squares to 911 squares. The details are as follows :—

|                           | Number of squares leased. | Total lease money. | Average per square. |
|---------------------------|---------------------------|--------------------|---------------------|
|                           |                           | Rs.                | Rs.                 |
| Horse-breeding ... ..     | 291                       | 1,16,293           | 400                 |
| Non-horse-breeding ... .. | 620                       | 2,63,334           | 425                 |

The horse-breeding area has decreased and the other apparently increased. But actually both have decreased and the non-horse-breeding figures have been swollen by the inclusion of about 80 squares of resumed Zakhira and Darakhtpali grants which have been handed over to the District Board and leased by that body. The slight rise in rents for the horse-breeding area is not noticeable. These figures are always liable to be affected by the leases of temporarily resumed horse-breeding grants to good horse breeders, as the competition is restricted by the necessary qualification. The increase in the non-horse-breeding leased area again is due to the high rents obtained by the District Board for the resumed Zakhira grants. As these grants were small pieces of land adjacent to the Chak abadis and the leases were auctioned keen competition including strong bids from the ex-grantees resulted. In some cases rents exceeded Rs. 100 per kila.

The results of horse-breeding during the year under report are compared with those of last year below :—

| YEAR.   |     |     |     | Number of mares served during the year. | Number of foals born. | Percentage on the mares covered previous year. | Number purchased. |
|---------|-----|-----|-----|-----------------------------------------|-----------------------|------------------------------------------------|-------------------|
| 1919-20 | ..  | ... | ... | 3,862                                   | 1,782                 | 49.52                                          | 374               |
| 1920-21 | ... | ... | ... | 4,133                                   | 1,992                 | 14.75                                          | 228               |

Higher rates have been introduced and the average price for young stock purchased has gone up from Rs. 199-6-7 to Rs. 243-9-3 per head. A higher standard has been set and consequently the number of colts purchased as remounts was smaller. I understand, however, that orders have recently been received that many more animals are to be bought. The District Remount Officer reports that the condition of the mares and young stock was on the whole very fair. As a class the peasant grantees continue to be the most satisfactory horse breeders. With a few exceptions the sufedposh grantees have continued their generally unsatisfactory careers. The stud of Agha Wusat Ali Khan whose excellent horse-breeding services and other qualifications have caused him to be selected as a member of the Sargodha Bench of Honorary Magistrates is very well run and District Remount Officer reports that it "stands out by itself in comparison with the other studs." Two others are reported satisfactory and even the worst of the rest is said to be shewing signs of trying. As a class they are less unsatisfactory than the sufedposh grantees. The year was distinguished by an unprecedented fodder scarcity, as the 1920 rains were a dismal failure and the cold weather canal water supply was not good; consequently there was considerable difficulty about fodder for those who had not paid enough attention to fodder crops. The abundant monsoon rains of 1921 saved the situation

but fodder will be dear this autumn and winter until the 1922 green wheat is ready.

One hundred and thirty-one cases of bad horse breeders were reported by District Remount Officer some for warning and the others for severer action. Fines amounting to Rs. 100 were imposed on 2 sufedposhes and Rs. 3,275 on 67 abadkars. Perhaps larger fines on fewer grantees would have been more useful. A proposal to use these fines as rewards for good horse-breeders is being sent up. Temporary resumptions were made in whole or part in five cases, and the resumed areas were leased to good horse breeders, who also took over the mares. On the report of Remount Department Sarbrahs were sanctioned for 5 minor abadkars.

It would probably be a great advantage if fines of more than Rs. 100 could be imposed. This sounds blood thirsty, but is really the reverse. The next punishment above Rs. 100 fine (the limit under section 24 of the Colony Act) is a temporary resumption, and in order to give the new temporary tenant the chance of settling down to horse-breeding the period of the resumption cannot well be less than five years. If no lease money be taken from the temporary tenant or if it be not paid to the permanent grantee the latter is, in effect fined some thousands of rupees. If the lease money be paid to the permanent grantee he is not punished at all, if the lease be at full rates—but rather benefits by obtaining freedom from his responsibilities and a comfortable cash income. If the lease be at a lenient rate the punishment of the permanent grantee depends on the extent of the leniency, which is not altogether a satisfactory system.

A few Zakhira cases which were pending at the end of the last year were decided in the beginning of this year and all the resumed lands have been handed over to the District Board together with the responsibility for keeping up the Zakhiras and roadside trees. The District Board has employed a special staff to look after these lands and trees. This transfer arose out of proposals for the reduction of "colony work" but, so far, it has resulted in a luxuriant crop of extra work. Possibly there may be a reduction now that the scheme has been put into working order.

3. *Allotment*.—The following allotments were made during the year under report :—  
Statements Nos. I and II.

|                                                              | Acres.       |
|--------------------------------------------------------------|--------------|
| Landed gentry grants (exchanges from Lower Bari Doab Canal). | 269          |
| Police reward grants ... ..                                  | 188          |
| Recruiting reward grants ... ..                              | 112          |
| Military grants ... ..                                       | 816          |
| Towns ... ..                                                 | 2            |
| Total ... ..                                                 | <u>1,387</u> |

All the above except the two acres to "towns" (site auctioned) were exchanges from the Lower Bari Doab Canal sanctioned by the Financial Commissioner.

The allotments in the Colony now stand as below :—

|                                      | Acres.         |
|--------------------------------------|----------------|
| 1. Cavalry Abadkar Ghoripal ... ..   | 30,209         |
| 2. Abadkar Ghoripal ... ..           | 159,730        |
| 3. Cavalry Sufedposh Ghoripal ... .. | 5,609          |
| 4. Sufedposh Ghoripal ... ..         | 15,495         |
| 5. Private Stud Farm grantees ... .. | 5,084          |
| 6. Army Remount ... ..               | 11,640         |
| 7. Seed Farm ... ..                  | 155            |
| 8. Regimental Stud Farms ... ..      | 14,356         |
| 9. Infantry grantees ... ..          | 30,864         |
| 10. Civil grantees ... ..            | 21,236         |
| 11. Jangli grantees ... ..           | 58,043         |
| 12. Towns ... ..                     | 483            |
| 13. Proprietary ... ..               | 5,133          |
| 14. Landed Gentry Grants ... ..      | 1,837          |
| 15. Police Reward Grants ... ..      | 579            |
| 16. Recruiting Reward Grants ... ..  | 1,326          |
| 17. Military Grants ... ..           | 816            |
| 18. Miscellaneous ... ..             | 68,476         |
| Total ... ..                         | <u>431,021</u> |

One thousand and nineteen acres mentioned in last year's report as available for allotment on account of vacation by horse breeders transferred to the Upper Jhelum Canal are still unallotted as the remaining vacated land is of inferior quality and not appreciated by new grantees.

Last year it was noted by me that these figures did not tally with those of the year before and objection was made by the Commissioner and the Financial Commissioner that explanation had not been given. I venture to point out, however, that I explained that the transfer of the Mona Depôt to the Gujrat District had not previously been mentioned and also stated that the figures given the year before had been incorrect. Both of these remarks are still true, and I find that in previous years also there have been many mistakes. What happened was this. The new Colony Assistant refused to hearken to the voice of his underlings and the figures were put up as correctly as could be ascertained. If thought necessary I will submit a separate report showing some of the mistakes which have been made, but it seems hardly necessary to swell the annual report with such matter. I am, however, in considerable doubt as to whether or not I ought to rebuke the Colony Assistant for his injudicious zeal.

One mistake made last year, however, I have now detected; and this was that the Cavalry Abadkar Ghoripal area was entered as 30,290 when it should have been 30,209. This has now been corrected.

The explanation of the difference between the body of the report and the Statement No. 1 about the unallotted area was that in the Statement the whole area available for allotment had been given including village sites and Lambardars and Kamins' lands, while in the body of the report only the area available for grantees as such had been mentioned. I understand that new orders are about to issue on the subject of the calculation of 10 per cent. *bagaya*. The 53,342 acres mentioned in Statement No. 1 excludes 10 per cent. *bagaya* but nothing else. By no means the whole of this area, however, is at present irrigable. The remodelling of the Lower Jhelum Canal is going on and it is difficult to say at any one time how much is irrigable. Roughly it is estimated that about 36,000 or 37,000 acres commanded by the Lower Jhelum Canal are available for allotment at present. This includes about 4,600 acres in the 3 Rakhs in the Sobhaga tract to which the Irrigation Department seems to have extended irrigation by a mistake. Those Rakhs consist of 5 chaks which under the orders of the Financial Commissioner contained in the Senior Secretary's letter

No. 4502, dated 23rd August 1909 were excluded from the Colonization Scheme and declared abandoned. I hope to send up a separate report about this when I have been able to see the land concerned.

One thousand and five hundred acres in Chak 91, A. S. B. have been reserved for the Military Grass Farms; but it is not quite certain whether it will be required by the Grass Farms Department. For of the area which is mentioned as held by the Regimental Stud Farms, 6 Farms are now held temporarily by the Army Remount Department and 4 by the Military Grass Farms. I understand that their future fate is not yet decided; and till this is known the fate of Chak 91, A. S. B. is also uncertain.

A large number of recipients of the new army grants on the Lower Bari Doab Canal were anxious for exchanges to the Lower Jhelum Canal as being nearer their homes and having better soil and water supply. Proposals were sent up asking that the exchanges might be permitted, and in anticipation of the Financial Commissioner's sanction preliminary arrangements were made for showing the soldiers concerned the lands believed to be available. Subsequently when the Financial Commissioner ruled that these exchanges could not be allowed for the present except in the Sobhaga Jungle telegrams and letters were sent out in all directions to inform the grantees. A large number, however, came but only 25 have so far taken up grants in the Sobhaga area.

4.— *Cultivation of the permanently allotted area.*—Crops of the year as compared with those of the last year are as follows :—

| Area.            | Kharif<br>1919. | Kharif<br>1920. | Rabi<br>1920. | Rabi<br>1921. | TOTAL.   |          |
|------------------|-----------------|-----------------|---------------|---------------|----------|----------|
|                  |                 |                 |               |               | 1919-20. | 1920-21. |
|                  | Acres           | Acres.          | Acres.        | Acres.        | Acres.   | Acres.   |
| Area sown ..     | 129,268         | 120,244         | 287,655       | 293,803       | 416,923  | 414,047  |
| Area matured ... | 121,073         | 111,325         | 279,998       | 258,855       | 401,076  | 350,180  |

Important crops of the two years compare as below: --

| Year.   |     |     | Cotton. | Sugarcane. | Wheat.  | Toria. |
|---------|-----|-----|---------|------------|---------|--------|
|         |     |     | Acres.  | Acres.     | Acres.  | Acres. |
| 1919-20 | ... | ... | 69,885  | 4,083      | 168,132 | 42,594 |
| 1920-21 | ..  | ... | 66,418  | 5,078      | 165,560 | 58,219 |

The poor prices for cotton probably were a cause of the decrease in area under cotton and the increase in that under cane: but the latter requires so much water and labour that it could not entirely replace the decrease in the cotton area. Experience of rotational closures during the winter and the inferior rains were probably what led to the decline in wheat and large increase in toria. The latter crop is not so hard hit by canal closures as in wheat. The kharif matured area bore the same proportion to the sown area (93 per cent. as the year before) but the abnormally dry winter of 1920-21 led to 12 per cent. failure of Rabi against only 3 per cent the year before. Rabi outturns moreover were below average as is only to be expected in a year which was almost completely dry from September till long after the cutting of the Rabi crop.

5. *Temporary Cultivation.*—Temporary cultivation continues to be one of the bones of this colony and presumably will remain so until all the allotable area has been given out, but things have been placed on a somewhat better footing with the assistance of the Irrigation Department authorities. A register has been established showing where land is available for allotment and can be provided with water. Applicants therefore do not have to go through the expensive process of obtaining *fa'als* from Patwaris. Twenty-three thousand and thirty-five acres were allotted this year but only 10,116 were sown.

This was partly due to the poor rains and poor canal water supply, but also to the fact that many of the temporary grantees had not the smallest intention of doing any cultivation themselves. They leased their temporary cultivation grants to abadkars in the Chaks concerned and the latter used the water for the temporary cultivation grants

or for their own permanent grants as suited them best. This at least had the advantage of preventing their being such a nuisance and so harmful to the regular grantees as they might have been. The assessment on these temporary grants was made by the Irrigation Department along with the permanently allotted lands. Collections were made by the Lambardars and paid in (generally speaking) on the due date fixed for the land revenue demands. No rents beyond the ordinary fluctuating land revenue were exacted, but in the course of the year in accordance with the new orders contained in correction slip No. 134, Land Administration Manual, dated the 7th September 1920, sanction was received from the Financial Commissioner to the imposing of a rent of 3 times the land revenue in addition to the ordinary land revenue and abiana and this will be paid on the temporary cultivation grants for 1921-22. There are no outstanding balances.

It is not yet certain whether the rent above mentioned will bring in as much money to Government as had been hoped, as temporary cultivation grantees have continued to let their lands to local abadkars and the latter have as before sometimes used the extra water instead of the extra land. The excellent state of land for germinating purposes resulting from the heavy monsoon of 1921, however, has caused many people to place large areas under crops and in accordance with the orders contained in the correction slip above mentioned, no temporary cultivation grant has been given out except on *bagaya* lands in excess of 10 per cent. of the total area of the Chak. The idea, however, that the intervention of at least one day between temporary cultivation leases will have any effect in preventing the growth of expectation of a permanent tenure (which it is laid down that a Deputy Commissioner must try to prevent, seems to me little more than a beautiful dream. Applications that temporary grants be made permanent continue to pour in; and I find that while I have been writing this an Indian Officer has been waiting in the hope that he will be able to induce me to make his father's temporary cultivation grant a permanent one. Consequently I change these grants annually and feel that there would be less waste of time and labour if they were allowed for 2 or 3 years at a time. One temporary grantee refused to give up his temporary cultivation grant and went

on cultivating it after the expiry of the lease. When his crops were confiscated he threatened to murder the 'Lambardar to whom they were entrusted and did not give up resistance until he was sent to Jail on the application of the Lambardar under section 107, Criminal Procedure Code. He also bombarded all superior officers with applications against the Colony Assistant simply because the latter (quite rightly) would not let him retain his temporary cultivation grant.

On the application of the Deputy Commissioner, Jhelum I set apart 100 fairly good squares of land on temporary cultivation for men belonging to that District for the year 1921-22, as he represented that they were in a state bordering on starvation; but hardly any of them has done any cultivation and most of them have leased the land as usual like other grantees.

6. *Receipts by way of Capital.*—No amount was outstanding at the end of the last year. During this year sites for houses and shops in Sargodha were sold by auction as under :—

| Detail of sites. | Area sold. | Total price. | Average price per acre. |
|------------------|------------|--------------|-------------------------|
|                  | Marlas.    | Rs.          | Rs.                     |
| Residential ...  | 197        | 136,050      | 111,054                 |
| Shops ...        | 71½        | 52,150       | 117,098                 |
| Mandi shops ...  | 79½        | 144,100      | 290,602                 |
| Total ...        | 247½       | 332,900      |                         |

The whole amount has been realized. In addition to this Rs. 150 were realized on account of price of a residential site sold in 1906-07. The recovery of the amount was not entered in any register, but as the mutation had not been entered in the name of the vendee he applied for that and on overhauling the registers it was found that the price had never been realized. The man was made to pay up with interest at the rate of Rs. 6-4-0 per mensem.

Rupees 6,500 were recovered for 6 squares sold last year by private treaty. The amount was due for future years and the vendee paid before the time fixed. No such sale has been made during this year. Rupees 2,195 outstanding last year on account of nazrana for grant of occupancy rights have been realized along with Rs. 2,507 due for this

year. Rupees 687 for acreage rate, on new allotments, has been realized.

No part of the enormous sums realised as the result of the sale of town sites is given to the colony towns as a regular arrangement. This is a good deal resented by the towns people; and in my opinion their grumblings on this score are not altogether unreasonable.

7. *Acquisition of Proprietary and Occupancy Rights*.—No proprietary rights were given during the year under report. Occupancy rights were given in 7 horse-breeding grants and in 110 *khata*s of other grants during this year.

8. *Mutation Cases*.—One thousand one hundred and fifty mutations were decided; 320 related to inheritance. Thirty-two cases were sanctioned in favour of widows. Last year's numbers were 1,218, 509 and 72.

9. *Settlement Proceedings*.—Orders have been received that Settlement operations shall begin in the Colony and in the proprietary areas irrigated by Lower Jhelum Canal.

10. *Village Sites*.—Ninty-eight *ihatas* for residential purposes and 36 for shops were allotted and 59 residential sites and 34 shops were confiscated. Last year's numbers were 99, 30, 51 and 10. The allotments were made chiefly to new grantees and to Kamins. Confiscations were mostly for not building and for misuse. Some shops were confiscated as the men to whom they had been allotted had left the *chaks*, in most cases after selling the materials of the buildings. Jamabandis of the village sites have been prepared and thus the records of village sites now stand on a better footing.

The panchayat system introduced in the two zails has proved fairly useful. More than 300 cases of *ihatas* and kamins have been decided by these panchayats. In a few cases in which the parties did not abide by the decisions of the panchayats, the Colony Assistant had to interfere. Perhaps it will be possible to extend the system to the whole Colony, but a detailed reference will shortly be made.

11. *Lambardars and Zaildars*.—These cases are now decided in accordance with the ordinary rules and the subject has no peculiar colony characteristics. There is great desire for the addition of Lambardaris, as with a few

exceptions there is only one Lambardar in each chak. Most of these Lambardaris carry a Lambardari square, and this is the great object in view. A Lambardar without such a square is always hoping that somehow he may be able to get one.

12. *Census*.—The census which was held in the year under report, has shown a general increase of population in the Colony. The figures for the towns are compared below:—

|                                | 1911. | 1921.  |
|--------------------------------|-------|--------|
| Sargodha (Municipality) ...    | 8,849 | 17,733 |
| Bhalwal (Notified Area) ...    | 1,629 | 4,092  |
| Sillanwali (Notified Area) ... | 990   | 2,227  |
| Phularwan (Notified Area) ...  | 863   | 1,926  |

The figures everywhere have been more than doubled.

13. *Towns and Markets—Phularwan*.—No big projects have been undertaken during the year. Rupees 1,521 were spent on some pavement of the bazar, Rs. 1,893 on the extension of the Lakar Mandi, Rs. 1,487 on the extension of the Tumtum Adda, and Rs. 1,792 on quarters for sweepers; but the town still needs a proper water supply and a drainage system. No share of the enormous sum of Rs. 2,91,560 realised for the sites sold in January 1920 has been paid to this town. I submit that a revision of the orders on the subject is required and that a definite share ought automatically to accrue to every town to enable it to keep pace with the demands for raised roads and drainage, which arise together with new buildings, and to help it towards the provision of a water supply and drainage.

The land boom has somewhat subsided and some purchasers have sold sites above referred to at a loss. But buildings have been put up on nearly all of them; some are ready and some nearing completion. The godowns are particularly useful.

The terminal tax has been sanctioned and is expected to bring in about Rs. 2,000 per annum. Phularwan is a flourishing colony town; but it has very little in the way of income from land.

*Bhalwal*.—The income (Rs. 36,170) was swollen by a grant from the Sanitary Board of Rs. 16,698-8-0 towards the much needed raising of streets; but this has not yet

been carried out. Houses have been completed on practically all of the sites sold in 1919; but there has been no fall in rents. Godowns for grain and cotton are the next requirements here and proposals will shortly be made.

*Sargodha.*— Sites for 24 bazar shops, 20 Mandi shops and 35 dwelling houses were sold during the year. Very large prices were realised and the total sale money came to Rs. 332,900; and the rates for—

|                      |     |          |    |    |           |
|----------------------|-----|----------|----|----|-----------|
| Bazar shops averaged | Rs. | 117,095  | 9  | 0  | per acre. |
| Mandi shops          | „   | 2,90,601 | 10 | 8  | „ „       |
| and dwelling sites   | „   | 1,11,053 | 9  | 11 | „ „       |

Rents are high and the sales attracted purchasers, many of whom also wanted opportunities for investments in real estates. But here again the Municipality's funds did not benefit while its responsibilities were increased. The proposal to build quarters for clerks has been approved by Government; and administrative sanction to build 40 quarters for Clerks and 20 for Chaprasis has been received, but no official communication has yet come about the funds. Orders on the proposal to sell sites for houses for people of small means are still awaited.

Sanction to sell 4 sites for the storage of dangerous petroleum and 4 for lightly constructed buildings for the making of fire works has been received. Infringements of the conditions of sale of sites are common; and the Municipality is a body not well adapted to looking after colony conditions. Owners of gardens are anxious to be allowed to use them for building sites; and I hope to be able to send up proposals for allowing them to buy such building rights.

Another storage tank was built during the year for the Municipal Water Works at a cost of about Rs. 35,000 but the much needed extension of the pumping and distribution system has not got further, and the raising of roads and provision of drains for Blocks 17 and 20 has not yet been done, though the houses are there and the sites were auctioned at various dates beginning with 10th July 1916. The Municipality's effort to tax itself more by means of an increased terminal tax have at least been sanctioned.

*Sillanwali.*—At Sillanwali there has been an income of Rs. 18,806 against Rs. 21,916 last year, and an expenditure of Rs. 6,385 against Rs. 79,932. The large sum spent

last year was mainly payment to the Public Works Department for the construction of the drainage works, which after many delays are now actually nearing completion. Proposals for the auction of 8 sites for rat proof godowns have been sent up.

The bazars at Hundewali and Shah Nikdur continue much as before. After a delay about bricks sites at the latter are being built upon. A pacca tank for the water supply was to have been constructed at the former place; but, as so frequently happens, the rise in rates made the thing impossible, and fresh correspondence is going on about it.

*General.*—The year was not a good one for trade; but factories did well and the colony towns are certainly flourishing. Two things stand in the way of their development. Firstly, the delay which always ensues about getting any project through. What with references to Sanitary Boards and Sanitary Engineers and the time taken in the passing of papers through the hands of overworked officers and clerks from the Municipalities up to Government and back, anything practical seems hardly ever to get done; for when, at long last, a project does come back fully sanctioned, the rates contained in the estimates are out of date and the local body concerned has to set to work afresh to raise a new loan or to get the Sanitary Engineer or the Public Works Department to cut down the cost of the project; and so it goes on. In July 1919 a gentleman offered to construct a cattle drinking tank at Sargodha free of cost; but the matter has taken so long to settle owing to various formalities that he has now withdrawn his offer. The second obstacle to progress is that, as mentioned above, towns do not get any fixed proportion of the proceeds from sales of new sites. I understand that blessings in the form of Government grants have been showered upon the towns of other canal colonies a good deal more freely than they have been upon those of the Lower Jhelum Canal; and now that the Financial Commissioner has himself recently seen the state of things in this colony, I hope to send up again the case for giving towns a fixed proportion. For even though a town may have received considerable grants in its earlier days, these are little likely to help it when later on its area expands and an extension of drainage and water supply become necessary. For example Sargodha has hopelessly outgrown its water supply installation; but the town is still

rapidly growing. The latest development is a return of the estimates for water works extensions with yet another increase in cost.

14.—*Communications*.—Rupees 44,495 have been expended on the repairing of metalled roads during the year and Rs. 3,761 on unmetalled roads. Now that the income of the District Board has been increased by the handing over to it of portions of the Zakhiradar and Darakhpal grants attached it is to be hoped that it will be able to spend more upon colony roads; and these are being pushed on. Metal has been collected for the Phularwan-Miana Gondal Road, but it has not yet been laid and consolidated. Motor transport has developed during the year to the great convenience of the public and to the great detriment of the metalled roads.

15.—*Miscellaneous*.—Thirty-one new Banks have been opened and 8 old ones have ceased to exist. The funds of the Central Bank amount to Rs. 383,640, of Union Banks to Rs. 20,808 and of other village Banks to Rs. 6,71,398.

*Schools*.—The Normal School has been transferred to Lala Musa. There has been no addition to High Schools and Middle Schools, but 4 Primary Schools have been added. Two out of 5 Girls' Schools have disappeared.

Rupees 580 were realised as fines for illicit cultivation.

Relations between the Revenue and the Irrigation Departments have been not quite so cordial as during the last two years; but I hope that this is only a passing phase. Complaints have been more numerous than usual, and probably a great part of this increase is due to the fact that the water supply during the cold weather of 1920-21 was unusually poor. The remodelling scheme, moreover, has thrown a lot of extra work upon irrigation and officers and also on Revenue Officers; and while it has benefited many, some of course have lost by it; a good many of these are inclined to voice their discontent by making wild charges against the Irrigation Department. In a good many cases where complaints of water supply were genuine, the Irrigation Officers have been able to make substantial improvements. It will be a great day when, if ever, these alterations of irrigation arrangements come to an end.

The proposal that a dairy farm should be established has been held up until all Military grantees have been dealt with. Now that the Regimental Stud Farms have been resumed and are being temporarily held by the Army Remount Department and Grass Farms Department, I venture to suggest that one of these farms might very well be set apart for a dairy farm and the other as a Store Cattle Dépôt. There is a great demand everywhere for good milk ; and if there were a good Government dairy near Sargodha, it would be possible to make the town rather more like the model town, which it ought to be, than the glorified farm yard, which it actually is. I am convinced, however, that the dairy farm should be a Government run affair and not a grant on dairy conditions. In my opinion grants on any sort of conditions should be reduced as far as possible. A dépôt for store cattle is wanted by the Military authorities ; and they have been consulting me about the establishment of such a dépôt in the Thal, of all places. It appears, moreover, that the establishment of such a dépôt may be open to misrepresentation on religious grounds, whereas if Government increases the supply of cattle by breeding them at its dairy farm and drafting the young stock into a supply dépôt that objection would be countered ; and the supply of cattle would indeed be increased.

Generally speaking the colony is very prosperous. The horse breeders, who not unnaturally dislike the primogeniture clause in their conditions, will only part with their grants for very high prices and many colonists have more money than they know what to do with. It is reported that marriages are seldom celebrated without *nautches*. Recently on the occasion of the marriage of his son a Ghoripal abadkar, who had not called in *nautch* girls, entertained the menials of 8 neighbouring chaks. On the occasion of another marriage of a very poor pair, the abadkars of the chak subscribed among themselves and sent for dancing girls from Sialkot.

The work of officers has been very heavy. Owing to the shortage of Extra Assistant Commissioners the Colony Assistant was given the Criminal work of 2 Thanas instead of that of only one which is his usual portion in addition to colony and revenue work. No officer was put on special duty to write a forecast report for the assessment

of the Lower Jhelum Canal area and an adjacent tract; so that this fell upon the overburdened shoulders of the Colony Assistant and [the Deputy Commissioner, who also had to wrestle with the work of the Reform Councils elections and the Census. The preparation of jamahandis of residential sites also took up a good deal of time of officers and Patwaris.

16. *Extensions*.—According to the canal projects irrigation is to be extended to two new chaks in non-Sobhaga tract, but to one of them (75 A. S. B.) it has actually already been extended for 1948 acres out of 2,142 acres. The other chak 91 A.S.B. to which the canal irrigation is to be extended is for the present reserved for a military grass farm. Remodelling has made good progress in the Sobhaga tract and irrigation of some lands hitherto uncommanded in the partially allotted chaks has become possible, besides extension to three new chaks.

17. *Establishment*.—The post of Colony Assistant still remains formally un-sanctioned though absolutely necessary. Chaudhri Muhammad Ismail held charge of it throughout the year. He has an excellent grip of his task and has done very good work.

H. H. JENKYNs,  
*Deputy Commissioner, Shahpur District.*

# LOWER JHELUM CANAL COLONY.

STATEMENT No. I.—ALLOTMENT, 1920-21.

## Lower Bari Doab Canal Colony.

### MONTGOMERY DISTRICT.

1. *Survey and demarcations.*—(a) The area brought under survey operations this year measures 136,975 acres. This includes 21,535 acres of proprietary land and 115,440 acres of Government waste land lying on S/R and H plot near Wan Radha Ram.

(b) Jamabandis of the following villages were prepared this year :—

|             |     |     |     |              |
|-------------|-----|-----|-----|--------------|
| Proprietary | ... | ..  | ... | 36 villages. |
| Colony      | ... | ... | ... | 99 do.       |

This brings up the total up to—

|             |     |     |     |               |
|-------------|-----|-----|-----|---------------|
| Proprietary | ... | ... | ... | 155 villages. |
| Colony      | ... | ... | ..  | 167 do.       |

The 36 proprietary villages under report had already been brought under rectangular survey.

2. *Conditions.*—No new statements of conditions under the Colony Act were published during the year. Including land purchased in auction 1,005 acres were resumed for non-observance of conditions and 1,079 acres were restored to offenders who showed a desire to amend their ways. The granting of occupancy rights which is now progressing rapidly will probably stimulate the homing instinct in the abadkars of the Rawalpindi Division. An occupancy tenant is not of course excused from residence any more than a tenant-at-will, but I have no doubt that many who have "*non sine pulvere*" attained to that status will think otherwise. The Colonization Officer is now authorized to excuse from residence on their grants those of the military grantees whose position in their home districts is such as to make the insistence on residence here a very real hardship. This discretion has been exercised only in two or three cases so far.

Provided suitable arrangements are possible it would be wise to exercise this discretion leniently in the case of military grantees whose real homes are at a distance.

A. ELLIOTT—7-12-21.

The landed gentry and reward grantees are from a Colony point of view no more and no less satisfactory than

in former years. Their grants display all the evils which everywhere wait upon absentee landlordism. Their tenants are still often miserably housed, their agents are men of no standing and the grants not unnaturally bring to their owners a far smaller income than they should bring. One

When they express a desire to sell out it would be for the benefit of the tenantry to encourage it.

A. ELLIOTT—7-12-21.

of the various grantees of farms on special conditions do not call for much comment. Chaudhri Allah Dad's cattle farm still lags behind the others. This is more his misfortune than his fault. Sardar Datar Singh

The breeding of fowls will be worth watching and learning lessons from Sardar Datar Singh's idea is to do it on a considerable scale.

A. ELLIOTT—7-12-21.

has started his dairy farm near Montgomery. The venture has distinct possibilities. When the marmalade factory and the fish-hatchery are in working order the Colony will be well provided with amenities. These grants however have not been taken up yet. The grantee of a fruit farm has taken up his grant and, it is said, an appointment under the Government of Bombay. The matter, I believe, engages the attention of the Agricultural Department. All special grants seem to have received more supervision this year from the various departments which are primarily responsible for their existence. This relieves the Colonization Officer of a task for which he is obviously not fitted.

The condition of things in the villages held by nominees of the Protestant Missionary bodies deserves some notice. These men hold as tenants of Government until such time as they shall have paid for their land. The instalments are spread over thirty years. The state of these villages is miserable. Their land is average yet they are four or five times as deeply in debt as the ordinary abadkar. Hardly any have paid up the instalments due last July and some are still in default in their January instalments. The fact is that while these people are drawn from much the same classes as the proteges of the Roman Catholic Missions, the Salvation Army and the Arya Megh Udhar Sabha, the tenants of the latter bodies are kept much more closely "*in statu pupillari*" and are not the direct tenants of Government. They

are well looked after and are doing quite well. I am informed that the Protestant Missions desire to inculcate habits of independence. But one must walk before one can run and these people are not fit to be out of guiding strings. In most cases their land is now liable to resumption. It is worth considering whether it would not be advisable to

It is a matter which will require full consideration with the Heads of the Missions concerned. But I think it is inevitable that we shall have to take steps, and probably on the lines proposed.

resume it '*en bloc*', and to reallocate on 'abadkari' terms. We could then weed out the weaklings. The money already paid could either be refunded or a deduction could be made in the amount to be paid eventually for proprietary rights.

A. ELLIOTT—7-12-21.

It has been a task of the greatest difficulty during the last year to realise outstanding instalments of the price paid by auction-purchasers for their land. The land boom began in 1919 when the average price rose from Rs. 331 per acre to Rs. 493. This was followed by a further rise to Rs. 593 in 1920. Men who paid these prices had this year to pay up their third and fourth or first and second instalments accordingly as they bought in 1919 or 1920. Kharif 1920, rabi 1921 and kharif 1921 have all been poor or bad harvests. Thus those who relied on their crops to pay at any rate the interest on the money they would borrow to meet their instalments are in a desperate plight. There is no need to shed many tears over the speculating bannia who has been caught napping, but the position of the very many small zamindars who bought land to cultivate themselves is quite different. For two villages, where ridiculous prices were paid for poor land, I obtained permission to postpone the first demand from January 1921 to January 1922. In the hope, which has proved vain that the kharif crop would fulfil expectations and enable instalments to be paid, I have so far shut my eyes to the many defaulters in the July instalment. The objections to altering *ex post facto* the terms on which land is to be paid for are legion and unarguable, but enforcement of the conditions of sale and consequent confiscation of the land sold cannot produce rupees from pockets which, unless I am much mistaken, are really empty.

3. *Allotment.*—The following table shows under the various heads the area set apart in the revised scheme of Colonization, the area.

Statements Nos. I and II.

actually allotted on 30th September 1920 and areas earmarked for distribution :—

| Head.                                                                 | Distribution according to revised scheme of Colonization. | Actually allotted up to 30th September 1921. | EARMARKED.                              |                                     |                                      | Total allotted and earmarked. |

\* The figures under this head include 2,816 acres handed over to Agricultural Department for experiments in "bara" land, which is now for the first time included under this head.

(a) Marmalade Farm. Fish Hatchery. Fruit Farm.

(b) Includes 25,877 acres allotted to lambardars and village menials and 24,844 acres held on 10-year horse-breeding leases.

(c) Includes 10,708 acres on tree-planting terms. Punjab Government notification No. 23591, dated 5th November 1919.

Includes 7,888 acres on 'inferior land' terms. Punjab Government notification No 22032, dated 15th September 1920.

(d) Not included in the revised scheme.

The following are the allotments made during the year :—

|                                                                         | Acres  |
|-------------------------------------------------------------------------|--------|
| (a) Sold by auction or private treaty ...                               | 2,694  |
| (b) Special Agricultural objects ...                                    | 499    |
| (c) (1) Horse-breeding tenants ...                                      | 81,496 |
| (2) Horse-breeding leases ...                                           | 24,844 |
| (3) Lambardars and Kamins ...                                           | 1,189  |
| (d) and (e) (1) Hereditary Agriculturists and<br>compensatory grantees. | 6,077  |
| (2) Tree planting tenants ...                                           | 8,956  |
| (3) "Inferior land" tenants ...                                         | 15,777 |
| (f) Depressed Classes ...                                               | 1,132  |
| (g) Reward grantees ...                                                 | 637    |
| (h) Landed gentry ...                                                   | 345    |

Total ... 143,646

There have also been allotted 2,036 acres to tenants of "bara" land under the Agricultural Department's supervision. This allotment is outside the revised scheme and is made on the conditions given in Punjab Government Notification No. 22031, dated 15th September 1920.

(i) *Auction*.—Two thousand five hundred and ninety-one acres were sold by auction in April. The average price was Rs. 303 per acre as against Rs. 593 last year, but the land was considerably inferior. Land of average quality fetched just under Rs. 400 an acre. It is very hard to arrive at a general conclusion as to cash rents in the Colony since land varies so tremendously; but as far as I can make out average land bought for Rs. 400 an acre would pay about 4 per cent.

(ii) *Agricultural objects*.—The allotment under the head "Special Agricultural Objects" represents Sardar Datar Singh's Dairy Farm near Montgomery.

(iii) *Rewards and Landed Gentry*.—All outstanding obligations under the heads "Rewards" and "Landed Gentry" have been discharged. The balance shown as earmarked is land of which possession has been taken or orders for taking possession issued but in respect of which no actual allotment order has yet been written.

(iv) *Depressed classes*.—The allotment to depressed classes represents land taken over by the Deputy Commissioner, Criminal Tribes. He has still to take over one more village to complete his allotment.

(v) *Military peasants*.—The year has been mainly taken up in the allotment of land to the military reward grantees. The figures given in the table above show the area which has been allotted up to date but actually grantees for about 139,000 acres out of the 178,000 to be found have been put in possession or sent for to take possession. This total includes allotments made in exchange outside the Colony as follows:—

- (a) Upper Jhelum Colony the equivalent of 178 rectangles;
- (b) Lower Jhelum Colony the equivalent of 34 rectangles;
- (c) Other districts the equivalent of 15 rectangles; or 5,675 acres in all.

There remain to be found about 39,000 acres, and it is somewhat of a problem to know where they are to come from. The land in the Colony which will be available for distribution before 30th September 1922 amounts to about 13,000 acres. Two proposals have been made and are now under the consideration of Government: firstly, that the villages formerly held by Cavalry regiments as horse-runs should be utilized for military grants, and, secondly, that exchanges should be allowed into any part of the Lower Jhelum Colony. The first scheme will provide about 12,500 acres in this Colony for distribution and should exchanges to the Lower Jhelum Colony be sanctioned I estimate from requests already received that the grantees of about 13,500 acres will take advantage of the permission. The position at present is extremely difficult for all concerned. Most of the grantees were given their Sanads in August 1920 and those who have not yet received land are not unnaturally becoming anxious and giving their Commanding Officers a good deal of trouble which is again passed on here.

The situation was aggravated by an unfortunate muddle over the question of exchanges to Shahpur. On the assumption that exchanges were allowable notices had been sent out to all men who desired exchanges to report at Sargodha early in May. Subsequent orders restricting exchanges to the Sobhaga tract were received too late to stop the grantees who turned up at Sargodha, and to their intense disgust were offered what they considered worthless land. Only a few have accepted land in the Sobhaga tract. The actual details of allotments have been more complicated than I expected. The new villages contain the best land, and it was obviously unfair not to give every class its share in them. But the colony is predominantly Muhammadan, and, except in newly opened villages, it is very difficult to find suitable places for all the different sub-divisions of Sikhs and Hindus who have received grants. This has been one of the difficulties. In very many cases more men than one from one family have received land. The lists sent to me contained no indication of this. The readjustment of original allotments which had ignored the relationships among the grantees has not always been easy. Land in the Colony is notoriously patchy and there was considerable heart-burning over unavoidable inequalities in the value of grants. The comparative failure of both the kharif and rabi harvests also made average land look

very poor, and it has been very difficult to induce soldiers to remain on land which is near the border which divides fair from inferior. In some cases where the only reason for changing an otherwise satisfactory allotment was the quality of the land, I have satisfied the objector with a grant of a few extra acres of inferior land to supplement his original square.

I should like to record my gratitude for the general spirit of reasonableness shown by the grantees and their much tried officers.

(vi) *Hereditary Agriculturists and Compensatory grants.*—Allotment to hereditary agriculturists and compensatory grantees on ordinary terms represents a continuation of the process of correcting previous wrong classification and an increase in the size of grants in some villages. These extra grants have always been made from inferior land not fit for ordinary allotments.

(vii) *Tree planting grants.*—During the year the allotment of land on tree planting conditions was practically completed, though as formal allotments have not in all cases yet been written the figures in this report do not represent the total area which will be held on these terms. Allotment up to 12,500 acres was sanctioned, to be debited to the head "hereditary agriculturists and compensatory grantees". I have tried as far as possible to fit hereditary agriculturists into these grants, but as it is desirable to preserve the homogeneity of villages only about fifty per cent. of the grantees really answer to this description. Where the selection of a Central Punjabi was undesirable I have taken the most suitable man available. I have been deluged with requests for these grants, especially by *ex*-soldiers. The great majority of the grantees are those who before held no land in the Colony. The hereditary agriculturists I have taken from the ranks of those who have been cultivating in the Colony whether as temporary lessees or as partners of *abadkars* or as tenants; the others who include a large number of *ex*-soldiers I have selected from among the numerous applicants. In some cases I have taken the opportunity of rewarding good work in Colonization and of fortifying the position of men who have given proof already that in them the Colony is finding its natural leaders. This is the last opportunity which will arise for giving effect to the recommendation of the Colonies Committee (Chapter XIII, paragraph 6) that areas should be reserved in the beginning from allotment in order to improve the

status of such men. Grants vary in size from a half to two squares. A good many of the grantees will, I fear, fall by the way, since the land is below average in the majority of cases, all squares suitable for ordinary allotment having been earmarked before the tree planting squares were selected. However, at the worst there will be a very great increase in the number of roads planted. The Multan District Board has recognised the value of the property they will acquire in these avenues and has appointed a qualified Arboricultural Assistant. The Montgomery Board meditates a similar step.

(viii) *Half resumable grants.*—The allotments under the conditions published in Punjab Government Notification No. 22032, dated 15th September 1920, commonly known as 'half resumable' grants are debited to the head "hereditary agriculturists and compensatory grantees" to the extent of half the allotments made, the remaining half not being reckoned for budget purposes as land finally allotted. Here again, since the inferior land is not in separate villages but scattered here and there, it is impossible always to select the true Central Punjabi agriculturist. As a class he will probably come in for about 50 per cent. of the total. During the year sanction was received to allot 54,000 acres on these conditions. The selection of land suitable in quality and irrigational facilities has been a lengthy task, but it is now complete and allotment will be made during the coming winter. There is no lack of applications for grants.

Grants of 2,500 acres of inferior land have been sanctioned in favour of certain village Co-operative Societies of the Central Punjab. The Society will select and send the colonists here. It will be interesting to see how far this method of selecting colonists proves a success. It is hardly doubtful that the ordinary zamindar, be he stout-hearted and possessed of some resources to tide him over the first year, can successfully reclaim 'inferior land,' that is to say, Gasra Kallar Amez, Kalrathi, Gasra tibbidar, weak maira and the less virulent forms of 'bari,' and I interpret the existing orders about "half resumable" grants as restricting grants to two squares. It is worth consideration

A case of this kind has been sent up for consideration.

A. ELLIOTT—7-12-21.

whether the bigger man, capitalist or zamindar cannot usefully be given an opportunity to try his hand at the reclamation of land which the small man might hesitate to tackle.

(ix) *Horse-breeding Scheme*.—The long delayed horse-breeding scheme started during the year. In the early spring an officer of the Army Remount Department, Captain E. H. Howe, was posted to the Colony to begin operations. It was not only impossible to allot all the 3,400 "service" rectangles at once but also very undesirable, since it would flood a very restricted market with thousands of men all wanting mares and ready to pay anything for them. The inevitable result would be sky-high prices. It was decided therefore to aim at having about 1,000 or 1,200 mares in the Colony by the end of the year and to group these round a few centres, Renala, Okara, Montgomery, Chichawatni, Kacha Khuh and Jahanian, leaving the outlying districts to be taken up later. The Army Department had no funds with which to build stallion stables but local enterprise stimulated by the grant of temporary cultivation has produced sufficient "kacha" stabling to enable a start to be made. It was obvious from the first that the rumour that ghoripal morabbas were shortly to be distributed would send every competitor into the market for a mare. Many of these purchases would probably be unsuitable. Accordingly proceedings started with the announcement that the possession of a mare was no guarantee of a square and that the Army Remount Department would do its best to provide mares at reasonable prices for successful competitors. This had a good effect.

The proportion of 'service' squares to 'horse-breeding' peasant colonists is 1 to 4.5, but since none of the newly opened military villages have any service squares at all the actual proportion in the villages where there are service squares is about 1 to 2.3. The method of distribution was for the competitors to appear before Captain Howe and myself with whatever in the way of horseflesh they possessed. We then first noted the class of animals each man was accustomed to keep and the condition in which he kept them. Anyone who produced a mare which could be passed and branded would, if the animal was of his own breeding or if he had possessed it for a reasonable length of time, get his square then and there the remaining candidates were allowed to urge their claims and by a process of elimination the required number was selected.

Occasionally we had to have recourse to lots, but this was not very popular. When a village was prepared to

select its own horse-breeders we allowed it to do so. On the whole, keen though the competition was, the decision was generally accepted with a good grace though in one Shahpur village torn by the usual Salt Range feuds the women of the unsuccessful competitors refused to cook them any food that evening.

We refused ever to recognize more than one person out of a family as tenant of the service square and responsible for the mare. This caused some heart-burning but is an absolutely essential rule. The service squares were allotted on temporary cultivation to the successful competitors who were within six months to produce a mare which the Remount Officer would pass. Until a mare is passed no permanent allotment is made. Altogether 996 horse-breeders have been selected up to date of whom 855 have so far produced a suitable mare. It seems that the immediate supply of mares at a reasonable price is exhausted, and now that a start has been made I think it would be wise to recognise that there is a definite limit to the number of mares which become available yearly and to go slow.

4. *Cultivation of the permanently allotted area.*—

Statement No. III.

The total area sown on land permanently allotted was 500,967 acres as compared with 489,721 acres last year. The percentage of 'kharaba' given rose from 7.9 to 24.06. This was almost entirely due to the shortage of water during last winter which resulted in a wheat crop of probably 50 per cent. below normal. I should like to pay a tribute to the way in which the Canal Officers met the situation. In spite of a failure of crops almost universal the arrangements made for giving kharaba were so satisfactory that complaints from zamindars were conspicuous by their absence. The Superintending Engineer, Mr. M. S. Dhody, kindly agreed to have the kharaba percentage in each village reported at once to the Colony Officer in charge who compared it with the revenue girdawari. When there was a difference of less than ten per cent. between the revenue and canal estimate for a village no further action was taken. If the difference was more than 10 per cent. a re-survey of kharaba took place. The general satisfaction throughout the Colony amply repaid the extra work which this procedure involved. There was a slight falling off in the area under Punjab 11, 63,119 acres against 67,262. This was due to general reduction of the area under wheat owing to unfavourable conditions at the

time of sowing. The area under American cotton rose from 192,865 acres in kharif 1919 to 225,399 acres in kharif 1920. This was the natural result of very high prices which obtained in the winter 1919-20. The acreage however fell to 185,048 in kharif 1921, a decline to which the bad harvest of 1920 and the slump in cotton prices both contributed. There can be little doubt that we shall see a further fall next year since the present cotton crop is unlikely to be more than eight annas over a considerable tract of the Colony. This is an anxious moment for the future of American cotton in this Colony. The trouble is not pests, it is, in my opinion, the climate. A hot dry wind in September and October seems to be usual in this part of the world. Last year this wind completed the damage that the severe hot weather had begun; this year it caught a crop outwardly looking magnificent, but in fact lacking in stamina owing to too rapid development in July and August after a May and June in which it made little progress. The result was a sudden check to fruit production and almost complete failure of the first picking. An additional factor was the fact that the crop looked so well up to September 15th that zamindars used for toria and rabi preparations the water which might have saved the cotton. Sugarcane is increasing in popularity. During the fodder scarcity in last spring it sold at fabulous prices for feeding to stock and this summer there are few zamindars who have not put down an acre or so. The yield is said to compare favourably with that in districts where it is extensively grown. One comes across potatoes here and there, but as they do not appear to succeed as a summer crop and are seriously affected by any shortage of water when grown as a winter crop, they do not appear to have a great future in the Colony.

The few colonists who have tried indigo have profited by their enterprise. It seems to be a crop which might be encouraged in order to support cotton which is a risky crop on which to base the entire prosperity of the Colony. Agriculturally indigo has the advantage of being free from pests. It is nitrogenous and off the ground in time to allow a wheat crop to be sown. The only question is whether economically it is good policy to advise zamindars to sink money in tanks. At present the price is good, but the competition of synthetic dyes will probably soon have to be reckoned with again.

Taking into consideration that we have had three successive bad harvests the cultivation of inferior land permanently allotted is quite encouraging. Where cultivators are sufficiently enlightened (and energetic) real progress is being made. There are obstacles in the way of giving these lands as frequent waterings as they need but chaks should certainly be kept as small as possible. Green manuring, with any sort of crop and particularly with 'San' hemp appears to be the best system of reclamation. The great difficulty is to induce the grantees to go slow and not to try to produce crops for which the land is not yet fit.

It is satisfactory to be able to record that the share of the Lower Bari Doab Colony in the 'rabi' supply of the Triple Project Canals has been increased. The Canal Department is also taking in hand a much-needed revision of the size of irrigation chaks and the provision of 'pukka' outlets.

5. *Temporary Cultivation.*—The area leased to temporary cultivators this year was, kharif 1920, 464,855 acres, rabi 1921, 272,247 acres. Of this 260,475 acres were sown and about 70 per cent. matured as against 86 per cent. last year.

The income from malikana (on all classes of land)

\*In this year's total Rs. 1,75,723 is included which should have come into last year's total. The actual decrease in receipts is therefore Rs. 3,56,043, which represents partly decreased rates, partly decreased area allotted on temporary cultivation and partly 'Kharaba' remissions.

was Rs. 9,34,310\* as compared with Rs. 9,88,907 last year. The rates which the Colonization Officer may fix range from Rs. 2 to Rs. 16 per matured acre. In November 1920 the disappointing cotton harvest and the slump in prices compelled me to re-examine the rates which had been fixed several harvests

before and not subsequently revised. I came to the conclusion that they were, as a rule, pitched too high except for harvests, where both outturn and prices were good and accordingly reduced them to a scale which ranged from Rs. 2 to Rs. 10. 'Kharaba' remissions do not effect bad prices; they should of course in theory counterbalance low returns but, since no remission is given for instance for an eight anna crop and since the agency of assessment is human and liable to err, in practice the remission given frequently does not represent the extent to which the crop has failed.

The kharaba system is very unsound in that it puts a premium on waste of water and slovenly cultivation: it is also largely ineffective except for a really bad crop.

There is certainly material available on which to base a system of differentiated water-rates. In one village the water rate for wheat may be as much as one-sixth of the gross value of an average crop. In another it is perhaps one-twentieth or less. Even where water distribution is perfect, which as yet it is not, there will be a large area in this Colony which for years will not be able to pay full rates and will require the continuance of the kharaba system with all its disadvantages. But once it is realised that what is an eight anna crop in village A is a sixteen anna crop in village B and this fact is recognised by different schedules of rates for the two villages the necessity for kharaba remissions largely disappears.

6. *Receipts by way of Capital.*—Demand for the year under report on account of land auctioned or sold amounts to Rs. 24,70,844, as compared with Rs. 30,31,458 for the last year. Out of this sum only Rs. 17,34,338 has been recovered. The balance Rs. 7,36,506 is still due; part of it is irrecoverable being the sum due from purchasers whose land has been resumed. The greater part represents overdue instalments for rabi 1921, which are expected to be realised during the present financial year.

7. *Acquisition of Proprietary and Occupancy Rights.*—Proprietary rights were granted in area of 4,093 acres acquired by purchase. Occupancy rights were granted in 75,861 acres making a total so far of 132,352 acres.

8. *Mutation Cases.*—The number of mutation cases decided during the year under report was 1,516, as compared with 1,792 last year.

9. *Settlement Proceedings.*—Nil.

10. *Village Sites.*—Building was started in 107 new villages during the year and the number of estates in which villages have been or are being constructed is now 674. There are 389 completed village wells and many under construction.

Villagers have had considerable difficulty in finding honest and competent contractors. Tree-planting on village sites was hampered by the very unfavourable season. But the number of pukka houses, mosques, dharmshalas and guest houses gradually increases. The military grantees are slow to settle down but when they do they show (especially the Indian officers) a disposition to construct dwelling on a scale

somewhat superior to that which the ordinary abadkar has so far favoured. I have not yet been able to start the panchayats of Indian officers proposed in paragraph 10 of last year's report, but hope to make a beginning this winter.

11. *Lambardars and Zaildars.*—Forty-three new lambardars were appointed during the year. The total number of permanent lambardars is now 1,155. It is now possible to see what form the Colony zails will finally assume, and steps are being taken to revise the existing temporary zails.

The work of rural officials has been on the whole satisfactory, but it is still impossible to get information on the subject of crops or local politics until one has refused the inevitable request for more land. I have taken the opportunity while distributing 'darakhtpal' grants to reward zaildars and others who have done good work and show signs of becoming local leaders.

In military villages the competition for the post of lambardar is of the keenest and the selection of the right man difficult in the extreme.

12. *Census.*—The census was completed during the year. The total population of the Colony is 402,803 made up of 222,343 males and 187,460 females.

13. *Towns and Markets.*—The following table shows the progress made with the construction of the four towns of Chichawatni, Mian Chanun, Khanewal, and Jahanian which are in the Colonization Officer's charge:—

| TOWN.            | MANDI SHOPS.           |                              | BAZAR SHOPS.           |                              | COMBINED SHOPS.        |                              | RESIDENCES.            |                              | FACTORIES.             |                              | FLOUR MILLS.           |                              |

\*A. Mian Chanun five residential houses converted into combined shops and residences.

The year under report has been for the mandis one of stagnation. A short wheat crop provided little stimulus for a market depressed by the collapse of cotton prices. Many merchants closed their mandi shops and the bazars of the towns have throughout the year done little business. In consequence of this state of things I held no auctions of building sites in any of the towns. Four sites for bungalows in the Civil Station at Khanewal were sold at a price of Rs. 1,000 an acre.

The dispensaries at Khanewal, Mian Chanun and Chichawatni are fully justifying their existence and at least in the first two towns in-door accommodation is necessary. The new serais have proved white elephants. Hardly any one uses them and no one will pay anything for the contract for arranging for travellers. In future Colony towns the serai should be as near the railway station as possible. At present the main work in progress in the towns is the construction of roads. The preparation of drainage schemes is in hand. The first to be taken up will be Mian Chanun which was again visited by floods during the summer.

As far as Khanewal, Mian Chanun and Chichawatni are concerned the present check in their rapid progress is only a case of "*reculer pour mieux sauter*." About their prosperity there can be no doubt. The future of Jahanian however is still uncertain. The town shows no signs of making a start and is completely moribund. It is unfortunate in its lack of railway facilities, having only one train a day each way, the station lacks accommodation for goods traffic and the resources of the Posts and Telegraphs Department have not yet been equal to providing the long promised telegraph office. The Multan District Board is about to metal one of the main approach roads to the town. This may have a stimulating effect on the mandis, but I do not hope for much until at least a shuttle train to and from Khanewal is put on. In none of the towns has the mandi goods platform been completed, and at Khanewal it has not even been begun.

The Notified Area Committees of Khanewal and Mian Chanun have been strengthened by the addition of more non-official members, and the Secretary of the Khanewal Committee is now a member of the local Bar. Proposals to increase the scope of the terminal tax are being submitted

to Government and the possibilities of a house property tax are being explored. The maximum share of the sale proceeds of sites which may be credited to each town has lately been increased from 3 to  $4\frac{1}{2}$  lakhs and when the proposed new taxation takes effect the financial position of the towns will be quite satisfactory.

14. *Communications*.—The following table shows the work done on metalled and unmetalled roads in the Multan, and Montgomery portions of the Colony :—

| District.      | Alignment of road. | Dagbelling of roads. | Jungle and sand clearance. | Earth work. | Metalled road. |
|----------------|--------------------|----------------------|----------------------------|-------------|----------------|
|                | Miles              | Miles                | Miles                      | Miles       | Miles          |
| Multan ...     | 34                 | 40                   | 37                         | 57          | 5              |
| Montgomery ... | 61                 | 61                   | 41                         | 53          | 6              |
| Total ...      | 95                 | 101                  | 78                         | 110         | 11             |

The metalling of the approach roads to the mandi towns is very necessary. There are welcome signs of activity on the part of both the District Boards concerned.

The matter has since been taken in hand.

A. ELLIOTT—7-12-21.

15. *Miscellaneous*.—No new police station was opened this year, but as H plot leased out to Rai Bahadur Ganga Ram will soon be brought under cultivation, another thana will soon be needed in Okara Tahsil. Only one cattle-pound was built this year bringing the total up to 30.

Seventy-three new chawkidars were appointed. The total number now is 624.

Only three post offices were opened this year which brings total up to 68. More are needed and have been asked for.

Nine more schools were opened this year. The military officers on 2-L and 1-L responded handsomely to an appeal by the Deputy Commissioner for subscriptions. The amount realised has been placed at the disposal of District Board and will be utilized for schools in Okara Tahsil. Total number of Patwardhanas comes to 113.

The Colony Agricultural Society continues to flourish but agricultural progress is very slow. Sardar Charan Singh, Extra Assistant Director of Agriculture, does all he can but the Colony needs more agricultural officers. The question of the difference in climatic conditions between this Colony and Lyallpur deserves more attention than the staff at the seed farm at Montgomery can give. I asked the Agricultural Department to try and introduce the system of taking over part of a zamindar's holding and working it with his labour but with improved implements and proper methods. In two or three places this is now being done. I believe one such demonstration plot in every zail would have excellent effects.

16. *Extensions.*—In the year under report the following projects are sanctioned by the Canal Department.

*Lift.*—H plot south of G plot proposed to be irrigated by double lift from one of the lift channels of Dhonwala feeder, area 24,524 acres.

|                            |     |              |
|----------------------------|-----|--------------|
| <i>Flow.</i> —Okara Forest | ... | 1,338 acres. |
| 2-R.A.                     | ... | 7,231 acres. |
| Extension of 2-R.          | ... | 1,275 acres. |

17. *Establishments.*—The superior Colony staff was unchanged throughout the year. There was a change at Chichawatni where S. Nur Shah succeeded M. Nazir Ahmad as Colony Tahsildar. M. Nazir Ahmad who has gone on furlough and will probably not return to service had served long in the colony which owes him a debt for much enthusiastic work especially in regard to the reclamation of bad land.

For the rest, what with a census, two bad harvests and the military reward grantees, the whole staff of the Colony was thoroughly overworked. I would like especially to record my appreciation of the work of the Assistant Colonization Officer, Khan Sahib Munshi Rajab Ali, and the Sub-Divisional Officer, Khanewal, Rai Sahib L. Dharu Lal. The latter received a well-deserved title in the course of the year.

F. H. PUCKLE,  
Colonization Officer.

# LOWER BARI DOAB CANAL COLONY.

# Upper Chenab Canal Colony.

## SHEIKHUPURA DISTRICT.

1. *Survey and demarcations*.—No survey or demarcation was made during the year under report.

2. *Conditions*.—No new statement of conditions was issued during the year under report.

3. *Allotment*.—At the close of the last year there was an unallotted balance of 12,677 acres of land, out of which 3,679 acres were distributed during the year under report as follows:—

Statements Nos. I and II.

- (1) *Four hundred and eighty-six acres*—Restored to various abadkars. Their grants were confiscated for breach of the condition of residence. They have now settled down.
- (2) *One thousand, nine hundred and ninety-five acres (or 80 rectangles)*—distributed to holders of small holdings in villages adjoining the Colony Chaks. This area represents 80 rectangles referred to in paragraph 3 (vi) of last year's report.
- (3) *Fifty-four acres*—Sold to Pandit Kaka Ram, retired Tahsildar.
- (4) *Twenty acres*—Sold to Khan Bahadur Bakhshi Gazanfar Ali, retired Extra Assistant Commissioner.
- (5) *One hundred acres*—Sold to Chaudhri Roshan Din, Zaildar, Marh Bhangwan, by private treaty.
- (6) *One thousand and twenty-four acres*—Leased out to S. Gurdit Singh and others for irrigation by means of tube-wells.

*Total allotment 3,679 acres, deduct 1,032 acres*—Resumed as per detail below:—

Fifty acres from Abdullah abadkar of Chak No. 26, Upper Chenab Canal, for breach of condition of residence.

Nine hundred and eighty-two acres on account of lambardari and *tamins'* grants shown as allotted in last year's report but which were given on temporary cultivation and should not have been shown as allotted.

Net balance allotted ... 2,647

or 12,677 (balance shown in column 7 of the last year's report) minus 2,647 (allotted during the year) = 10,030 as shown in column 7 of the statement for the year under report.

4. *Cultivation of the permanently allotted area.*—

Statement No. III.

During the year under report an area of 11,123 acres was cultivated during Kharif 1920 and 6,794 acres in Rabi 1921 as compared with 10,435 and 5,796 acres in the corresponding period of last year, showing an increase of 688 and 998 acres (total 1,686), respectively. This increase is due to the following causes :—

- (a) The Colony Officers have been making great efforts to persuade the abadkars to stick to their lands and improve their grants. In number of cases abadkars who were found to have been absent were fined.
- (b) The number of wells is rapidly increasing in the Kharif Channel Chaks. Seventy-one new wells were sunk during the year and 22 are under construction. This number (71) is about four times the number sunk last year.
- (c) Besides the two kilns at Kala Shah Kaku and Marh Bhangwan, the abadkars have set up six Zamindara kilns and bake their bricks successfully and comparatively cheap. The people have realized that it is impossible to be prosperous in these Chaks unless wells are sunk.
- (d) (i) Experience has shown that the silt bearing canal water does more good to this soil than the well water. The Rabi crop was not good.
- (ii) Water-logging (Sem) has commenced in Chak No. 19 and the abadkars have returned the sum of Rs. 3,000 taken as takavi for the construction of wells.

(iii) Water-lifting machines have been fixed on Rajbah Mahan Devi and other people, whose irrigation is affected by these machines, are rightly complaining of the consequential diminution of canal water as compared with last year. There is a great scarcity of water in Chaks Nos. 5, 34, 39 and 40 and the condition of Chak No. 5 is specially bad.

(e) If canal irrigation in the Kharif Chaks could be continued up till the end of October, instead of being stopped on October 15th, it would make a great difference to these villages as they would then be able to sow some Rabi crops.

5. *Temporary cultivation.*—(a) During the year under report 3,482 acres were given out for temporary cultivation, but of this only 1,296 acres (Kharif 828, Rabi 468) were actually cultivated, as compared with 1,182 acres (Kharif 880, Rabi 302), during the previous year. The causes of this increase are explained under head 4.

(b) No scarcity of tenants is felt at present.

6. *Receipts by way of Capital.*—Statement No. 4 is attached to the report. It shows the receipts by way of capital and the balance due.

Statement No. IV.

7. *Acquisition of Proprietary and Occupancy Rights.*—Proprietary rights were granted in respect of 307 acres as given below :—

25 acres to Zulqadar Khan.

137 acres in Chak No. 7 to Mangal and Lehna Singh.

145 acres in Chak No. 8 to Bakhshi Ghazanfar Ali and Jalal-ud-Din.

8. *Mutation Cases.*—The mutations attested during the year are detailed as under :—

|                          |     |     |       |
|--------------------------|-----|-----|-------|
| By Revenue Assistant     | ... | ... | 12    |
| By Colony Naib-Tahsildar | ... | ... | 22    |
|                          |     |     | <hr/> |
| Total                    | '   | ... | 34    |

9. *Settlement proceedings.*—No remarks.

10. *Village sites* —(a) The abadkars have mostly constructed their residential ahatas. The village bazars are in good condition. The planting of trees in the Chaks is receiving attention. When the canal closes in the winter season, people in the Kharif Chaks water their seedlings from the drinking wells in some places where the land is good, other kinds of trees than kikar are planted, but generally speaking kikar is the only tree which finds the soil congenial in the Colony. The total number of trees so far planted in the Colony is—

|             |     |     |       |
|-------------|-----|-----|-------|
| Kikar       | ... | ... | 3,220 |
| Other kinds | ... | ... | 341   |
| Total       |     |     | 3,561 |

(b) There are two abadis in Chak No. 23. The northern one is subject to floods and the construction of a Band around the abadi is under consideration. A reference on the subject has recently been made to the Commissioner.

(c) Chak No. 50 has no abadi. The Murrir Hussain abadkars have exchanged their lands in the same Chak, but they have not prepared their ahatas as yet. Their former ahatas were washed away by a flood in the Bhed Nala.

(d) In the perennially irrigated Chaks the abadkars are doing well and have settled down, but in the Kharif Chaks of Rakh Baoli Lehna Singh, Rakh Ohhaurani and Rakh Kathiala, many abadkars still go back to their original villages for the Rabi. As already stated elsewhere fines have been inflicted on these absentees.

(e) Up to the close of the previous year 101 wells were constructed, 71 more were sunk during the year under report so that the total number of wells in the colony is 172.

(f) It is satisfactory to find that during the year 12 new shopkeepers and 18 *kamins* have settled down in the colony villages. Sixty-three ahatas were allotted during the year out of which 35 have already been built on.

(g) Four out of nine patwarkhanas have been constructed, but the buildings are of a flimsy nature.

11. *Lambardars and Zaildars*.—(a) There are altogether 63 Lambardars in the Colony. Out of this number, five are on probation. Two of these were appointed during the year under report. No new Sufedposh or Zaildar has been appointed.

(b) In the Kharif Chaks, Lambardars still find difficulty in realizing the revenue from the abadkars as so many go off in the Rabi. The question of the grant of the Lambardari and Kamin rectangles is still awaiting the constitution of the district in its final shape.

12. *Census*.—According to the new census operations the population is as follows:—

|         |     |     |       |
|---------|-----|-----|-------|
| Males   | ... | ... | 3,978 |
| Females | ... | ... | 2,987 |
| Total   |     |     | 6,965 |

This shows an increase of 1,156, which is due to more accurate enumeration and the fact that a large number of labourers were employed at the census time on repairing the Rajbahas.

13. *Towns and Markets*.—There is no town or market in this Colony. The produce is carried to Lahore, Nankana Sahib and Warburton.

14. *Communications*.—(a) No new road has been constructed.

(b) The Marh-Nankana Sahib and Marh-Sheikhupura roads are being repaired. Earth has been spread upon the roads but the dressing is not done as yet, and the latter road requires culverts over water channels. The District Board has sanctioned a revised estimate of Rs. 30,512 for the construction of a bridge-over the Deg Nalla on the Sheikhupura-Sharakpur road and the Executive Engineer, Sheikhupura Provincial Division, has been asked to obtain the Superintending Engineer's approval for starting the work. A bridge at R. D. 71,000 has been constructed during the year under report.

(c) The Executive Engineer, Sheikhupura Division, Upper Chenab Canal Colony, has lately been addressed regarding the construction of culverts over the Sheikhupura-Marh road. Action is also being taken for the construction of more culverts over water-courses on other roads in the Colony Chaks.

15. *Miscellaneous.*—(a) The land granted to Raja Sir Daljit Singh and Sir Zulfikar Ali Khan, C.S.I., is generally in the same state as it was last year, but the area cultivated has decreased considerably as will be seen from the figures below:—

|        |     | 1919 | 1920 | 1921 |
|--------|-----|------|------|------|
| Rabi   | ... | ...  | 273  | 48   |
| Kharif | ... | 136  | 70   | ...  |

The grantees, however, have made about Rs. 4,000 from grazing fees and several thousand from the sale of Kikar trees during the year.

No attempt seems to have been made as yet to raise water by electric power derived from the canal falls.

I hope to be able to go into the question of this lease some time.

(b) The experimental rice farm has not as yet come into existence. The land has been leased out by the Agricultural Department and no practical steps have been taken to start the farm.

(c) The 23 acres of land set apart for a rice factory are still lying vacant. Syed Maratab Ali Shah and Lala Charan Das have applied for sites for starting private rice factories. Proposals have been sent up in this connection.

(d) Chak No. 4 was in charge of Officer Commanding 4th Cavalry, but for certain military reasons, has now been transferred to the control of the Superintendent, Military Farm, Okara, Montgomery. During the year 1,259 acres were brought under cultivation as against 1,143 last year.

(e) There are altogether five Zamindara banks with a capital of 8,900 in the Colony as reported last year.

(f) New Post Offices in Chaks Nos. 3, 8, 13 and 18 were opened during the year. There is a proposal to attach a postman to Marh Bhangwan to serve eight Chaks lying round this village. This will be considered.

(g) Seventeen applications were made for the grant of takavi. A sum of Rs. 30,000 was sanctioned by the Financial Commissioner for this purpose and out of this, only a sum of Rs. 12,500 has, so far, been drawn for distribution.

(h) No epidemic was reported during the year. Six men however died of snake bite. Medical aid can be had at the canal dispensaries at Marh Bhangwan, Mangtanwala and the District Board dispensary at Shahdara.

(i) Only one revenue case was instituted and decided by the Colony Naib-Tahsildar during the year.

(j) One hundred and four boys are studying in the five primary schools already opened. Sanction has been accorded by the District Board for the opening of six new primary schools in Chaks Nos. 5, 10, 21, 32, 41 and 47, and arrangements are being made for their opening at an early date.

(k) The four rectangles reserved for allotment to well finders in the colony have not yet been distributed, owing to the fact that no such well finders have, so far, come forward for that purpose.

(l) The contractor who has the brick kiln at Marh Bhangwan says he has burnt five lacs of bricks, in spite of the fact that he had to pay a very high price for his coal. He hopes to get the contract for building the bridge over the Deg Diversion which is not far off.

Statements Nos. V and VI.

#### 16. *Extensions.*—Nil.

17. *Establishments.*—Under the superintendence of the Deputy Commissioner, L. Daulat Ram remained in charge of the Colony work till 21st July 1921. He was succeeded by Dewan Mahesh Das who was still in charge at the end of the year.

(ii) M. Hazara Singh was the Colony Naib-Tahsildar throughout the year and his work has been found satisfactory.

(iii) There is no separate Field Kanungo for the Chaks. A Colony Clerk and a Colony Moharrir have recently been sanctioned by Government to deal with the colony work at headquarters.

C. B. BARRY,

*Deputy Commissioner, Sheikhpura.*

# Upper Chenáb Canal Colony.

## LYALLPUR DISTRICT.

1. *Survey and demarcations.*—Nil.
2. *Conditions.*—Nothing new to report under this head.

3. *Allotment.*—Two rectangles were granted to Muhammad Yasin and his two brothers, sons and heirs of Ghulam Husain Khan, retired Havildar and a disappointed Jhelum grantee, during the year under report, *vide* Junior Secretary to the Financial Commissioners No. 301—642-B-2 of 10th June 1921 to the Commissioner, Multan.

4. *Cultivation of the permanently allotted area.*—  
 Statement No. III. Total area sown is 21,088 acres against 18,615 acres in the last year and 14,753 the year before. The increase is due to good supply of water from canal and high price of food grains. It is most satisfactory.

The percentage of area failed in Kharif was 10 per cent. and in Rabi 8 per cent., which is not much in view of the fact that there was failure of timely rainfall.

5. *Temporary Cultivation.*—Nil.

6. *Receipts by way of Capital.*—There is still a balance of Rs. 1,868 outstanding from last year's demand of Rs. 18,694.

Out of this Rs. 1,868 Rs. 200 have since been recovered and action for the recovery of the balance (Rs. 1,668) due from one grantee is being taken.

Of the balance of Rs. 6,778 outstanding at the end of the year under report, Rs. 1,517 have since been recovered.

7. *Acquisition of Proprietary and Occupancy Rights.*—During the year under report 39 disappointed Jhelum grantees acquired proprietary rights in 3,143 acres.

8. *Mutation Cases.*—One hundred and fifty mutations were decided during the year under report as against 120 last year. The increase is due to the increased area acquired in proprietary rights.

9. *Settlement Proceedings.*—Nil.

10. *Village sites.*—Thirty-five village sites (ahatas) were allotted during the year under report.

The greater number of colonists now reside in their respective village abadis. Efforts are continually made to induce the few who still live on their rectangles to move to the village site.

The abadkars are now generally settled.

Two more wells were sunk in Colony Chaks, making the number seven in all, for drinking purposes.

11. *Lambardars and Zaildars.*—Four temporary Lambardars were confirmed during the year, having passed their probationary period satisfactorily.

No Lambardar was dismissed on account of inefficiency, but one has been suspended for not having yet taken up permanent residence in his village abadi.

There is no separate Zaildar for these 27 Upper Chenab Colony villages. The area was included in the charge of neighbouring zails.

11. *Census.*—The enumeration made in connection with the Imperial Census operations (1921) gave the following results :—

|        |     |       |
|--------|-----|-------|
| Male   | ... | 5,186 |
| Female | ... | 3,952 |

---

138

These figures have been reported to the Census Superintendent.

13. *Towns and Markets.*— Nil

14. *Communications.*— No new roads were made during the year under report, but a beginning may shortly be expected with the Jaranwala-Baraghar and Bucheke-Nankana projects which await revised sanction.

15. *Miscellaneous.*—There is no marked change in the general development of this tract, though cultivation is gradually extending.

The colonists owning land in villages situated on the tail of Alijaj Raibah generally complain of the scarcity of water supply,

It is proposed to transfer this tract along with other villages in the neighbourhood to the Sheikhpura district. The sooner this change is effected, the better, as the tract cannot really be efficiently administered from Lyallpur.

16. *Extensions*.—Nil.  
Statements Nos. V and VI.

17. *Establishments*.—Pandit Avatar Kishen Kaul, Extra Assistant Commissioner, held charge of this colony under the Collector of the district till 24th May 1921, when he was succeeded by Malik Allah Bakhsh, Extra Assistant Commissioner.

There was no special subordinate establishment employed during the year.

The Colony Muhasib employed at Sadar on Rs. 25 per mensem was brought under reduction on 1st April 1921.

SULTAN AHMAD KHAN,  
for *Deputy Commissioner, Lyallpur*.

**UPPER CHENAB CANAL COLONY.**  
**STATEMENT No. I.—ALLOTMENT, 1920-21.**

| No. | Name of Branch.                         | Total area of State land. | Allotable area. | Culturable and irrigable portion of area in column 3. | Culturable area as found by the new colony soil survey. | Allotted area. | Balance unallotted. |

(a) Recovered before time on account of instalment due in the year 1921-22.

# Upper Jhelum Canal Colony.

## GUJRAT DISTRICT,

1. *Survey and demarcations.*—Measurement work was completed in 33 Chaks in the previous years and in 7 Chaks during the year under review. In the remaining Chaks it will be done during the next year.

No explanation of small amount of work done.

H. P. TOLLINTON.

2. *Conditions.*—No remarks.

Classes of grantees might at least have been given.

H. P. TOLLINTON.

3. *Allotment.*—The total area of Crown waste was 47,332 acres of which 4,658 acres were given on leases, etc., leaving 42,674 acres as allottable balance. Out of this, 1,212 acres are uncommanded and 337 are Ghair Mumkin, the total being 1,549 acres. So the remaining net area is 41,125 acres.

Statements Nos. I and II.

No details given. Figures doubtful as the areas are in some cases less than those given in last year's report.

H. P. TOLLINTON.

Out of this area 35,740 acres were allotted during the previous years and 5,392 acres during the year under review leaving 942 acres as available balance with 4 acres included in the balance on account of an exchange in Chak 23 making in all 946 acres available balance as detailed below :—

|              |     |     |       |
|--------------|-----|-----|-------|
| Commanded    | ... | ... | 249   |
| Uncommanded  | ... | ... | 679   |
| Ghair Mumkin | ... | ... | 18    |
|              |     |     | <hr/> |
|              |     |     | 946   |

The area allotted up to the end of September 1921 under the different heads is as below :—

|                                                    | Acres. |
|----------------------------------------------------|--------|
| Rewards for Criminal Administration or recruiting  | 6,572  |
| Ghoipal grantees transferred from Shahpur District | 9,973  |
| Military Rewards                                   | 1,159  |
| Military peasants                                  | 5,146  |
| Khanki Weir compensatory grantees                  | 3,091  |
| Military Dairy Farm                                | 1,000  |
| Grantees transferred from Lower Bari Doab Canal    | 5,197  |
| Other compensatory grantees                        | 1,378  |
| Seed Farm                                          | 251    |

|                                                | Acres. |
|------------------------------------------------|--------|
| Special Rewards ... ..                         | 125    |
| Safedposhi Inams ... ..                        | 495    |
| Forest plantation ... ..                       | 7,219  |
| Army Remount ... ..                            | 160    |
| Compensation for land taken up for Baha-ud-Din |        |
| Market ... ..                                  | 56     |
|                                                | <hr/>  |
|                                                | 41,732 |

There were 30 exchanges during the year under report involving an area of 217 acres.

4. *Cultivation of the permanently allotted area.*—Out of the allotted area 12,418 acres were sown in Kharif 1920 and 18,622 acres in Rabi 1921, in all 31,040 acres, of which 4 per cent. failed in Kharif and 3 per cent. in Rabi.

Statement No. III.

Recoverable demands and remissions were as follows :—

|                     | Demand.  | Remission. |
|---------------------|----------|------------|
| Land Revenue ... .. | 58,566   | 1,326      |
| Water Rate ... ..   | 1,10,789 | 2,585      |
| Malikana ... ..     | 17,965   | 612        |
| Cesses ... ..       | 9,017    | 204        |

5. *Temporary Cultivation.*—2,135 acres of land were let out on temporary cultivation during Kharif 1920 and 2,379 acres during Rabi 1921, in all 4,534 acres during the year under report. Of this Kharif crop failed 11 per cent. and Rabi 4 per cent.

Tenants derived profit from temporary cultivation but this is now ceasing as the permanent military grantees have taken possession of their grants.

The demand, collections and balances under this head were as follows :—

|                     | Demand. | Collection. |
|---------------------|---------|-------------|
| Land Revenue ... .. | 10,064  | 10,064      |
| Water Rate ... ..   | 17,932  | 17,932      |
| Malikana ... ..     | 42,616  | 42,616      |
| Cesses ... ..       | 1,609   | 1,609       |

Remission of Kharaba was allowed as below :—

|                     |     |
|---------------------|-----|
| Land Revenue ... .. | 286 |
| Water Rate ... ..   | 447 |
| Malikana ... ..     | 976 |
| Cesses ... ..       | 45  |

and its percentage comes to Rs. 2 on the total demand.

6. *Receipt by way of Capital*—Rupees 7,002 on account of acreage rate were realized during the year under report.

Statement No. IV.

Demand and realizations should have been given.

H. P. TOLLINTON.

7. *Acquisition of Proprietary and Occupancy Rights.*  
—No Remarks.

8. *Mutation Cases.*—There were 123 mutations attested during the year under report. These were mostly of deaths.

9. *Settlement Proceedings.*—No remarks.

10. *Village Sites.*—During the year under review house sites were allotted in 6 Chaks and the houses are under construction.

Thirty-three wells in all have been sunk so far and four are under construction. In the year under report three wells were completed.

The colonists experienced great hardships in obtaining water for harvesting the last Rabi crops owing to the closure of the Canal and scarcity of rain and they found no alternative other than to sink wells. Consequently they have obtained permission to do so for irrigation purposes. There are two wells now in Chak 44 and five wells in Chak 2. In other Chaks also the colonists are going to follow the same example.

11. *Lambardars and Zaildars.*—During the year under report 26 Lambardars were appointed in 18 Chaks and  $13\frac{3}{4}$  extra rectangles were given to them. In making these appointments preference is given to those who have fulfilled the conditions of their grants by colonizing good lands, constructing good houses, planting trees and rendering loyal services to the Government.

No colonist was appointed a Zaildar or a Safedposh during the year under report.

12. *Census.*—The population of the Colony is growing day by day and the colonists are in good health and are well off.

They generally bring with them Kamins from their old villages and in some cases tenants also.

The total census of the Colony Chaks was 21,760 with the following details :—

| <i>Males</i> | <i>Females</i> |
|--------------|----------------|
| 12,589       | 9,171          |

The tenants too are generally well off.

13. *Towns and Markets.*—(i) The construction of Bahad-Din market is in progress. The Government's administrative sanction of an allotment of Rs. 2,16,42 for the improvement of the town has recently been received and it is expected that the Public Works Department will shortly take the necessary works in hand.

(ii) One of the two factory sites is under construction.

(iii) The market has been declared as notified area, but so far does not bring any income. It is in fact not in a flourishing condition on account of the fact that no works such as well, drainage; pavements of streets, bazar roads, etc., have been taken in hand. Now that the allotment has been sanctioned and when the above works are completed the town is expected to be in a flourishing condition.

14. *Communications.*—So far as the Colony Chaks are concerned the village roads and bridges have been constructed. A grant of Rs. 50,000 has recently been sanctioned for colony roads.

15. *Miscellaneous.*—No remarks.

Statements Nos. V and VI.

16. *Extensions.*—No remarks.

17. *Establishments.*—

1. M. Ram Singh, Colony Naib-Tahsildar, throughout the year.

2. One Field Qanungo throughout the year.

3. Six Patwaris including one Moharrir to the Naib Tahsildar, all at the rate of Rs. 23 a month, throughout the year.

4. One Moharrir at Sadr, throughout the year at Rs. 37-8-0 per mensem.

Rai Sahib Chaudhri Kesar Ram held charge of the Colony during 1916-17 as Extra Assistant Colonization Officer and since October 1917 to 21st May 1921 as Revenue Assistant of the District. His departure has been a great loss to the Colony as he was enthusiastically interested in it. The present Revenue Assistant Syed Ahmad Hussain has thrown himself into the work with great zeal.

M. Ram Singh has continued to work very well and he is thoroughly respected by the Colonists.

Not a very full report  
but as it is so long overdue  
I send it on.

H. P. TOLLINTON,  
Commissioner.

RAGHBIR SINGH,  
*Deputy Commissioner.*

STATEMENT No. I.—ALLOTMENT, 1920-21.

**Review of the Annual Report on the Land Revenue  
Administration of the Punjab for the year ending ,  
30th September 1922.**

*Proceedings of the Governor of the Punjab in Council  
in the Department of Revenue (Revenue), No. 491—5300-2,  
dated 29th October 1923.*

THIS report should have been submitted to Government in April last. The delay of five months is due to the fact that at the time when District reports should have been forwarded to Commissioners all District Officers were very busy, with budget work under the new procedure. This initial delay has not been made up by higher offices. Consequently the material submitted for consideration is now a year old. It is hoped that the Financial Commissioners will be able to make suitable arrangements for the prompt submission of the report in future. . .

2. The year 1921-22 was on the whole favourable, except in the east of the province. This fact combined with high prices made the recovery of large arrears of land revenue a comparatively easy matter. In the areas which comprise the Gurgaon and a greater part of the Hissar districts in the east conditions were very unfavourable and but for the fact that the whole province is now practically secured against famine by its magnificent canal system there would have been serious anxiety as to the possibility of famine conditions being established in these areas.

3. The total amount of fixed and fluctuating land revenue to be collected was 417·07 lakhs of rupees, of which 406·91 lakhs was collected. Of the fixed land revenue, it was necessary to suspend 4·49 lakhs in Hissar, 1·24 lakhs in Gurgaon and just over half a lakh in Rohtak and Siálkot. In all the other districts affected less than half a lakh in each case was suspended. Of the land revenue under suspension at the beginning of the year (amounting to 41·23 lakhs) no less than 28·92 lakhs belong to the previous year 1920-21 which was very unfavourable. Gurgaon, Hissar, Attock, Jhelum, Siálkot, Rohtak and Shahpur are the districts in which the largest amount of fixed land revenue is under suspension. In Gurgaon, Hissar, Attock and Jhelum the pitch of the land revenue is light: besides this their rules provide that the land revenue shall be suspended freely in bad years and collected again without scruple in good years. In fact, in these districts the fixed land revenue sometimes approximates in character to fluctuating

land revenue, so freely is it suspended and so easily are the sums suspended subsequently collected.

4. The fact that the land revenue of the province as a whole is a very light burden is proved (if a proof is necessary for what is really sufficiently obvious) by the fact that this large sum of over four crores is collected with the greatest ease 14,271 coercive processes issued during the year under report. Of these, 7,631 are writs of demand. These formal documents are called coercive processes only by a stretch of language. They amount to little more than a registered notice demanding payment which is frequently issued by creditors against debtors both in this country and in other countries. Of the remaining 6,610 processes, the great majority of which were warrants of arrest or distress warrants, only 3,501 were actually executed, the majority of these being warrants of arrest. A mere recital of these facts is sufficient to establish the proposition that the burden is light, and that the people of the province who pay this large sum so punctually must be essentially contented.

5. During the year under report settlement operations were being brought to a conclusion in the Pákpattan and Dipálpur tahsils of the Montgomery district and the preliminaries of re-assessment operations were begun in the Bhakkar tahsil and Saadat Miáni villages in the Miánwáli district and Khánqah Dogran tahsil of the Sheikhpúra district and Háfizábád of the Gujránwála district. The action of the Legislative Council, which opposed the grant of the necessary funds for the re-assessment of the non-colony portion of the Jhang district, is responsible for delay in the beginning of the re-settlement of that area. In the settlements now being conducted in the province Government is adhering strictly to the promise made to the Legislative Council that the districts to be re-assessed should receive the benefits of any amendments of the law suggested by the Committee appointed to consider amendments of the Land Revenue Act and approved by Government. In particular, it may be stated here that in none of the assessments made since the undertaking was given to the Legislative Council has the estimated amount of land revenue assessed exceeded one-third of the nett assets of each assessment circle.

6. The question of paying land revenue and other revenues by money-orders is becoming increasingly important. 25·38 lakhs of rupees were paid by this agency during the year under report. As may be expected, this means of paying money is normally used for small sums. For larger sums it is found

cheaper and more convenient for the revenue-payer to take the money to the nearest Government Sub-Treasury himself.

7. The Drainage Board did useful work during the year under report and is now devoting its attention to problems connected with the security of the Gurgaon district and with the prevention of water-logging in the areas irrigated by the large canals to the west of the province. Much of the work involved is of a highly scientific character, and the Board has therefore done well to send a student to England to go through a technical course of training at the Lawes Agricultural Trust, Harpenden (England). This young man is reported to be making good use of his stay in England and it is hoped that the training he is now receiving will be of value to the province in the future. The problem of water-logging is one which is becoming increasingly important because of the recent great extension in the area affected, specially on the Upper Chenab and Upper Jhelum Canals.

8. The loans under the Land Improvement Loans Act, XIX of 1883, continue to be granted somewhat sparsely. It is therefore satisfactory to know that there is an increasing tendency in the direction of obtaining assistance from Co-operative Societies. The loans under the Agriculturists' Loans Act, XII of 1884, are also granted sparsely except in districts like Hissar where the familiarity of the people with this form of assistance by Government is probably much greater than it is in any other district of the province. As a rule, these loans are faithfully devoted to the purposes for which they are granted and punctually repaid with interest. There is no better way of helping the people than by the grant of these loans provided that care is taken that the loans do not become gifts. That way pauperisation lies.

9. The mortgage debt of the province amounts to 37.20 crores of rupees and comes to nearly Rs. 127 per cultivated acre, the total cultivated area mortgaged being 29.30 lakhs acres. The average land revenue of the province is slightly under Re. 1-8-0 per acre cultivated so that the mortgage debt per cultivated acre is equal to 85 years' purchase of the land revenue. The average price of cultivated land is Rs. 345 per acre or 230 years' purchase of the land revenue. These figures prove the lightness of the land revenue and the absolute security of the landed property.

The post of Financial Commissioner was, during the first half of the year under report, held by Sir Patrick Fagan and on his retirement he was succeeded by Mr. C. M. King. The Government have already recorded their appreciation of the services of the former officer and take this opportunity of placing on record their recognition of the excellent work done by Mr. King, the present Financial Commissioner, during his tenure of office in controlling the revenue administration of the province.

ORDER.—Ordered that the review be published in the *Punjab Gazette* and be circulated with the report and copies be sent to the Government of India, Department of Education, Health and Lands.

By order of the Governor in Council,

C. A. H. TOWNSEND,

*Offg. Chief Secretary to Government, Punjab.*

*October 25th, 1923.*

## Introductory.

THE year 1921-22 marks the end of a quinquennial period and the figures in statement I have been brought up to date. There have been considerable changes. One hundred and twenty-

Analysis of Statistics,  
Statement I.

nine villages comprising 115,202 acres were excluded from the Sialkot district and added to the Gujranwala district. The whole of the Khanqah Dogran and Sharakpur tahsils of the Gujranwala district, comprising 1,133,744 acres, and 91 villages from Lahore, measuring 89,166 acres, were formed into the new district of Sheikhupura, from which 4 villages were later retransferred to the Lahore district. The area in Montgomery north of the "Dhaya" was excluded from the Dipalpur tahsil and added to the Okara tahsil, which was again increased by the addition of 2 villages from the Chunian tahsil of the Lahore district. As a consequence of the transfer of the Upper Chenab Canal area from Lyallpur to Sheikhupura, 7 villages in the Jaranwala tahsil were transferred to the Samundri tahsil. One hundred and thirty villages were transferred from the Raya tahsil of the Sialkot district to the present Sharakpur tahsil of the Sheikhupura district, and later the Raya tahsil was abolished and its villages were transferred to the Zafarwal tahsil (Sialkot district). One hundred and fifty nine villages from the Jaranwala tahsil of the Lyallpur district were transferred to the present Sharakpur tahsil of the Sheikhupura district, which was later divided into 2 tahsils, *viz.*, Nankana Sahib, comprising 376 villages and Shahdara comprising 460 villages.

The districts of Shahpur, Lyallpur, Muzaffargarh and parts of Hissar (Sirsa) and Jhang (Lower Chenab Colony portion) came under settlement during the period, which also saw the conclusion of settlement operations in Sialkot, Jullundur, Simla, Multan, Kangra, Ambala, Montgomery and the tract in the Shahpur district lying outside the irrigation limits of the Lower Jhelum Canal.

The total area of the province shows an apparent increase of 106,404 acres partly due to alluvion, partly to more accurate measurement. Small differences in district areas are reported. They result chiefly from the transfer of villages from one district to another, re-measurements, the inclusion of forests and the alluvion and diluvion action of rivers. Of the total area of the province, well over half is at present under cultivation. All districts, with the exception of

five, *viz.*, Rohtak, Ferozepore, Rawalpindi, Multan and Dera Ghazi Khan, show an appreciable increase in the total cultivated area, since last settlement. In Rohtak the decrease of 12,334 acres is attributed partly to water-logging in the Dehri circle of the Jhajjar tahsil and partly to the fact that a considerable extent of sandy land, the cultivation of which is always precarious, having remained untilled for three years has, under the rules, now been recorded as waste. The decrease of 35,496 acres in Ferozepore is attributed to deficient rainfall. Land acquired by the Attock Oil Company, the Military Department and for other public purposes caused a decrease of 23,582 acres in arable land in Rawalpindi. In Multan the decrease was due to the late opening in kharif 1921 of inundation canals, particularly the Sidhnai series. Re-measurements during the last settlement operations accounted for most of the decrease amounting to 1,33,102 acres in Dera Ghazi Khan.

The total net increase in cultivated area during the quinquennium was 229,810 acres. The increase of 875,256 acres in the canal irrigated area and the decrease of 456,217 acres in the unirrigated area are due chiefly to the dryness of the year, which compelled the zamindars to extend canal irrigation and increase their number of wells, and also to some extent to re-modelling. Although masonry wells increased by 17,094, the total area irrigated by them, with and without the assistance of canals or river floods has fallen from 4,823,854 acres to 4,821,513 acres. Unlined wells decreased by 3,273. The decrease in the areas irrigated by flood (*sailab*) and by lift from tanks, marshes, pools and streams (*abi*) amount to 156,700 and 30,190 acres, respectively. The extension of the canal system has its inevitable reaction on the riverain tracts partly by reducing the frequency of floods and spills and partly by providing more attractive fields of labour for tenants than the insecure area along the river bank.

The increase in assessment amounts to over Rs. 50·85 lakhs, of which some Rs. 32·66 lakhs are on account of fluctuating revenue; a rise of 12·2 per cent. on the previous quinquennium. The incidence of the land revenue demand per acre of cultivation is Rs. 1-9-5 as compared with Rs. 1-6-10.

A noteworthy indication of increasing prosperity is the marked tendency observable in most plains districts to increase the cultivation of the more valuable spring crops. Of those districts reporting on cultivation of more than one crop on the same field in the year (*dofashi*) 7 note an increase, 5 a decrease while in 3 there is no change. The most remarkable increase

is in the Gurgaon district where the twice cropped area jumped from 37,014 acres in 1920-21 to 193,792 in 1921-22, a rise of 156,778 acres, the zamindars, thanks to a timely and sufficient distribution of Government loans for seed and bullocks, being able to take full advantage of the improved monsoon. Severe fodder famines are reported from Ferozepore and again also from Jhelum, which caused a high mortality in milch and plough cattle.

# Annual Report

ON THE

## Land Revenue Administration

OF THE

### Punjab

FOR THE

***Agricultural year ending the 30th September 1922.***

1. All important to the autumn crops, and particularly the cotton and cane, of the year under report, were the climatic conditions of the last five months of the preceding year. These were distinctly unfavourable, so that though on the whole 1921-1922 has been a good year and presented a happy contrast to the previous four seasons of leanness, these two valuable crops gave outturns much below normal. The twelve months of 1921-22 were more propitious; and, with the exceptions of Ferozepore and Hissar, where rainfall was scant, and Gurgaon, where floods were excessive, the Province has enjoyed well distributed rain in normal quantities. The monsoon burst in the 2nd week of July and remained very active during the 1st half of August, when a break set in, which, with occasional interruptions continued till the end of that month. Ample moisture was available for the sowing of autumn crops, other than sugarcane and cotton. During September the rainfall was above normal in the East Punjab and montane and sub-montane districts and below normal elsewhere. January with its light rain and cloudy weather, produced apprehensions of rust in many places. There occurred showers in most districts in February and March, which, though distinctly below normal in total amount, were well distributed and very useful for standing spring crops. In the South-Eastern tract, however, stretching from Ferozepore to Delhi, there was practically no rain after Christmas. In April the weather was generally warm, dry and calm and thus very beneficial to the maturing of grain and the threshing of crops.

The total area sown in the autumn was 12.19 million acres (about 12 per cent. above the normal and 8 per cent. above the

preceding year). Of this 23 per cent. failed. This compares with a failure of 36 per cent. in 1920-21. The normal rate is 21 per cent. Percentages of crop failure were very high in Hissar (65) and high in Attock (38), Gurgaon (33), Ferozepore (31). The total area sown in the spring was 18·83 million acres, about 5 per cent. above the normal and 42 per cent. above the preceding year : the failed area was 14 per cent. against 25 per cent. in 1921 and a normal of 14 per cent. Percentages of crop failure were very high in Jhelum (69), Rawalpindi (64), Attock (63) and Kangra (52). The total areas sown and matured for the year were 31·03 and 25·65 million acres against 24·56 and 17·18 million acres in 1920-21 and a normal of 28·81 and 24·06 million acres respectively. Sowings were below normal in Ferozepore, Lahore, Sialkot, Rawalpindi and Muzaffargarh and remarkably high in Sheikhpura, Mianwali, Montgomery, Rohtak and Shahpur, Sugar and cotton were 15 per cent. and 14 per cent. below normal, but food grains (wheat 30 per cent., maize 99 per cent., barley 90 per cent., Jowar 78 per cent., gram 25 per cent.) were, as a result of the famine of the preceding seasons, well above normal. Prices continued high during the autumn and in the case of maize and cotton actually rose from Rs. 4-14 to Rs. 6-5 and from Rs. 8-7 to Rs. 10-7 per maund, respectively. With the promise of a good spring crop a break began. The average price of wheat fell from Rs. 6-10 to Rs. 5-12, of barley from Rs. 4-15 to Rs. 4, of gram from Rs. 6-5 to Rs. 4-14 and of rape-seed from Rs. 9-7 to Rs. 7-2 per maund.

There was an embargo on export of wheat, but at the same time there was considerable gambling in grain, a factor which tended to prevent the easing of prices which the embargo was intended to secure. Figures of import and export are thus not a little artificial. They show an increase in the exports of cotton and the imports of rice, jowar and bajra and sugarcane, and a decrease in the exports of wheat.

At the end of the year stocks of food grains were generally sufficient. There was a marked tendency to hold them up in order to keep prices high. Farmers are beginning to endeavour to attract to themselves the middleman's profits and an economic situation full of interest is arising, as the class of middleman has a powerful organisation and may be expected to resent poaching on what it considers its preserves.

The year under report was distinctly more favourable for cattle than the preceding year. In some districts fodder was scarce in winter, but it was abundant everywhere after the

monsoon rainfall. Cattle disease was nowhere acute in form and no considerable mortality resulted from it.

2. The total demand of the year for fixed land revenue was Rs. 239·96 lakhs of which Rs. 230·31 lakhs or 96 per cent. was collected, Rs. 2·45 lakhs being irrecoverable. This irrecoverable amount represents large sums made up of remissions on account of rewards for meritorious war services, jagirs, damage to crops by hail, and losses by diluvion and similar natural causes. The amount suspended during the year was Rs. 8,25,466 (autumn harvest Rs. 6·74 lakhs, spring harvest Rs. 1·51 lakhs). The year opened with Rs. 41·23 lakhs under suspension from previous years. Of this Rs. 2,11,389 were remitted and Rs. 15,25,993 collected, leaving Rs. 23·86 lakhs still under suspension at the end of the year. The demand as compared with the figures for the previous year shows an increase under various heads amounting to Rs. 1,03,430 of which Rs. 54,441 were due to progressive assessments, Rs. 22,227 to alluvion, Rs. 10,105 to miscellaneous and Rs. 9,215 to lapses and resumption of revenue free lands. In the province as a whole the revenue came in readily; only in a few isolated instances was opposition offered to collection. In the Ludhiana district the Lambardars of Bhani Rora applied for a police guard to recover revenue from non-co-operators. A little difficulty was experienced in some villages of the Bajwat area of the Sialkot district where the zamindars declined to pay revenue at irrigated rates, owing to the stoppage of irrigation from a water course having its head in the Jammu State. They paid up on the understanding that their case would be favourably considered. Gujranwala paid up: but payments were, as has been noticed frequently during recent years, delayed. The matter is receiving special attention. The districts in which it was found necessary to grant suspensions on any considerable scale were Hissar (Rs. 4·49 lakhs), Gurgaon (Rs. 1·24 lakhs), Sialkot (Rs. 55,485), Rohtak (Rs. 54,505), Attock (Rs. 41,469), Shahpur (Rs. 31,456), Ferozepore (Rs. 28,207) and Gurdaspur (Rs. 11,518). In Kangra, Jullundur, Amritsar, Gujranwala, Sheikhupura and Multan suspensions were not considered necessary, while in the remaining districts inconsiderable suspensions were granted. Only Rs. 31,591 of the total provincial demand remained outstanding (*i.e.* unsuspended or unremitted) at the end of the year. The total amount of land revenue thus under suspension at the close of the year was Rs. 30·75 lakhs against Rs. 41·20 lakhs last year. The districts showing the largest balances under suspension are Gurgaon Rs. 9·83 lakhs, Hissar Rs. 7·08 lakhs, Attock Rs. 4·40 lakhs, Jhelum Rs. 3·71 lakhs, Sialkot Rs. 1·60 lakhs, Rohtak Rs. 1·13 lakhs and Shahpur Rs. 1·06 lakhs.

### 3. Abnormal floods occurred during the period under report

Alluvion and Diluvion.  
Statement IX.

only in the Jullundur district, where the excessive rainfall in the hills during July and August 1922 caused the Sutlej to overflow and sweep away 2,339 acres. . The net increase by alluvion in the cultivated area was 9,301 acres against 11,054 acres last year. This increase is comprised in a net gain of 9,513 acres on account of rivers, 487 acres on account of hill torrents (*chos*) and a loss of 699 acres on account of minor streams. Of the total area removed from assessment, the river Sutlej was responsible for a loss of 1,479 acres, the Jumna (Karnal) 766 acres and minor streams in Jhelum 1,375 acres. During the year an area of 34,238 acres of riverain land was newly assessed at a sum of Rs. 34,635, while on 24,937 acres which were washed away, the assessment amounting to Rs. 24,566 was remitted. The revenue was enhanced by Rs. 21,321 on 22,009 acres and reduced by Rs. 6,213 on 10,239 acres. The net gain to the fixed land revenue roll was thus Rs. 22,170 against Rs. 4,575 last year.

### 4. The collections of true fluctuating land revenue have

Fluctuating land revenue.  
Statement VIII.

increased from Rs. 147.92 lakhs last year to Rs. 177.11 lakhs this year. The increase is mainly due to the favourable climatic conditions prevailing during the period under report, and in particular to adequate canal irrigation and sufficiency of water in the rivers. Of the total increase of Rs. 29.19 lakhs, the Multan Division contributed Rs. 19.98 lakhs, the Rawalpindi Division Rs. 4½ lakhs and the Lahore Division Rs. 4.04 lakhs. Dera Ghazi Khan alone reports an adverse year. Excessive rain caused spates, which breached protective embankments and swept in disastrous flood through the canal irrigated tract. Of the total demand Rs. 51,110 only remained uncollected. Lahore and Multan show the largest amounts outstanding, *viz.*, Rs. 25,585 and Rs. 13,121, respectively due in the former case to demands assessed shortly before the close of the agricultural year.

### 5. Collections of "other land revenue" dropped from

Other land revenue.  
Statement VIII.

Rs. 41.06 lakhs to 33.84 lakhs. There were no auctions in the Lower Bari Doab Colony, and the sale of proprietary rights in Government estates brought in Rs. 5.63 lakhs less than the total of the preceding year. Sale proceeds of waste land realized Rs. 15.71 lakhs, about Rs. 59,000 less than last year. Montgomery and Multan contributed Rs. 10.44 and Rs. 4.42 lakhs, respectively. The balance is composed of small amounts from Lyallpur (Rs. 36,151), Sheikhpura (Rs. 21,424), Shahpur (Rs. 20,731) and Lahore (Rs. 1,511) districts. Collections from rents of lands leased for temporary cultivation amounted to 5.43 lakhs

against 7.46 lakhs in the preceding year, much of the area hitherto available having been permanently allotted. The largest sum collected on this account was in the Montgomery district (Rs. 4.79 lakhs) being two lakhs less than last year. Shahpur and Dera Ghazi Khan collected Rs. 17,509 and Rs. 14,679, respectively. Receipts from royalties on *kankar* and coal show an increase of Rs. 5,874. The increase is chiefly reported from Gurdaspur, Jhelum and Jullundur. The Jhelum district promises considerable industrial expansion. Several applications including some from agriculturists have been received for coal prospecting licenses and two large companies, the Whitehall Petroleum Company and the Burma Oil Company hold licenses for prospecting for mineral oil. The uncollected balance of "other" land revenue for the whole province at the end of the year was just over a lakh, the largest amount outstanding being in the Sheikhpura district *viz.*, Rs. 33,570 and in Montgomery Rs. 12,376. In both districts expansion and development are proceeding at a pace that handicaps them in punctuality of routine.

6. Eighteen new jagirs, seven of Rs. 600 each, one of Rs. 500 and ten of Rs. 250 each have been granted to non-officials by the Punjab Government in recognition of conspicuous service rendered to the public, specially in connection with the War. Petty revenue free grants (*muafis*) amounting in all to Rs. 468 per annum were awarded to deserving persons in Karnal for good recruiting services. Two reward grants for life (*inams*) of Rs. 750 and Rs. 600 per annum, respectively, were granted to chiefs in Dera Ghazi Khan. Two assignments of land revenue amounting to Rs. 500 and Rs. 250, respectively, were granted for War services in Rohtak. A large number of petty revenue free grants (*muafis*) and jagirs lapsed during the year, owing to the death of the assignees. The most important estate so affected was that of the late Khan Bahadur Saiyad Mubarak Ali of Rahon in the Jullundur district, half of whose jagir, amounting to Rs. 450, was resumed. The total income enjoyed by assignees was Rs. 35,96,405 as compared with Rs. 35,38,979 last year. The area under assignment shows a reduction from 4,577,485 acres to 4,561,782 acres.

It is to be remembered that there is no exact connection between the area under assignment and the amount received by assignees. The increase in receipts has been mainly due to the improved season, the figures for Gujranwala and Gujrat, where much of the assigned area is under fluctuating assessment, showing the greatest improvement.

7. The total number of coercive processes issued this year was 14,271 as against 10,621 last year. The amount of arrears concerned was Rs. 11·67 lakhs, and of this Rs. 10·26 lakhs, or nearly

Coercive processes.  
Statement XI.

88 per cent. were collected. The percentage on total collections of revenue collected after issue of processes was 2·26 as compared with 1·52 last year. Of the 14,271 processes, 7,661 were writs of demand, and of the remaining 6,610, only 3,501 were executed. Of these 3,501 executions, 2,532 were for arrest, 19 for imprisonment, 887 for distress and 63 for sale of immoveable property. Of the total number of processes issued 3,883 as compared with 3,162 last year, were against lambardars, 10,388 as compared with 7,459 last year were at the instance of lambardars. Only in Multan (636), Lahore (524), Dera Ghazi Khan (244) and Sheikhupura (183) was it found necessary to execute warrants of arrest. Generally the presentation of the warrant was sufficient to ensure payment. Cases of imprisonment were remarkably few. Gujranwala again heads the list of districts in which warrants had to be executed before revenue was paid. An enquiry is being made into the cause. There were no cases of direct management, farm or transfer, but in addition to processes for recovery of land revenue processes were issued in ten districts for recovery of canal water rates and for other demands, arrears of which are recoverable as land revenue. Hissar again reports some difficulty in the collection of water rates owing to scarcity, absence of landlords and political agitation. The non-co-operators endeavoured half-heartedly to excite the people to refuse payment in several districts, but their efforts produced only the comparatively insignificant results noted above. Generally speaking little difficulty was experienced in collecting the revenue.

8. Processes were served either by post, or (with the exception of in 6 districts only, in which temporary staff was employed for brief periods) by the existing tahsil staff. District Officers hold varying views as to the value of the postal system. It is of course unpopular with Tahsildars who fear that its extension may result in a further diminution of tahsil staff and, in consequence, their own dignity. But where there has been a sustained employment of this method, *e.g.*, in Ferozepore, in which district 2,134 summons were sent by post, results have been satisfactory. It is most successful for service of summons in ordinary revenue suits and of least value in executive cases. It is reported that there is a tendency to ignore postally delivered summons in lambardari and miscellaneous cases. Taking all

Process serving establishment.

these factors into consideration it is clear that the system deserves further encouragement and should receive closer attention from collectors.

9. There were six settlements in progress during the year. Progress in re-measurement, revision of records, etc. Statements XII and XIII. Montgomery has been completed, the assessment report of the Dipalpur tahsil was received during the year and the orders of Government have since been passed. Except for the announcement of new assessment and consequent distribution over holdings, work which is still to be done, the settlement of the Sirsa tahsil is complete. In Lyallpur no revision of records or re-measurement has been undertaken in the current settlement. Difficulties were found in collecting additional staff for the Jhang settlement and operations did not actually commence there till 1st February, 1922. Village inspection was then started and continued without a break till the end of March. Out of a total number of 217 villages to be inspected 165 have already been dealt with by the Settlement Officer. No re-measurement or revision of records had to be done during the year under review. The assessment report for the Lower Chenab Canal portion of the Jhang district is due next year.

In the Muzaffargarh district the area under settlement operations during the year was 2,930,977 acres in 937 villages. Re-measurement and amendment of maps (*tarmim*) have been completed in 342,661 acres of the above area. The maps of 451 villages and the records-of-rights of 450 villages have been finally completed and attested. Re-assessment work has been done in the Muzaffargarh and Alipur tahsils during the year and the reports on both tahsils will be received next year.

The English version of the Riway-i-Am (or statement of custom) of the Dera Ghazi Khan district is still in the press.

10. From the Dera Ghazi Khan district alone is a final settlement report due, the District Officer, in whose hands it is, having as yet been unable to complete it in addition to his other duties.

11. The only assessment report on which the orders of Government were passed, was that of the Pakpattan tahsil. Orders have still to be passed on the Dipalpur tahsil report, and until these are received, the comparison of the actual cost with the forecasted estimates in regard to duration and cost of settlement operations for the district as a whole

cannot be given. The estimated increase of revenue in this tahsil was Rs. 96,353 and the actual increase ordered Rs. 1,03,256.

12. Forecast reports on the Jhang district (non-colony area) and on the Bhakkar tahsil and Sadat Miani villages of the Mianwali district were considered, but final orders not received by the end of the year. Forecast reports of the Khanqah Dogran tahsil and certain other villages in the Sheikhpura district, of the Hafizabad tahsil (Gujranwala district) and of the Attock district are under preparation. The outstanding feature in regard to settlement policy as a whole was the strong opposition of the local Legislative Council to settlement operations. The settlement of the Jhang non-colony portion, which should have commenced on 1st October, 1922, will be delayed owing to the refusal of the Council to grant funds when the case was first presented to them. The procedure for the submission of forecast reports requires revision, as the period which in pre-reform days was sufficient to permit of preliminaries being settled, no longer suffices now that the forecast reports, after being approved by the revenue authorities, are submitted for the sanction of the Standing Finance Committee and acceptance by the Council before the final orders of Government can be passed.

During the year the committee appointed to consider amendments of the Land Revenue Act held several meetings; and at the sitting of the Punjab Legislative Council held on 1st August, 1921, the Hon'ble Member for Revenue gave an undertaking that "*whatever decisions of the Local Government on the report of the committee are those benefits if granted will be given to the assesses on the last assessments that have taken place*:" and explained that by the term '*last assessments*' he meant "*settlements which may be started in the future.*"

13. The subordinate staff of the Sirsa settlement in the Hissar district came under reduction in March and was transferred to other settlements. The Settlement Officer remained and after receipt of Government orders a small staff was again collected for the work of distribution of the demand over holdings (*bachh*). In Shahpur the settlement staff consisted of one Settlement Officer, one Extra Assistant Settlement Officer, two Tahsildars, two Office and five Field Naib Tahsildars, eight Field and 7 Office Kanungos, together with temporary establishment.

In Lyallpur only a small staff consisting of one Settlement Officer, one Extra Assistant Settlement Officer, one Settlement Tahsildar, 3 Naib Tahsildars and 13 Settlement Kanungos, of whom six were employed in the field and a small temporary

establishment was required. This settlement is working under novel conditions as the orders of Government were to work to the standard already set by the recent reassessment of the Rakh Branch. Work has therefore been considerably simplified.

In the Jhang Colony no additional Patwaris were required, but the existing number of district Field Kanungos, was strengthened by the addition of 6 Settlement Field Kanungos. Two Settlement Naib Tahsildars, one for the portion of the colony lying within the Chiniot tahsil and the other for the portion of the colony lying in the Jhang and Shorkot tahsils, were employed. One Tahsildar only was engaged.

Settlement operations have been in full swing in the Muzaffargarh district throughout the year. Last year's staff was supplemented by an addition of 2 Tahsildars, 8 Naib Tahsildars and 32 Kanungos with temporary establishment as Kot Adu and Leiah tahsils were taken up with effect from 1st October, 1921. With a view to the supervision of measurement work in these 2 tahsils, a second Extra Assistant Settlement Officer with the usual subordinate staff was also sanctioned for a period of six months with effect from the same date.

14. The Punjab Riverain Survey Party continued the work of traversing and laying down base lines.   
 Survey. Two thousand two hundred and sixty nine linear and 413 square miles of minor traverse in the Indus, Chenab and Panjnad riverain tracts of the Muzaffargarh district were completed, and 10,284 theodolite stations in 84 villages were fixed. Two hundred and thirteen corners of 71 squares in 246 square miles were demarcated with permanent mark-stones on both banks of the Panjnad river in the Muzaffargarh district and Bahawalpur State, to serve as a basis for the survey and demarcation of boundaries and fields now in the bed of the river. Twenty seven missing stones of 9 old base lines along the Indus river in Muzaffargarh district were relaid at the request of the Settlement Officer, Muzaffargarh. Eleven hundred and fifty-four plotted and four hundred and fifty-three boundary "*massavis*" (Settlement mapping sheets) on the scale of 1/2640 and twenty-eight 4 inch were traced and supplied to the Settlement Officer, Muzaffargarh. Besides these five hundred and sixty-four boundary "*massavis*" were partly compiled on the scale of 1 inch = 220 feet for the next season's work and two hundred and fifty-seven miscellaneous traces were prepared, all the traverse stations marked during the field season were plotted on the twenty-eight 4 inch sheets. The total expenditure of the party on the riverain survey was Rs. 1,02,661.

The party also carried out a survey in Lahore City, at the request of the Deputy Commissioner, in connection with the Lahore City Extension Scheme and at Khaur in Attock, in continuation of last year's work, for the Attock Oil Company.

Topographical Survey Operations were continued under No. 1 Party (Northern Circle) of the Survey of India. Triangulation was completed over two thousand three hundred square miles preparatory to a detailed survey which will be carried out partly on the 1 inch scale and partly on  $\frac{1}{2}$  inch scale, along the western border of the Dera Ghazi Khan district. The Sind Sagar Party carried out Rectangular Survey Operations in connection with the Sutlej Valley Irrigation Project. Forty-six, 2,400 acre rectangles (partial and complete) in Multan district were broken up into four thousand and twenty, 25 acre rectangles over an area of 139.4 square miles and one hundred and sixty seven 2,400 acre rectangles (partial and complete) in the Multan and Montgomery districts, were broken up into nine thousand one hundred and fifty nine, 100 acre rectangles over an area of 1,448.8 square miles making a total of 1,588.2 square miles demarcated, also one hundred and thirty three 2,100 acre rectangles (partial and complete) were demarcated in advance for sub-demarcation to 100 acre rectangles next field season. In addition 892.68 linear miles of traverse were run in the Multan district for the purpose of laying down the main corner stones of 2,400 acre rectangles and 307 such corner stones were embedded. The total cost of the rectangulation has been Rs. 2,77,404.\* Of the Rs. 2,06,603 spent last year by the Sind Sagar Party on Rectangular Survey Operations in connection with the Nili Bar (Sutlej Valley) Canal and Colonization Project Rs. 65,899 is debitable to the Nili Bar (Sutlej Valley) project and the balance to the Sind Sagar project. This information was received too late for inclusion in last year's Land Revenue Report. Rectangular Survey operations in connection with the Sutlej Valley Irrigation project were commenced by the Sind Sagar Party in Bahawalpur State. Seven hundred and twenty eight 20 linear miles of traverse were run for the purpose of laying down the main corner stones of 2,400 acre rectangles, and 136 such corner stones were embedded. The cost of the operation for the financial year 1921-22 was Rs. 4,841.

Precise levelling was carried out as follows :—

(a) 430 miles of primary levelling *viz* :—

(i) 357 miles of revision levelling to revise the following old lines :—

(1) Old lines 57-C Reti to Khanpur.

---

\* The figure of cost quoted in last year's report as Rs. 7,88,733 was subsequently corrected to Rs. **7,22,684**

(2) „ „ 57 Khanpur to Bahawalpur.

(3) Old lines 57-D Bahawalpur to Multan.

(4) „ „ 55-A Multan to Jhang.

(ii) 73 miles of new level line for the new level net from Khanpur *via* Islamgarh up to Jaisalmer State Boundary.

(b) 44 miles of secondary levelling along the road from Wazirabad to Suchitgarh, undertaken to complete the circuit of levels in Kashmir.

15. The boundary pillars dividing the Jammu and Kashmir State territory from the Sialkot district were inspected during the year by the Revenue Assistant in company with the Wazir-i-Wazarat, Jammu and proposals for the erection of new pillars have been sent to the Settlement Commissioner, Jammu, for consideration.

The result of the demarcation of the boundary between the Jhelum district and Jammu and Kashmir State, showed that an area measuring 12 kanals should be transferred from the State to British Territory, but possession has not as yet been made over.

The correctness of the maps of the recent settlement showing the boundary between the Sirmoor State and the Ambala district was disputed by the State authorities. The matter is still under investigation.

16. Accommodation is insufficient in a few districts particularly those where settlements are nearing completion or have been recently completed. Owing to the financial stringency only such additions as are essential are being undertaken. In Hissar a new room has been built for the Sadr Kanungo; but the accommodation is still inadequate. In Sheikhpura a large room has been provided and the re-arrangement of records is in progress. The new building in Jhelum is under construction. The Sialkot and Gujranwala Record Rooms have yet to be rebuilt. The settlement records of the Pakpattan tahsil have not yet been filed at Sadr. Action is being taken in this connection.

Destruction work in general progresses satisfactorily. Arrears are heavy in Multan where strenuous efforts are being made to get level with the work. Slight damage to records by white ants is reported from Jhelum.

The working of the Copying Agency is generally satisfactory, except for the fact that several districts report expenditure in excess of income. This is particularly noticeable in Lahore where the excess is Rs. 8,282-7-10. The matter is under enquiry. Income has decreased in certain districts in spite of the increase in fees. In Lyallpur the decrease of Rs. 2,548-6-6 is attributed to slackness in trade and business generally: and these causes probably account for the general fall in income throughout the Province. Difficulty has been experienced in the collection of fees on copies sent by V. P. P. Rules already exist under which fees on revenue records can be realised as an arrear of land revenue. These rules are being brought up to date and the attention of district officers will be drawn to them as the existence of any such rules is not generally known. The imprest with the Copying Agent is in some districts insufficient and the Examiner, Local Fund Accounts, has been asked to report where and to what extent imprests should be increased.

The services of the Special Kanungos appointed with a view to making Revenue Records more easily accessible to litigants are being freely utilized and applications are beginning to come in for the appointment of Assistants. The system is open to abuses both by the courts, who are inclined to ask for opinions from the Kanungo instead of evidence as to records only, and by the public, who are disposed to treat the Special Kanungo as a referee instead of as an investigator. The danger of champerty has also to be guarded against. With improved supervision the system may become satisfactory.

17. Land and other revenue paid by money order amounted to Rs. 25.38 lakhs in 27 districts against Rs. 27.75 lakhs in 26 districts last year. The Fazilka tahsil of the Ferozepore district shows a drop of Rs. 2.45 lakhs, which the Commissioner attributes to the shortage of money in circulation owing to a slump in the wool trade and a desire to save the postal commission. The Karnal district also shows a drop of Rs. 4.35 lakhs. The local authorities suggest that difficulties with the Postal Department accounted for this. Further enquiries are being made and the Financial Commissioners are not at present prepared to give an opinion on the point. The districts in which the largest amounts were paid by money order were:—Gurgaon Rs. 2.69 lakhs, Karnal Rs. 2.58 lakhs, Sheikhpura Rs. 2 lakhs, Muzaffargarh Rs. 1.66 lakhs. Apart from the amount paid by money order, Rs. 8.64 lakhs in currency notes

Other matters.  
(a)—General.

were sent by insured post in 18 districts, against Rs. 6.03 lakhs in 21 districts last year. The districts in which the largest payments by this means were made were :—Sheikhpura Rs. 1.72 lakhs, Attock Rs. 1.59 lakhs, Sialkot Rs. 1.44 lakhs. The Deputy Commissioners of Hissar, Karnal, Ambala, Ferozepore, Mianwali, Jhang, Multan and Dera Ghazi Khan have not reported on this point. Except in the Karnal district and the Fazilka tahsil as explained above the system of paying in land revenue by money order continues to gain in popularity, particularly in the case of villages distant from tahsil headquarters. As an exception, the Commissioner of Multan notices that lambardars who have to pay in large sums prefer to bring the money to the tahsil in person; partly because they have not complete confidence in the post, partly because it is cheaper to do so, and partly because by doing so the payer gets his receipt on the spot and goes home satisfied, whereas otherwise he has to wait for several days for the money order receipt, during which period he is oppressed by the possibility that some one other than the addressee may have received the money. These considerations apply with even greater force to payments made by currency notes enclosed in insured letters, where there is the added apprehension that the packets may be tampered with in transit. On the other hand small revenue payers, living at a distance from tahsil headquarters, find it more economical to use the post office than make a personal journey to the tahsil where there is a danger of delay and inconvenience. The Deputy Commissioner, Attock, reports that one objection to the payment of land revenue by money order seems to be that it enables lambardars to avoid punctuality in the payment of Chowkidars' dues. Complaints that Chowkidars are not getting their salaries punctually have been not uncommon, and an enquiry is being made.

During the year the Punjab Drainage Board held four meetings, at which the following schemes were considered and dealt with :—

(b)—Drainage Board.

(a) *Hudiarra Nallah, Amritsar district*.—Detailed designs and estimates for the scheme recommended by the Drainage Board and approved by the Local Government, were finally worked out by the Irrigation Department and checked by the Drainage Board Engineer.

A small emergent work to improve the Nallah immediately downstream of the recently constructed Amritsar City Outfall Drain, is being carried out by the Canal Department, in order to ensure the free escape of water from the Amritsar City Outfall Drain at its point of junction with the Hudiarra Nallah.

(b) *Sarusti Nallah, Karnal district.*—The scheme for training the Sarusti Nallah and improving its alignment and outfall to the Para river, a tributary of the Ghaggar, was considered and some improvements made on the project administratively approved previously. The total estimated cost is Rs. 4,40,000 of which the District Board is to contribute one lakh and Government the remainder. The District Board, in March 1922, was credited with Rs. 89,414 and the work put in hand.

(c) *Aik Nallah, Sialkot district.*—The proposals for training the Aik Nallah in the Sialkot district, in order to prevent damage caused by flooding in the Daska and Wazirabad tahsils were further considered by the Drainage Board, and on their recommendation additional surveys were put in hand and a record of discharges during the monsoon maintained by the Irrigation Department.

Statistic figures of irrigation from the Nallah were collected by the Deputy Commissioner, and plans prepared by the Drainage Board Engineer showing the villages affected by such irrigation, so that in the final scheme for training the Aik Nallah, vested interests in irrigation from it, may not be unduly interfered with.

Meanwhile the Drainage of Sambrial town has been taken in hand by the Irrigation Department, in order to give local relief as early as possible.

(d) *Floods in the Gurgaon district and round the town of Palwal.*—During the year surveys were commenced in the Gurgaon district, in order to obtain correct and contoured plans of those portions of the district subjected to inundation, particularly in the neighbourhood of the town of Palwal, and also in other parts of the district subjected to flooding through defective bunds constructed many years ago, but not maintained on up-to-date lines.

(e) *Drainage Scheme for the Dasuya tahsil, Hoshiarpur district.*—Owing to the financial stringency it was not found possible to establish in the Dasuya tahsil, the Survey Sub-Division estimated to cost Rs. 41,000 spread over two years, which had been administratively approved by the Drainage Board.

(f) *Lahore Cantonment Storm Water Drainage Scheme.*—The Military authorities have completed a scheme for the internal drainage of Lahore Cantonment, having its outfall into the Chauburji Nallah at the west side of the Cantonment. The improvement of the Nallah into the river Ravi, in order to provide

a sufficient escape for the storm water, and also to relieve area flooded between Chauburji and the river, had in the previous year been administratively approved by the Drainage Board, and during the year under review further detailed surveys were made by the Irrigation Department and completed. The scheme involves the acquisition of land in a fertile tract and enquiries as to cost have not yet been completed.

(g) *Raniwah Drainage Scheme, Shahpur district.*—A scheme for improving the Raniwah Nallah, a natural drainage running parallel with the Jhelum river, and between it and the Lower Jhelum Canal, for a length of 129 miles, was prepared by the Irrigation Department, and has been approved by the Drainage Board. It is not considered of such pressing urgency as other schemes in the Punjab, particularly as the owners of certain private canals which cross the line of drainage view the project with apprehension.

(h) *Scientific and Experimental Work. Waterproof lining of Canals.*—Experiments on Bitumen as a material for lining canals were continued at Rasul during the hot weather of 1922. An experimental tank was lined with slabs consisting of 20 per cent. of Bitumen, mixed and compressed with 80 per cent. of ordinary spoil earth (as the aggregate) taken from the spoil bank of the Lower Jhelum Canal. It was found that this tank was not impervious to leakage owing to the difficulty of making a water-tight joint between the slabs, but this difficulty was overcome by unwatering the tank and painting the slab lining over with a coat of pure Bitumen one-tenth inch thick, when the tank was refilled and did not show any serious leakage, all that was detected amounted to only half cusec per million square feet of wetted area.

Temperature tests were also made by exposing the slabs to the full force of the sun's rays, when it was found that at a temperature of 154° F., the slabs on the side slopes of the tank become soft and bulged. This showed that the special grades of Bitumen supplied by the Standard Oil Company of New York, did not comply with the Drainage Board Specification, which required a grade able to stand a range of temperature from 25° to 190° F.

An expert from the Standard Oil Company was at Rasul during the tests and he has left for New York, taking with him the data obtained and he expressed the opinion that his company could produce a grade of Bitumen that would withstand the climatic conditions in the Punjab.

The experiments at Rasul initiated by the Drainage Board have focussed attention on Bitumen (a substance never before tried in the Punjab) as being likely from its qualities to provide the material for lining and rendering water-proof the bed and side slopes of channels excavated in earth, and thereby saving water lost in absorption, and also reclaiming land water-logged by seepage from irrigation canals.

The Drainage Board Scholar, Mr. Puri, has satisfactorily prosecuted his research work with regard to the mechanism of water-logging and the flow of water in soils of variable nature, at the Lawes Agricultural Trust, Harpenden, England. As the period of the tenancy of the scholarship, initially granted, expired on 28th February, 1923, and as also the Board in view of the satisfactory reports received desired that the scholarship should be continued for a further period of 12 months, viz., up to 29th February, 1924, an application has been made to Government for this extension, necessary provision having accordingly been made in the Budget for 1923-24.

(i). *Water-logging in Irrigated tracts.*—The Drainage Board took up the investigation of cases of waterlogging in irrigated tracts caused by seepage from the main and branch canals. Enquiries are proceeding.

During the year under report each of the two sections of the Board of Economic Inquiry, Punjab, viz., the Urban and the Rural, met once, but the Joint Board did not meet.

(c)—The Board of Economic Inquiry.

Orders on the resolution of the Joint Board regarding the auditing of its accounts, mention whereof was made in last year's report, have since been received from Government who have declared that the Board of Economic Inquiry is a non-official body and that its accounts may be audited by certified auditors, subject to the submission of their Annual Audit Report to Government for information.

The Urban Section has in the press a volume on the subject of the family budgets of clerks, and the results of the enquiry which it has conducted into the economic conditions governing the lives of clerks drawing not more than Rs. 50 per mensem and of factory employees are being sifted and consolidated. The Section was consulted by the Government on the question of the future of Trade Unions in India.

Professor R. L. Bhalla's detailed enquiry into the conditions of life in a typical agricultural village in the Hoshiarpur district

has resulted in a report which has been published by the Rural Section. The volume is on sale to the public at the nominal price of Re. 1 per copy.

18. The number of suits for enhancement of rent which last year reached the abnormally high figure of 1,086 fell to 755. Cases were most frequent in Hoshiarpur, Gurdaspur and Jullundur. In the Province as a whole approximately 87 per cent. of the suits were successful.

Enhancement of rent.  
Statement XV.

This litigation reflects partly the general rise in prices of produce, and consequently in cash rents, and partly the changing of economic conditions. As pressure on the soil increases, and communications are opened up, village communities are brought into closer relations with town life and those friendly and family leases on nominal rents and for generous terms which characterised the country side in the last generation are fast becoming replaced by business like contracts based on a shrewd evaluation of present profits and future markets.

19. The number of fresh decrees for ejectment of occupancy tenants—thirty one in all—is still insignificant though five more than last year.

Ejectments.  
Statement XVI.

Execution cases fell from 51 to 43.

There was no large variation in the number of decrees for ejectment passed, and orders of ejectment given against tenants-at-will, the actual figures being 2,142 as against 1,968, and 5,499 as against 5,119, respectively. Hissar is still the district in which these cases are most common; landlords there being apparently obsessed with the fear lest continuous tenancy should crystallize into some sort of occupancy right.

Rohtak shows an increase in the number of cases, and the reason given is that the increased profits of agriculture have made it possible for landlords to obtain new tenants willing to pay a higher rent than that which those in occupation are prepared to afford, at any rate unless and until they are threatened by legal process.

In Sialkot the increase is attributed to the fact that applications which would have been filed had it not been for the drought of the previous year, were instituted during the year under report, when the season was more favourable.

20. No jagir was notified during the year under the Descent of Jagirs Act. The number of jagirs notified under the Act thus remains at 149.

Descent of Jagirs Act.

21. As already observed, the climatic conditions of last year were most unfavourable and the drought continued till the bursting of the monsoon on July 11th. By this date most of the autumn sowings had been completed, and a larger area had in necessary prudence been devoted to fodder than would have been allotted had it been possible to forecast the generous rainfall that followed. There was therefore a particularly keen demand for watering for the spring harvest and the total irrigated area for the year exceeded last year's figure by 971,966 acres. Of the 31·02 million acres cropped in the province,  $11\frac{1}{4}$  millions or 36 per cent. received irrigation.

The estimated average value of the crops raised on all canals during the year works out at Rs. 67,20,65,032, giving an average rate of Rs. 63 per acre assessed. The total value, according to this estimate, amounts to a little over 2·9 times the total capital outlay on all the canal systems up to date. Seven miles were added to the length of channels in operation thereby raising the total to 19,729 miles at the end of March 1922.

As regards the future, the year will be memorable on account of the receipt therein of the Secretary of State's sanction to the Sutlej Valley Project.

The evil of water-logging continues to spread on the Upper Chenab and Upper Jhelum Canals. On the Upper Chenab Canal it is making its appearance near Harpoki and at the tail below Mangtanwala, and also in the reach along the Main Line Upper and near Chichoki Malian, Main Line Lower, while on the Upper Jhelum Canal it is spreading in the reach of the canal below Khokhra between miles 53 and 63. The remedial measures hitherto adopted of cutting off irrigation on the one hand and on the other of intersecting the affected areas by surface drains and discharging them into one or other of the natural drainages has resulted in some improvement on the Upper Jhelum Canal, but on the Upper Chenab Canal its working is hampered by the obstructions put into the nallahs by zamindars in order to secure flow irrigation during the autumn. On the Upper Chenab Canal Rs. 61,000 were paid during the year for damage done by water-logging along the Main Line Upper below Marala. Since the construction of the drains, however, an improvement is visible and areas previously water-logged are again coming under the plough. When these drains are fully completed and improvements made, such as deepening and widening the drains and removing the obstructions put into the outfalls by the zamindars, the Irrigation

Department hopes that this area will be entirely re-claimed and further claims for compensation obviated. The Aik Nallah problem still remains unsettled but so far as the canal-irrigated tract is concerned steps are being taken to construct drainage works on the Nokhar Branch and its distributaries whereby the flooding now occasioned by the overflow from the Nallah will be entirely removed.

On the Lower Chenab Canal further proposals for reducing the swamp area in the Hafizabad tahsil of the Gujranwala district were considered and estimates for extending and clearing drains were in hand. Proposals for restricting irrigation on some distributaries as a precaution against swamping are also being worked out.

The Financial Commissioners are not satisfied that the methods adopted by the Irrigation Department will prove a universal panacea. For certain classes of soils and for certain geographical conditions the remedy is undoubtedly effectual: but it is yet to be established that the drains as at present designed will restore areas where the water-logged area is below the level of a main canal on one side and a river or other natural drainage on another. In such cases it is contended that the cause of the evil is the seepage from the main canal, and not excessive watering by irrigators, and though the action of the Irrigation Department in closing distributaries where seepage drains are cut may slightly reduce the water level it will certainly aggravate the efflorescence of saltpetre and general deterioration of the soil. A waterproof lining of the main canal would appear to be the ideal solution, could satisfactory material be found. This and all other aspects of the case are being closely investigated by the Drainage Board.

The working of the Shahpur canals showed an improvement. The water advantage rate and canal royalty rate imposed on the private canals of this district, amounted to Rs. 32,844 and Rs. 26,726 as compared with Rs. 25,131 and Rs. 18,109, respectively. The running of the Upper Sutlej Inundation Canal in the Montgomery district was satisfactory on the whole. The area matured during the year was 262,008 acres against 176,328 acres in the preceding year, and the amount of advantage rate realized including that assessed on the area irrigated by the Lower Bari Doab Canal was Rs. 2,40,330 against Rs. 1,82,068 last year. Canal supplies were fairly satisfactory generally throughout the Jhang district. A strong Committee was appointed by the Legislative Council to consider the working of the Inundation Canals in the Multan district but it has not yet

reported. These canals worked satisfactorily during the year under report. The Sidhnai series matured an area of 191,848 acres against 112,379 acres last year and a revenue of Rs. 5,59,060 was realized against Rs. 3,53,484 last year. The Chenab series matured 107,589 acres against 63,393 acres, and the Sutlej series (excluding the Hajiwah) 793,973 acres against 126,364 acres. The consolidated land revenue and water rate on these two systems amounted to Rs. 3,64,322 and Rs. 4,01,616 against Rs. 1,54,416 and Rs. 2,93,364, respectively.

The Hajiwah matured an area of 14,764 acres against Rs. 17,578 last year and realized a consolidated revenue of Rs. 15,278 against Rs. 18,968 last year. The Chenab and Indus series in Muzaffargarh were all open by the 15th May which is favourably early. The area irrigated by them was, however, only 336,268 acres against 359,364 last year. The amount of consolidated land revenue and water rates from both series of inundation canals during the year was Rs. 2,37 lakhs against Rs. 2,35 lakhs last year.

The inundation canals in the Dera Ghazi Khan district all continued to flow until the beginning of October 1921. The autumn irrigation, however, was disturbed considerably by heavy floods following the August rains. In consequence the consolidated income from owner's and water rates realized during the year dropped from Rs. 2,75,618 to Rs. 2,63,319.

22. Canals under district management generally shared in the reviving prosperity.

The Rangoi Canal in the Hissar district, though it irrigated 1,276 (1,128 in spring and 148 in autumn) against 25 acres last year, is not working satisfactorily. The reason is the fact that its level at the head is too high to admit a flow of water from the Ghaggar except when the latter is in flood. The District Board cannot at present provide funds for the necessary deepening of the channel.

The area matured by the Gurgaon bunds rose from 916 acres last year to 4,895 acres in the year under report and in consequence the income improved from Rs. 1,674 to Rs. 7,849. The increase is due partly to good rains and partly to closer supervision of the revenue staff. The cost of maintenance was Rs. 20,961 against Rs. 5,350 in the preceding year. The increase is due to the fact that heavy rains at the end of last year did considerable damage to the bunds, which were repaired this year.

These bunds are 32 in number and comprise a complicated, and in some respects an incomplete system. The survey referred to in last year's report which was originally intended to facilitate a scheme to provide for the drainage and security of Palwal town was extended, and a contour map is being prepared, partly from funds provided by the Drainage Board, of all the area in Ballabgarh, Palwal, Nuh and Firozpur-Jhirka which is subject to flooding.

The area irrigated by the Sarusti canal in the Karnal district rose to 66,651 acres from the 17,493 acres of last year.

In Kangra there was generally sufficient water in the water channels (*kuhls*) and disputes were satisfactorily few.

In Hoshiarpur on the Shah Nahr Canal the irrigated area fell to 15,172 acres from 15,536 acres last year, but the matured area rose to 14,463 acres as against 13,338 last year. The total receipts were Rs. 30,514 and the expenditure Rs. 28,521 compared with Rs. 28,491 and Rs. 26,910, respectively, in the previous year. The increase in expenditure of Rs. 1,607 is mainly due to enhanced pay allowed to the permanent canal staff. Some new works are under contemplation.

In Ferozepore the river proved favourable to the Grey Canals and the year's figures exceeded by 41,481 acres those of last year. Receipts from water advantage rate similarly rose to Rs. 62,420 from Rs. 37,624.

In Mianwali, owing to an abundant rainfall over the Nammal Catchment Area in the monsoon of 1921, the supply in the reservoir was 849 million cubic feet. The total area irrigated this year was 12,113 acres, a great improvement, both on the 4,349 acres irrigated last year and the 5,909 acres irrigated the year before. The cusec duty in the Spring crop 1921-22 was 247 acres, and the average depth of water over the area irrigated was 1.40 feet against 2.34 and 1.63 respectively in the preceding years.

The Kitchen and Irving Canals and the Mehdi Khan Canal of the Montgomery district were disappointing. The area irrigated and matured by the former which began to flow in June and closed by the end of September was 21,399 and 16,066 acres as against 22,363 and 13,572 acres last year. As regards the latter, the area irrigated and matured was 891 and 609 acres as against 2,569 and 1,316 acres in the preceding year. The marked decrease was due to a defect in the head which delayed the opening of the canal till the middle of July, and resulted in

flow ceasing on the 20th September. The total amount of canal revenue was Rs. 20,044 against Rs. 21,269 last year. Expenditure on repairs and maintenance showed an increase of Rs. 4,595.

Other works in Montgomery district to which the provisions of the Punjab Minor Canals Act do not apply are:— (1) Sanateke Bund, (2) Tibbi Bund and (3) George Cut. They did not do so well as last year, when the area flooded and matured by these bunds was 14,407 and 12,630 acres against 12,625 and 11,862 in this.

The Gark and Garkna Canals from the Ravi irrigated and matured an area of 1,867 and 1,310 acres in the year, against 2,358 and 1,311 acres in the preceding year. The income derived therefrom was Rs. 655 against Rs. 512 last year.

The hill torrents in Dera Ghazi Khan district did very well in the summer of 1921 and the Pachad crops were good. The opening balance on account of *nagha* (canal clearance) fund was Rs. 1,510. The total collections were Rs. 4,896 and cost of establishment, etc., amounted to Rs. 4,362. A balance of Rs. 2,044 remains at the close of the year under report.

23. The administration of the Act for the year 1921-22 was satisfactory and calls for no special remarks. Land Acquisition Act, 1 of 1894. Four thousand four hundred and sixty acres were acquired for various public purposes at a cost of Rs. 12,63,926 as against 2,402 acres at a cost of Rs. 11,59,460 last year, the increase being mainly due to the commencement of the Lower Sutlej Canal Project. The total average sale price per acre was Rs. 283 as compared with Rs. 483 in the previous year. The highest rate paid was Rs. 1,44,000 per acre for a strip of land measuring 0011 acre acquired for the Sialkot Municipal Committee for a fruit market in the heart of Sialkot City.

The most important cases of acquisition were of 2,645 acres in the Montgomery district for the Sulemanki head works of the Sutlej Valley Project, 703 acres in the Rawalpindi district, mostly for Military purposes at Chaklala, and 286 acres at Sheikhpura for the new district headquarters. Most of the owners in the Montgomery district have refused money compensation and efforts are being made to find them land. Government has undertaken to offer grants of suitable land in British territory on the projected Lower Sutlej Canal of value approximately equal to but not less than the amount of the cash compensation due to any person or persons, the descendants of one parental grandfather, the cash compensation due to whom

is not less than Rs. 1,250. The valuation of the land offered will be that which may be adopted as the purchase price of land allotted on peasant terms. In the case of the land occupied for the Sheikhpura district headquarters the Punjab Government have agreed to the substitution of the principle of acre for acre of equally good land to that of value for value previously adopted. The expropriated owners are being offered an equivalent area in one of the returned cavalry runs.

There was an increase from 58 to 104 in the number of cases of occupation of land for which compensation had not been paid at the end of the year.

The area surrendered was 167 acres. Only in one case, and that in the Kangra district did the original owners refuse to accept restoration under the rules. In that case the land was sold by public auction.

24. At the close of last year there were outstanding Rs. 13.89 lakhs granted as loans under Act XIX of 1883, of which Rs. 4.13 lakhs represented the year's distribution. In the year under report Rs. 4.05 lakhs only were distributed, principally in Ferozepore, Gurgaon and Multan. The general tendency of the Province is in the direction of relying for assistance in agriculture less upon State aid and more upon Co-operative Societies and private finance. In Simla, Shahpur, Lyallpur and Kangra no loans at all were distributed. Total collections amounted to Rs. 1.69 lakhs leaving a balance of Rs. 16.24 lakhs outstanding at the end of the year. Of this sum Rs. 26,437 were arrears of principal an increase of Rs. 14,507 over the corresponding amount last year which is accounted for chiefly by suspensions in Ferozepore and Mianwali.

Arrears of interest at the end of the year under report amounted to Rs. 13,386. The interest realized was Rs. 4-14-2 per cent. on the mean balance as against a decennial average of Rs. 5-12-3. The figures reflect the bad harvest of the preceding year. The better harvest of this should result in improved collections next year.

Loans were mostly taken for construction of wells for irrigation purposes. They were faithfully applied to the purpose for which they were borrowed and the instalments as a rule punctually paid. Only in one district was penal interest charged, and in one other was it found necessary to issue process to recover a loan, advanced for well sinking, after the expiry of the prescribed period. In the province as a whole 4,255 new

Wells were sunk without advances, 1,098 more than last year, while the number sunk with the aid of advances has increased from 257 to 362.

Remissions of land revenue were given for 1,495 wells which fell out of use, against 1,793 in the previous year.

25. At the close of last year there were outstanding Rs. 38.71 lakhs granted as loans under Act XII of 1884, of which Rs. 35.02 lakhs represented the year's distribution.

Loans under the Agriculturists' Loans Act, XII of 1884.  
Statements Nos. XVIII and XX.

In the year under report thanks to the better season, and the improved condition of the people, Rs. 20.32 lakhs only were distributed: principally in Hissar (Rs. 3,47,571), Gurgaon (Rs. 2,88,840), Attock (Rs. 2,70,454), Multan (Rs. 2,19,410), Mianwali (Rs. 1,11,980), Rawalpindi (Rs. 1,02,797) and Muzaffargarh (Rs. 1,01,300). Collections amounted to Rs. 28.35 lakhs leaving a balance of Rs. 30.68 lakhs outstanding at the end of the year. Of this sum, Rs. 17.32 lakhs were arrears of principal: a figure higher by Rs. 16.24 lakhs than the corresponding amount last year, and to be accounted for chiefly by the heavy suspensions (Rs. 11.77 lakhs) in Hissar. Arrears in Jhelum total Rs. 1,23,930 of which Rs. 97,000 are due from Chakwal tahsil. The arrears in Dera Ghazi Khan amount to Rs. 27,779 and are not very large, but the Deputy Commissioner observes that taccavi given to Tumandars for distribution among their tribesmen is extraordinarily hard to recover, while from the Gurchani tribe he has found it almost impossible, and remarks "It is a mistake to give them anything except as a free gift."

Arrears of interest at the end of the year under report amounted to Rs. 25,765. The interest realized was Rs. 3-6-6 per cent. on the mean balance as against a decennial average of Rs. 4-3-10.

26. In the following districts separate forest establishments are maintained under the control of the Deputy Commissioner for the management of Forest areas:—Kangra, Rohtak, Gurgaon, Gurdaspur, Attock, Hoshiarpur, Muzaffargarh, Hissar, Mianwali, Dera Ghazi Khan, Ambala, Rawalpindi and Jhelum. In other districts the supervision of Government waste lands and the auctioning of the grazing therefrom is part of the ordinary duties of the Revenue staff.

Forest Act and Government lands.  
Statement XXIII.

The area this year shows an increase of 209,544 acres over the figures of last year. At the close of 1920, 325,132 acres of

Forest areas in the 5 tahsils of the Kangra district were transferred from the Forest department to the Civil department under the Deputy Commissioner. Though reference was made to this transfer in the Report last year the figures were not given in the statistics. The total forest area now under the control of the Deputy Commissioner of Kangra is 324,857 acres. The reduction in the area handed over is due to the breaking up of forest lands for cultivation. As explained in the 1920 Report these forests are managed through local Forest Committees which assist the Naib-Tahsildar in charge. This experiment in local-self government requires further experience before it can safely be pronounced a success. The Committees are useful in advising the zamindars and influencing them in the direction of the regeneration and conservancy of the forests and it was possible to effect four new closures comprising an area of 82 acres. At the same time the double management had in some places resulted in double inconvenience to the zamindars. The total income from these Kangra forests was Rs. 24,135.

The extension of colonization in the Lower Bari Doab Colony, the Sohag Para Colony and in Sheikhpura has resulted in some 60,000 acres being handed over for cultivation.

In Gurdaspur the forests concerned are the Shahpur Kandi forests, the accounts of which continue to appear in the Budget although the soil is the property of the zamindars and the extent of Government control is limited to supervision on behalf and with the assistance of the proprietors. The estate continues to prosper and develop. The income rose from Rs. 9,488 last year to Rs. 14,208. Resin operations are the most important activity and 1,114 maunds of resin were collected at a gross cost of Rs. 7,194 and sold at a net profit of Rs. 3,114. A new departure has been the opening of a store house for fuel and charcoal at Dunera, a promising venture. The abolition of the Chenab Forest Division was under consideration during the year and although the Forest Division has not yet been formally dissolved, active steps are being taken for the transfer of some 257,337 acres of dry flat rakhs in the Thal and Khushab ranges to the control of the Deputy Commissioners of Shahpur, Gujrat, Sialkot and Gujranwala.

In Mianwali approximately 48,357 acres continued to be given out on temporary cultivation. The Commissioner has, however, made a report that tenants are beginning to consider that they have acquired rights in this area, and having regard to the necessity of preserving all Government rights in lands that may fall within the scope of the Sind Sagar Canal scheme, the Financial Commissioners have under consideration the closing of these rakhs to temporary cultivation.

In Gujranwala 5 rakhs formerly under the control of the Forest Department, were transferred to the charge of the Deputy Commissioner with effect from 1st August. The original intention was to lease them on temporary cultivation to persons whose lands have been spoiled by water-logging : but as arrangements for their irrigation could not be completed, it was impossible to give more than grazing leases. In the Beranwala reservoir out of 2,532 acres, 1,878 acres have been allotted to permanent colonists and 268 acres given out on temporary cultivation.

The Lahore district contains 30 unclassed forests. Of these 29 forests were wholly or partially let on leases for ordinary cultivation. The sale proceeds of grass amounted to Rs. 10,940 against Rs. 8,475 for the preceding year. Rakh Chandrai, was given out on a special 40 years' lease for Dairy Farming purposes.

In Dera Ghazi Khan the Dhundi estate shows an increased revenue of Rs. 42,381.

For the year under report the total income from lands dealt with in this paragraph, amounted to Rs. 71,44,105 compared with Rs. 71,35,650 last year and an average income of Rs. 78,97,802 for the last five years.

27. Last year's report explained the preparatory measures which had been adopted for reafforestation of the Siwaliks in the Ambala district. The two plots, one of 20 acres at Darra Kharoni in the Kharar tahsil, and the other of 26 acres at Sanana in the Rupar tahsil have progressed most favourably. The *kikar* and the *shisham* plantations are flourishing, and the *babar* grass has successfully germinated. The agitation against the proposed expropriation of Gujar owners has subsided and illicit grazing is on the decline. Three more plots have been selected for re-afforestation, one of 92 acres at Kausal in the Kharar tahsil and two of 70 and 38 acres, respectively, at Fatehpur and Bhogian in the Rupar tahsil. A staff of two Jamadars at Rs. 19 and 30 Beldars at Rs. 16 per mensem each was employed in each tahsil. Altogether 41,437 trenches and dams were constructed and planted with *kikar* and *shisham* and in some places with *khair* and *babar*. The drought of July and August was compensated by the ample rains of September, and germination has been satisfactory throughout though some of the dams were washed away. A portion of the area reclaimed was fenced with thorn bushes and produced a useful crop of grass.

There were 11 cases reported under the Act resulting in 9 convictions and 2 acquittals.

Punjab Land Preservation  
(Chos) Act.

In Hoshiarpur thanks to the excellent monsoon, the crop of grass was exceptionally good, and the owners of the villages protected by the Act reaped handsome profits from grazing fees and sale of grass. Considerable damage, however, was caused by floods in places where new land was in process of formation as a result of reclamation.

The Chos Act and connected problems have been the subject of criticisms in the Council and a special enquiry is being conducted by the Commissioner of the Division.

28. The total area of the Province according to the entries in the latest revenue records is 56,346,550 acres. Of this nearly 35 million acres are owned by agricultural tribes over  $5\frac{1}{2}$  million acres by "Others" and approximately  $16\frac{1}{2}$  million acres are divided between common lands, village sites and Government property. There has been a decrease as compared with the figures recorded in the same statement in the previous year of 10,639 acres in the gross and 97,400 acres in the cultivated area. Only the five districts of Sheikhpura, Gujrat, Shahpur, Montgomery and Multan show an increase in the cultivated area. The largest decreases occurred in Ferozepore, Sialkot, Lyallpur and Dera Ghazi Khan. The decreases are due partly to river erosion, partly to changes in the soils of villages and partly to the fact that last year the figures were abnormally high. The cultivated area under mortgage has this year decreased by 85,300 acres compared with a decrease of 100,000 acres last year and an increase of 62,000 acres the year before last. The cultivated area under mortgage is 10.2 per cent. of the total cultivated area as against 10.4 last year.

As compared with the figures of 1902-03 agricultural tribes have gained by purchase 316,291 acres more than they have sold.

On the other hand, 472,065 acres were mortgaged by agriculturists in excess of the acreage mortgaged to agriculturists. This is not unduly high, when compared with the permanent gain by purchase.

29. The cultivated area held in private ownership sold during the year was 134,955 acres, a decrease of 2,869 acres on that sold last year. Sales of uncultivated land similarly held have increased from 77,712 acres last year to 92,628 acres this year. The districts in which the largest areas of cultivated land were sold this year, were Hissar, Montgomery,

General Statement of  
owned and mortgaged area.  
Statement III.

Transfers.  
Statements Nos. XXIV,  
XXV, XXVI and XXVII.

Multan, Dera Ghazi Khan and Attock. Sale of realty may be due to poverty or to liveliness in the money market, or to a desire to exchange from one district to another. Poverty is reported to be the cause of the greater number of the sales in the Attock district. The Deputy Commissioner, Sheikhupura, reports a tendency on the part of colonists to realise their lately acquired land and purchase with the proceeds estates nearer their ancestral village. The Deputy Commissioners of Multan and Montgomery believe that had not there been a slump in trade and consequent tightness of money there would have been still greater activity in the estate market in their districts.

The total privately owned cultivated area reported as redeemed (including areas redeemed but remortgaged) during the year was 271,932 acres against 383,154 acres in the previous year. Various reasons are assigned for the difference but the predominant factors were the poor harvest and the general difficulty of raising money on personal credit. Almost universally throughout the Ambala Division mortgages exceeded redemptions. Elsewhere with few exceptions redemptions made satisfactory progress. The mortgage debt discharged fell to Rs. 342.38 lakhs from Rs. 417.89 lakhs in 1920-21; and represents an area of 345,230 acres. With the exception of eight, all districts share in the decrease, especially Ferozepore, Gurdaspur and Sialkot. Reports as to the working of the Redemption of mortgages (Punjab) Act (No. II of 1913) are still incomplete, and it is unfortunately impossible to state the total area redeemed under the Act. But in the 16 districts for which figures are available nearly 10,000 acres were redeemed, and such opinions as are given are unanimous in describing the Act as popular and beneficial.

It is impossible to arrive at any accurate generalisation from the existence or non-existence of mortgage. In an Agricultural community where property is fluid and improvements in progress, a high mortgage figure may indicate the alertness, industry, and business capacity of the farmers. Where communications are bad and methods of farming mediæval, a similarly high figure may indicate the exhaustion of the peasantry. Instances of each of these two types of community can be found in the Punjab, but the former predominates.

Farmers are alive to the rising value of land, and while the total mortgage debt incurred during the year under report rose to Rs. 543.32 lakhs from Rs. 539.50 lakhs last year, the area (ownership) under usufructuary mortgage diminished by no less than 85,288 acres; standing at the close of the year at 2,930,306 acres, mortgaged for 37.20 crores of rupees. Thus the

owners' mortgage debt per cultivated acre comes to nearly Rs. 127 which shows a rise of Rs. 6 per acre. The above figure of mortgage debt is 8.2 times the provincial total amount of land revenue assessment which is Rs. 4.55 crores.

The area (ownership) transferred by gift was 80,968 acres or 17,317 acres less than that of last year. Last year's figures were swollen by the gift of a large estate (Dhangar) in the Hissar district. Such gifts are generally made for charitable purposes or to relatives for services rendered.

The area transferred by exchange was approximately the same as last year. The Co-operative Credit Societies are taking up with promising results the consolidation of holdings: and the effect of the campaign commenced this year may be expected to be apparent next.

30. The average price of cultivated land has risen from Rs. 345 per acre in 1920-21 to Rs. 385, the highest figure on record. This continuous rise is due partly to the fact that agricultural produce commands, or at least during the year under report commanded, very high prices, partly to the markedly increasing land hunger among the representatives of that class of society which in times past was content with trade, and the profits therefrom, and not a little to the restrictions of the Punjab Alienation of Land Act (No. XIII of 1900) which have greatly diminished the area available for sale to the general public.

The highest prices for agricultural land per acre were obtained in Hoshiarpur (Rs. 834), Jullundur (Rs. 780), Amritsar (Rs. 753), Ludhiana (Rs. 463) and Lahore (Rs. 442).

In urban areas in some instances fabulous prices were quoted for building sites. In Lahore last year's average of Rs. 1,488 per acre increased to Rs. 2,535 per acre in this, while in Simla also land values rose sharply. Conditions are normal again in Gurdaspur where land this year is being sold at Rs. 432 per acre. Measured in terms of land revenue the sale price for the province as a whole represents 292 years purchase of the land revenue as against 245 last year; and 6 at the commencement of the British occupation.

The mortgage money paid for land, the ownership of which was mortgaged during the year was Rs. 543.32 lakhs against Rs. 539.50 lakhs in 1920-21, and represents 209 times the land revenue against 136 times, in the previous year. The average mortgage money per acre on the whole area thus mortgaged was Rs. 177 against Rs. 167 last year.

31. No new tribes were notified under the Act, during the year under report. The Bodla, Mahtam and Saini Tribes, and also the Mazhabhi Sikhs who form a separate group, have been excluded from the Gujranwala district and included in the new district of Sheikhpura.

Agricultural tribes gained by purchase a net area of 11,700 acres against 27,000 acres in the previous year, and lost by mortgage and redemption taken together 55,631 acres against 62,000 acres last year. In Ferozepore where scarcity has been acute the area redeemed by agriculturists was 21,881 acres less than that of the previous year.

Benami transactions apparently continue to decline and were detected in five districts only, notably Jhelum and Dera Ghazi Khan.

The Act continues to be useful to all classes of agriculturists, and no complaints have been received from any district that work has been unduly increased by the Act.

32. The total number of revenue cases disposed of during the year was 1,57,942 or 4,253 cases more than in the previous year. The increase is composed of 342 Revenue Court cases under the Tenancy Act, 11,522 cases under the Land Revenue Act and 238 cases under the Land Alienation Act. The number of institutions of Revenue Officers' cases under the Tenancy Act, cases under the Redemption of Mortgages Act and Miscellaneous Revenue Officers' cases show a decrease of 1,369, 1,062 and 5,418 cases, respectively. The increase of over 3,000 in Revenue Officers' cases, under the Land Revenue Act, in the Lahore district is mainly due to the largely increased number of processes which had to be issued in the district because of the attempts made by political organisations to persuade people to refuse to pay their taxes. In Hoshiarpur a large number of applications relating to land are still being received from army men the disposal of which is greatly facilitated by the Soldiers Board.

The number of Revenue cases pending at the close of the year was 19,843 against 18,577 last year. In the courts of Commissioners and Financial Commissioners 1,020 Revenue and Judicial appeals were decided during the year against 1,044 in 1920-21, and the number of pending cases decreased from 224 to 151. The total number of execution appeals decided during the year was 2,364 against 2,650 in the preceding year, and there

were 253 cases pending, at the close of the year against 584 in the previous year. The number of appeals pending for more than 3 months was 73 against 193 at the end of 1920-21, a satisfactory indication of the return of the Province to normal conditions.

33. *Ambala*.—Diwan Tek Chand, O.B.E., I.C.S., officiated as Commissioner throughout the year and spent 117 days on tour.

\* Tours of Commissioners for the financial year 1921-22.

*Jullundur*.—Rai Bahadur Pandit Hari Kishan Kaul, C.S.I., C.I.E., was Commissioner throughout the year; and spent 106 days on tour.

*Lahore*.—Mr. A. Langley, C.I.E., I.C.S., was Commissioner throughout the year, and toured for 25 days.

*Rawalpindi*.—Mr. H. P. Tollinton, C.I.E., I.C.S., was Commissioner for 360 days and of which 83 days were spent on tour; Mr. F. H. Burton, I.C.S., was Commissioner for 5 days and did no tour.

*Multan*.—Mr. E. R. Abbott, C.I.E., I.C.S., was Commissioner for 194 days and spent 31 days on tour; Lieutenant-Colonel A. C. Elliott, I.A., was Commissioner for 130 days spending 47 days on tour; Sheikh Asghar Ali, C.B.E., I.C.S., was Commissioner for 41 days and spent 13 days on tour.

**Review of the Annual Report on the Land Administration of the Punjab, for the year ending 30th September 1923.**

*Proceedings of the Governor of the Punjab in Council in the Department of Revenue (Revenue) No. 491-53—11740, dated 15th September 1924.*

1. This Annual Report deals with the agricultural year from the 1st of October 1922 to the 31st of September 1923. The Kharif harvest which matures in the first part of the agricultural year is dependent on the rainfall of the preceding monsoon. This rainfall was good with the result that the Kharif sowing of 1922 were ten per cent. above the normal; while the failed area was only 15 per cent. of the sown area as against a normal of 21 per cent. The winter rainfalls were above the normal but untimely, and a magnificent wheat crop was damaged by rust.

2. The principal staples of the Province now are cotton in the Kharif and wheat in the Rabi. The outturns of both these crops were better than the average. The price of wheat fell considerably from the prices of 1921-22, but even so the price is much higher than the assumed commutation price of any settlement. The fall was more than compensated by a rise in the price of cotton. With a combination of high prices and good outturns, it might be expected that the collection of land revenue would be good. This expectation has been amply fulfilled.

3. The total fixed land revenue demand for the year was Rs. 241.17 lakhs, an increase of Rs. 120 lakhs on the figures of the last year. Rupees 1.65 lakhs of this demand was classed as irrecoverable and of the recoverable balance of Rs. 239.52 lakhs, Rs. 238.40 lakhs or 99½ per cent. was recovered. Of the uncollected balance, Rs. .69 lakh were suspended, leaving a balance of .43 lakh due for recovery but unrecovered. Of the land revenue under suspension, which amounted to Rs. 30.75 lakhs at the beginning of the year, Rs. 17.24 lakhs were collected, and .84 lakh remitted. Adding the suspension during the year, .69 lakh, the balance under suspension at the end of the year was Rs. 13.36 lakhs only. This is a remarkable result testifying not only to the goodness of the harvest but also to the leniency of the fixed assessment.

The districts in which suspensions are most frequently made are the dry districts of the Province, namely, Hissar

and Gurgaon in the east, and Attock and Jhelum in the west. The fixed land revenue of all these districts has been pitched on the understanding that suspensions will be liberally allowed when the harvest is bad or indifferent while recoveries will be freely made when the harvest is normal or good. Suspensions of fixed land revenue in these dry areas therefore are merely an incident in the normal working of the assessment. They are in no wise to be treated as an indication of severity of assessment. The amount of suspended revenue actually collected in the four districts named amounted to 53 per cent. of the annual fixed demand in Hissar, 28 per cent. in Gurgaon, 37 per cent. in Attock and 27 per cent. in Jhelum.

4. The true fluctuating land revenue collected during the year amounted to over 200 lakhs. The increase of 23 lakhs over last year was almost entirely due to good harvests, although some of it is attributable to the revised assessments of Lyallpur and Montgomery Districts. This figure shows that the fluctuating is rapidly overtaking the fixed land revenue. The change in the relative importance of fixed and fluctuating land revenue is a measure of the increasing prosperity of the Province. Practically the whole of the fluctuating land revenue is derived from areas formerly barren, which owing to the development of Canal irrigation in the last two decades, now yield golden harvests.

5. The very favourable character of the season can best be realized by reference to the figures given at the beginning of paragraph 7 of the report, which show that the total amount of land revenue, suspended land revenue and taccavi loans collected during the year reached the figures of 532.73 lakhs, of which 510.67 lakhs represents land revenue. The land revenue collections are 47.34 lakhs, better than those of any preceding year in the history of the Province. The whole of this large sum except 13.20 lakhs was paid on demand. The total number of processes issued for the recovery of this balance is 15,578, of which more than half are simple writs of demand.

6. The total amount of the loans under the Land Improvements Loans Act, XIX of 1883, and the Agriculturists' Loans Act of 1884 outstanding at the beginning of the year was 43.81 lakhs. Further loans to the extent of 7.83 were made during the year. Of the total (51.64 lakhs) Rs. 29.47 lakhs were due for collection during the year; only 20.09 lakhs were collected and .07 remitted.

The amount overdue is thus Rs. 9.31 lakhs. Of this sum Rs. 5.13 lakhs has been duly suspended, leaving an overdue balance recoverable and not suspended of Rs. 4.18 lakhs. The bulk of this is in three districts (Hissar, 1.35 lakhs, Ferozepore and Jhelum .70 lakh each).

7. Questions connected with the Punjab Alienation of Land Act, 1900, form a somewhat contentious topic of current politics. In view of this an inspection of the figures contained in Statements Nos. XXV, XXVI and XXVII is not without interest. It appears from Statement No. XXVI that since the Act came into force, the price of cultivated land per acre has risen from Rs. 71 to Rs. 314 in the year under report. As a rule the increase has been steady, but during the boom three years ago there was a sudden upward jump. It is a fair deduction from the fact of this uninterrupted rise that the fears of those who thought that one effect of the Act would be to depress the value of land owing to the restricted market, have been completely nullified. Another fact shown by this same statement is that except for one year, 1902-03, when the sales of land by members of agricultural tribes exceeded the sales of land to them the sales of land to agricultural tribes have been in excess and very often considerably in excess of the sales of land by them. It is deducible from this fact that members of agricultural tribes are gradually regaining the position, which they had lost, before the Act became operative.

Turning to Statement No. XXVII, which deals with mortgages of land, we find that on the whole there has been a gradual decrease in the total cultivated area under usufructuary mortgage. There have been occasional upward tendencies, but taking the quinquennial averages, there has been a steady decrease from 33.55 lakhs of acres to 31.30 lakhs of acres, while in the year under report the area of cultivated land mortgaged has sunk to 29.01 lakhs of acres, of which 19.30 lakhs of acres are held by members of notified agricultural tribes (see Statement III, Column 11). Here again, the deduction is legitimate that members of notified agricultural tribes are improving their position as compared with members of non-notified tribes. As in the case of sales the mortgage money per cultivated acre has increased rapidly from the time when the Act was introduced.

One of the arguments used by opponents of the Act is that the large land-holders have swallowed up the small

land-holders. There is no trace of this in any of the district reports except in the report from the Muzaffargarh District. The conditions of Muzaffargarh appear to be peculiar in that the people are on the whole far more heavily indebted than they are in any other district. The cause of this indebtedness is not clear, but the matter will have light thrown on it by an inquiry which is now being conducted under the auspices of the Board of Economic Inquiry (Rural Section). In the other districts there is no reason to suppose that the big land-holder is gaining appreciably at the expense of the small land-holder. The natural tendency of the increase in population to diminish the size of holdings has been reversed by the large grants of land made in the colonies, chiefly to persons with small holdings but there is no indication that small land-holders are being expropriated by big men. Those who remember the discussions that took place before the passing of the Punjab Alienation of Land Act, 1900, and the gloomy forebodings for the future of the agriculturists which were prevalent before that Act was passed, may well be amazed at the present position of affairs.

8. The cultivated area sold during the year represents only .44 of 1 per cent. of the total cultivated area of the Province. This minute fraction shows that land is almost unpurchasable even by the members of an agricultural tribe. The great bulk of the transactions consist of transfers of less than  $2\frac{1}{2}$  acres of cultivated land. The normal size of a proprietary holding is 15 acres as has been recently ascertained by a special inquiry made by the Registrar of Co-operative Societies. It follows that even the comparatively insignificant area sold, is made up of small parcels far below the size of an economically profitable holding. This reinforces the deduction made from general considerations that the large land-holders are not appreciably expropriating the owners of small but economically profitable holdings.

9. Government desire to endorse the remarks contained in paragraph 32 of the Report as to the great importance of maintaining the accuracy of the land records and to the necessity that the District Officer and his subordinates should devote time to the attainment of this object.

By order of the Governor in Council,

C. M. KING,

*Financial Commissioner and Secretary to Government,  
Punjab, Revenue Department.*

# Annual Report

ON THE

## Land Revenue Administration

OF THE

### Punjab

FOR THE

***Agricultural year ending the 30th September 1923.***

1. The agricultural year August 1922 to September 1923 was a very favourable one characterised by a good monsoon and plentiful winter rains. The sowing of cotton and sugarcane depends on the rainfall of the preceding half year, and this had been satisfactory so that the season opened with an extensive area already under these two important crops. The monsoon which broke in June, a month earlier than usual, was a good one. Distribution of rainfall was normal, that is, rainfall was heavier in the south east and the montane and sub-montane districts than in the central and western tracts. In July rainfall was below normal : but good rains fell in August and the first half of September. Gales accompanied the rain and caused some damage to standing autumn crops particularly cotton. The monsoon ended about the fourth week in September. As compared with the average of previous years the rainfall was considerably heavier in the south-east and sub-montane districts. It was about average in the Central Punjab, and lighter than the average in the west. The acreage of autumn crops in the south-east, where the crops are mainly dependent on rainfall, was consequently much above the average. The September rains were followed by light showers in the first and second weeks of October which enabled good rabi sowings to be made. There was no further rain till the second and third weeks of December, but the rain received was adequate for rabi sowings and the maturing of kharif crops. The rains

after Christmas were heavier than usual, beginning on the 9th January and continuing till the middle of March and being especially heavy in February. They were particularly useful for the unirrigated rabi crops, though the cloudy weather which accompanied them was responsible for some rust in the wheat. As usual, some damage was caused in March by sporadic hailstorms. The dry weather in April was favourable for harvesting operations, but unceasing rain in May did considerable damage to straw and grain on the threshing floor in many districts, particularly in Shahpur.

The total area under autumn (kharif) sowings was 11.88 million acres, being 10 per cent. above the normal, and - per cent. below the figure for the previous year. The failed area was 15 per cent. of the sown area, as against 23 per cent. in the last year, and a normal of 21 per cent. The percentage of crop failure were above average in Multan (22), Shahpur (24), Attock (25), Mianwali (23), Hissar (31) and Dera Ghazi Khan (35), respectively.

The total area under spring, (rabi) sowings was 19.99 million acres, being 11 per cent. above the normal, and 6 per cent. above last year's figure. The area failed was 8 per cent. as against 14 per cent. in the preceding year, and a normal of 14 per cent. The heaviest percentages of crop of failure occurred in Attock (13), Gurgaon (14), Mianwali (16), Hissar (17) and Dera Ghazi Khan (24), respectively.

The total area sown and matured was 31.79 and 28.51 million acres, as against 31.03 and 25.65 million acres in 1921-22, and a normal of 28.81 and 24.06 million acres, respectively. The large increase in sowings in Sheikhupura (55 per cent.) and Montgomery (39 per cent.) over the previous average of these districts indicates the successful progress of colonization. Other districts showing figures remarkably above normal were Ferozepore (12 per cent.), Rohtak (19 per cent.), Multan (22 per cent.), Hissar (23 per cent.), Mianwali (20 per cent.) and Jujranwala (25 per cent.). Only in

---

\*The average of the quinquennium 1914-19 has been taken as "normal" for the purposes of this report.

Dera Ghazi Khan was there a marked fall. There the river failed to supply adequately the Inundation Canals, and sowings were 27 per cent. below normal.

Crops which showed the highest outturn above normal sugar (27 per cent.), bajra (15 per cent.) and gram (65 per cent.). Others above normal were barley (11 per cent.), cotton (13 per cent.), wheat (16 per cent.) and jowar (23 per cent.), respectively.

A consequence of this bumper harvest was a very appreciable fall in the prices of principal crops, as follows :—

| Crop.             | 1921-22.  |    |   | 1922-23.  |    |   | all.      |    |   |
|-------------------|-----------|----|---|-----------|----|---|-----------|----|---|
|                   | Rs. A. P. |    |   | Rs. A. P. |    |   | Rs. A. P. |    |   |
| Wheat ... ..      | 5         | 12 | 0 | 3         | 14 | 0 | 1         | 14 | 0 |
| Bajra .. ..       | 6         | 10 | 0 | 3         | 5  | 0 | 3         | 5  | 0 |
| Gram ... ..       | 2         | 14 | 0 | 2         | 13 | 0 | 2         | 1  | 0 |
| Rapeseed ... ..   | 7         | 2  | 0 | 6         | 0  | 0 | 1         | 2  | 0 |
| Sugar (raw)... .. | 9         | 7  | 0 | 6         | 4  | 0 | 2         | 3  | 0 |

On the other hand the price of cotton rose from Rs. 10.13 to Rs. 12.12, while for some time the price was even higher. America's crop largely failed and the demand for supplies from India consequently increased, causing the market to soar. That the general fall in prices of agricultural produce did not affect the farmer seriously is due to the very moderate revenue assessment, based, as it is, on prices which are generally considerably lower even than those reached in this year of plenty.

The quantity of cattle in the Province appears adequate, though not the quality. Fodder is at present sufficient on the whole, but extensions of cultivation mean diminished grazing grounds.

The main breeds of cattle in the Province are :—

(a) *Montgomery*.—Noted as the best milk breed of the Province.

(b) *Dbanni*,

(c) *Hariana* and *Hissar*,

(d) *Dajal*,

} Chiefly noted for draught bullocks.

\*(Occasion is here taken to correct an error in last year's report when the maize and barley in reality 99 per cent. and 90 per cent. of normal were shown as above normal to that extent).

*Milk cattle.*—There is an increasing tendency to keep cow buffaloes for milk, as they are generally better milkers, produce richer milk, are satisfied with coarser food, and stand stall feeding better than cows. There is a great drain of the best cows from the country into towns. It is hoped that pasteurization of milk and better facilities for transport will check this.

Two dairy farm grants have been allotted by Government for the supply of milk to Montgomery and Lahore cities. A pasteurising plant has been instituted in the Lahore grant. A very neat pasteurising plant has also been installed at the Agricultural College Dairy at Lyalpur. Government lands have recently been granted on lease to certain *jungles* and *Saiyads* of Shergarh and Hussaingarh villages in the Montgomery District on condition that they maintain a specified number of Montgomery cows for breeding purposes to the satisfaction of Government.

As part of the general programme for the improvement of the indigenous breeds, grants of land have been given on lease on cattle breeding terms and provision has been made for separate farms for the Hissar and Montgomery breeds of cattle. The former is the premier draught breed of the Province. Special efforts are being made on all these farms to improve the milking qualities of the breeds by careful selection of herd cows.

Special cattle breeding schemes for the improvement of draught cattle have been started in the Dhanni tract comprising parts of the Rawalpindi, Attock and Jhelum districts, and in the Hariana tract comprising Rohtak, Gurgaon and Hissar districts. In such cases, the bulls are provided by grants from Government supplemented by at least a corresponding amount by the District Boards concerned.

There is a Government cattle farm of nearly 40,000 acres at Hissar, about 2,000 acres of which are irrigated and under cultivation; the remainder is uncultivated grazing land. The farm supplies high class stud bulls to District Boards and Co-operative Breeding Societies at privileged prices. At present there are over 1,600 specially selected pedigree stud bulls employed in the districts.

Thirty-eight co-operative cattle insurance societies and 21 cow breeding societies have been started in the villages

by the Co-operative Department, the bye-laws of which include regulations approved by the Veterinary Department.

2. The total demand for fixed land revenue for the year under report was Rs. 241.17 lakhs, as against Rs. 239.97 lakhs last year—or an increase of Rs. 1.20 lakhs, chiefly contributed by progressive assessments, re-assessment operations and alluvion.

Of the demand of Rs. 241.17 lakhs, Rs. 1.65 lakhs were eventually classed as irrecoverable, leaving to be recovered Rs. 239.52 lakhs, of which Rs. 238.40 lakhs were actually collected, a percentage of 99.5. In the Dera Ghazi Khan District the big land-holders were, as always, tardy in payment, and in Multan the general fall in prices of grain delayed the disposal of produce and consequently the payment of revenue: but in the rest of the Province collections were made with ease and punctuality. Of the uncollected balance, Rs. 69 lakh were suspended, leaving 43 lakh due for recovery, but unrecovered. The year opened with a sum of Rs. 30.75 lakhs under suspension of which 17.24 lakhs were collected, and .82 lakh remitted. To the balance remaining the sum of .69 lakh as already noted has to be added. Thus the balance under suspension at the close of the year was Rs. 13.36 lakhs only. The heaviest outstandings are in Gurgaon (5,08,681), Hissar (2,18,671), Attock (1,99,040) and Jhelum (1,48,748).

The reduction of the outstandings for Gurgaon, from Rs. 9,83,168 in last year to Rs. 5,08,681 is satisfactory.

3. There was excessive rainfall in the hills during July and August and the Sutlej floods swept away 5,912 acres in Ferozepore, 5,423 acres in Lahore, 3,602 acres in Jullundur and 2,861 acres in Ludhiana. The Indus also swept away 5,803 acres in the Dera Ghazi Khan District. The total area of riverain land removed from assessment was 39,738 acres against 24,937 acres in the previous year. During the year 44,363 acres of land were newly assessed at a sum of Rs. 46,834 (including *jagir*) on account of alluvion, while on 39,738 acres which were washed away the entire assessment amounting to Rs. 36,380 (including *jagir*) was remitted. In certain districts, pursuant to the provisions of Standing Order 26, paragraph 1 (i), land which is injured or improved by the action of water or sand is liable to a

corresponding reduction or increase in land revenue. Enhancements under this head amounted to Rs. 21,827 (including *jagir*) on 20,899 acres and reductions to Rs. 6,415 (including *jagir*) on 10,981 acres. Thus there was a net gain of Rs. 15,412 due to enhancement. As a result of alluvion and diluvion there was a net increase of Rs. 24,175 (excluding *jagir*), or Rs. 25,866 if *jagir* figures be included, added to the fixed land revenue roll against Rs. 22,170 last year. Of this increase, rivers accounted for Rs. 13,567, streams Rs. 4,514 and Chcs Rs. 1,094.

4. The collections of true fluctuating land revenue have increased from 177 lakhs last year to a little over two crores. The increase is due to good harvests resulting from favourable climatic conditions, sufficiency of water in the rivers, increased water supply from the Upper Chenab Canal, satisfactory working of the Lower Bari Doab and Sutlej inundation canals, increased cultivation in Thal tracts and the fact that a large area of unirrigated lands in the Gugera Branch villages of the Lyallpur District were transferred from fixed to fluctuating assessment during the current settlement. Of the total increase of about 23 lakhs of rupees, 20.65 lakhs have been contributed by the Multan Division alone, and of this 8.32 lakhs by Lyallpur District, Lahore division contributed 1.61 lakhs, Ambala 1.33 lakhs and Jullundur .15 lakh. Of the total demand, Rs. 1.10 lakhs only remained uncollected at the close of the year.

5. Collections of "Other land revenue" rose from 33.84 lakhs to 53.58 lakhs. The sale of proprietary rights in Government estates brought in 24.40 lakhs or 20.9 lakhs more than in the previous year. Of this, the Lyallpur District alone contributed 19.54 lakhs, being an increase of 10.67 lakhs due to the purchase of proprietary rights by camel-breeding tenants. An increase of 2.42 lakhs in the Jhang District is accounted for partly by the sale by auction of a small area of colony land and partly by the purchase of proprietary rights by grantees on peasant terms, whose keenness was quickened by an apprehension lest the rates for the acquisition of such rights be enhanced in the near future. The increases in other districts were small and call for no remarks.

Under "other items" there has been an increase of more than Rs. 80,000 over the figures of last year, mainly on account of improved receipts from oil-fields in the Attock District. With effect from 28th March 1923, at the instance of the Financial Commissioner, arrangements were made for separating off under a new head "Receipts from oil-fields". The income for 1922-23 under this head amounted to Rs. 1,26,003. Royalty is charged 5 per cent. *ad valorem* on gross value subject to a minimum of 8 annas per 40 gallons. The increase of Rs. 1,72 on account of Tirni (grazing dues) came from the districts of Multan and Muzaffargarh. Receipts from royalties on kankar, stone and coal amounted to Rs. 64,695 or Rs. 1,437 more than in the previous year. In Gurgaon the rules regulating the quarrying of stone provide for the payment of fees before permits are issued except in the cases of villages recorded in the *wajib-ul-arz* as owners of the stone. In the course of the year the right of certain proprietors to exemption under this clause was upheld in the court of the Collector. In the Jhelum District 10 companies are engaged in the coal industry and it is remarkable that of these two have been initiated by local zamindars.

Collections from rents of land leased for temporary cultivation amounted to Rs. 4.99 lakhs against Rs. 5.43 lakhs in the preceding year a decrease that reflects the diminishing areas available for letting as colonisation extends.

The uncollected balance of "other land revenue" for the whole of the Province at the close of the year was Rs. 1,12,783 as compared with an average of Rs. 1,13,063 for the last 5 years. Of this balance, the largest amount was due from Sheikhpura (Rs. 3,566), the largest item being Rs. 21,885 on account of sale of Government lands.

6. In 1917 a scheme for the creation of new *Jagirs* was sanctioned by the Secretary of State, in accordance with which Jagirs are granted by the Punjab Government for the life of the original holder, half the sum assigned being continued for the next generation. A definite condition of "continued good conduct and steadfast loyalty to His Majesty the King-Emperor and active good service to the public or to the Government established by law in British India rendered to the best of the Jagirdar's ability and power" is attached to all such grants. During the

Land Revenue Assignments.

Statement No. X.

financial year 1922-23 only four new jagirs—two of Rs. 500 each and two of Rs. 250 each—were granted, leaving a balance for the year of Rs. 3,500, which was carried forward to the next year. These bring up the total number of grants made under this scheme to eighty-nine and involve a disbursal of Rs. 31,500 per annum.

Three assignments of land revenue of Rs. 600 per annum each were granted to Indian Officers at the instance of the Government of India in the Army Department. The cost of these, unlike those already mentioned, is charged against the resources of the central Government.

The total income enjoyed by assignees was Rs. 36,75,180 as compared with Rs. 35,96,405 in the preceding year, there being thus a net increase in the amount of revenue assigned of Rs. 78,775. Out of this, a sum of Rs. 14,000 relates to Gujranwala, Rs. 12,500 to Montgomery and Rs. 18,000 to Dera Ghazi Khan. These increases were due partly to progressive assessments but more particularly to the fact that many assignments are of land subject to fluctuating land revenue and the agricultural season was a very good one. The figures show a decrease of 3,042 acres in the area under assignment: 1,257 acres of these are due to a mistake in district returns made last year and corrected this.

The Deputy Commissioners of Hissar, Jullundur, Ludhiana, Lahore, Gurdaspur, Sialkot, Jhelum, Rawalpindi, Montgomery, Lyallpur and Multan have failed to notice the state of Jagir registers in their reports as required by item No. 9 on page 20 of Standing Order No. 53. The remaining Deputy Commissioners report that the registers of their districts are in good condition.

7. The total collections of the year's demand, suspended revenue, and taccavi loans throughout the Province amounted to Rs. 5,32,73,285, of which figure Rs. 5,10,66,921 represents\* land revenue. The corresponding figures for the past ten years have been :—

|         |     | <i>Gross collections.</i> | <i>Land Revenue.</i> |
|---------|-----|---------------------------|----------------------|
|         |     | Rs.                       | Rs.                  |
| 1912-13 | ... | 3,81,51,185               | 3,74,04,270          |
| 1913-14 | ... | 3,88,97,395               | 3,81,59,905          |
| 1914-15 | ... | 4,06,95,900               | 3,99,78,555          |

\* For the purposes of this paragraph the figures quoted are those accounted under the heads "fixed", "fluctuating" and "Miscellaneous" land revenue; see also paragraph 28.

|         |     | <i>Gross cultivations.</i> | <i>Land Revenue.</i> |
|---------|-----|----------------------------|----------------------|
|         |     | Rs.                        | Rs.                  |
| 1915-16 | ... | 3,85,77,443                | 3,78,64,350          |
| 1916-17 | ... | 4,30,65,679                | 4,20,94,651          |
| 1917-18 | ... | 4,32,28,164                | 4,25,81,052          |
| 1918-19 | ... | 4,10,44,084                | 4,03,52,753          |
| 1919-20 | ..  | 4,70,78,049                | 4,63,33,220          |
| 1920-21 | ... | 4,03,56,358                | 3,98,13,912          |
| 1921-22 | ... | 4,91,12,823                | 4,59,17,093          |

Land Revenue collections thus exceeded all previous records by Rs. 47,33,701, and the whole of this sum with the exception of Rs. 13.20 lakhs was paid on demand. The amount for the recovery of which processes had to issue was only 2.6 per cent. of the land revenue as against 2.5 per cent. last year; and the balance (1.4 lakhs) remaining outstanding at the close of the year was .27 per cent. of the Land Revenue as compared with .31 per cent. in 1921-22.

No other commentary is needed on the not infrequent attacks made by representatives of the agricultural community on the land revenue system as being unduly harsh.

'The processes' issued to secure recovery of this 2.6 of the total demand were nominally 15,578 in number, but of these 7,810 were simple writs of demand and of the remaining 7,768, only 4,069 were executed. Of these executions, 3,018 were for arrest, 19 for imprisonment, 974 for distress and 58 for sale of moveable property. Of the total number of processes issued 3,913 as compared with 3,813 last year were against lambardars, and 11,605 as compared with 11,358 for last year were at the instance of lambardars. The largest number of warrants for arrest were executed in Jhang (861), Lahore (790), Muzaffargarh (518), Multan (469), Montgomery (319), Sheikhupura (261) and Dera Ghazi Khan (246). As in the previous four years, Gujranwala continues to show the largest number (255) of actual executions in cases of distress. The Deputy Commissioner has not been able to give any very convincing reason for this, but he considers the Gujranwala Tahsil a large and unwieldy charge, and this may be a contributing cause. The district is now under re-settlement: and the matter is one which will receive the special attention of the Settlement Officer.

In no case was it found necessary to proceed to the extreme measures of direct management, farm or transfer in order to enforce payment. Warrants for attachment of immoveable property were issued in 3 cases but revenue was received before they were executed.

The small increase in the number of processes issued during the year under report is not out of proportion to the unusually heavy collections of the year. Abnormal factors causing delay in payment in isolated cases were the fall in the prices of agricultural produce, Akali agitation in the central districts of the Province and the unusual restrictions imposed upon the touring of revenue officers who could in the circumstances make little personal effort for the recovery of arrears.

8. In four districts only was temporary establishment entertained for short periods for serving processes for the recovery of land revenue. The total cost was Rs. 582. In all other districts summons and processes issued in revenue suits were served through the post or by the ordinary tahsil peons.

It is convenient here to summarise the history of the attempts which have been made to accelerate service of summons by using the post. This system was first recommended in paragraph 139 of the Clerical Establishment Committee's Report, 1912-13. After consulting local officers, the Financial Commissioner proposed to introduce the system in May 1915. The issue of these orders led to an application from the Deputy Commissioner, Gujranwala, for an additional grant for Contingencies, and under the impression that considerable additional expenditure would be called for, at any rate in the initial stages of the experiment, the Punjab Government directed that the scheme be postponed. The matter was re-investigated, and it was found in 1916 that Deputy Commissioner, Gujranwala's application for additional funds had been premature, and eventually in Punjab Government letter No. 1540 S. (Finl.), dated 13th September 1916, Deputy Commissioner, Gujranwala, was instructed to continue the system, and to keep accurate records of expenditure. In the meantime the scheme received the strong support of the Director of Land Records, Punjab, and in commenting on

his Annual Report for 1915-16, the Punjab Government directed that it be more generally applied. Commissioners were again addressed in May 1916, and given the discretion to introduce it to the extent they might think desirable: subject to a request that the experiment be made in at least 2 districts of each Division. In the end of May 1917 a special report from Deputy Commissioner, Gujranwala, was considered and it was found that the system had proved very successful.

In its remarks on the Land Revenue Report for the year ending 30th September 1918, Government again recommended the scheme to the attention of the Financial Commissioner, and Commissioners were requested in July 1919 to extend it wherever conditions might be found favourable. Attention of Commissioners was again drawn to the system by a Circular of the Financial Commissioner in May 1920. In spite of these repeated instructions only 14 districts have reported on the working of the system in the year now under report. The matter will have the further attention of the Financial Commissioner in the course of the current year, and special reports will be called for. Of the 14 districts in which the system has been employed, Karnal, Ambala, Ferozepore, Lahore, Gurdaspur, Ludhiana, Gujranwala, Amritsar and Dera Ghazi Khan give encouraging accounts of satisfactory working. In Mianwali communications are bad, and in Jhang also post offices are few. Deputy Commissioner, Muzaaffargarh, complains somewhat oddly of a difficulty in procuring stamps. The Financial Commissioner is not satisfied that the system was intelligently applied in Montgomery and Multan. In the latter district the post seems to have been used in five cases only: and in four of these summons by post was sufficient to secure payment of a demand due.

9. Settlement operations were conducted in six districts during the year. The settlement of the Dipalpur and Pakpattan Tahsils of the Montgomery District was finally closed in December and the new assessment which affects 914 villages and an area of 1,008,673 acres was announced. The Sirsa settlement in the Hissar District was finally closed in January. The new assessment which affects 325 villages and an area of 1,048,603 acres was announced and introduced and no difficulty is being experienced in the working of it.

Progress in remeasurement, revision of records, etc.

Statements XII and XIII.

In the Shahpur District 54,193 acres were remeasured. It was found that the land of many villages lay partly in the irrigated area under settlement and partly in the un-irrigated area which it was originally intended to exclude. This was inconvenient and it was decided to include in the settlement the area outside the irrigation limits of the Lower Jhelum Canal in the Chenab Assessment Circle of the Bhalwal Tahsil also. Measurement operations were undertaken and maps have been completed of 43 villages which were wholly or partially outside the irrigation boundary and in which Killabandi has not been effected. Records of rights of 31 villages were completed and finally attested by the end of the year.

No revision of records or re-measurement was found necessary in the Lyallpur District. It was intended to commence settlement operations in the non-colony portion of the Jhang and Chiniot tahsils on the 1st of April 1923, but the date synchronized with that fixed for the preparation of Electoral Rolls for elections to the Legislative Councils, a task that falls on the revenue staff. In consequence active settlement work could not commence till the middle of May. Even then two further difficulties arose to hamper the progress of the work. An accidental fire in Muzaffargarh burnt a large quantity of forms about to be despatched for use in Jhang : and the first supply of those prepared by the Jail Press in the place was unsatisfactory. Nevertheless by the end of September 1923 the revision of maps of 94 villages with a total area of 139,621 acres and both copies of the records of rights of 33 villages had been completed.

In the Muzaffargarh District maps of 152 estates with a total area of 339,825 acres were prepared and the records of rights of 94 estates were completed and finally attested.

The following assessment reports were received during the year :—

- (1) The Bhalwal Tahsil of the Shahpur District,
- (2) The Sargodha Tahsil of the Shahpur District,
- (3) Gugera Branch, Circles I and II, of the Lyallpur District,
- (4) Gugera Branch, Circle III, of the Lyallpur District,

- (5) Extensions and Proprietary villages of the Lyallpur District, and
- (6) The Lower Chenab Colony portion of the Jhang District.

Government orders have been passed on the first five and the sixth is under consideration. Government orders were also passed on the assessment report of the Dipalpur Tahsil of the Montgomery District which was received in the preceding year. Assessment reports of the Alipur Tahsil, Muzaffargarh Tahsil and Pakka and Indus Circles of the Kot Adu Tahsil of the Muzaffargarh District were due at the close of the year.

10. Final Settlement Reports dealing with the districts of Dera Ghazi Khan, Hissar, and the Sutlej Tahsils of the Montgomery District are due but no Final Settlement Report was submitted during the year.

11. Settlement operations in the Sirsa Tahsil of the Hissar District were commenced on 1st October 1919 and concluded by January 31st, 1923. The total period was nominally 3 years and 4 months but for ten months, while the Settlement Officer was on leave and his reports were under the consideration of Government, operations were at a standstill and the special staff dispersed. Thus the effective duration of the settlement was  $2\frac{1}{2}$  years or approximately the period "slightly more than two years" forecasted. The total cost was Rs. 1,43,801 as against Rs. 1,38,040 anticipated. The enhancement estimated in the forecast was Rs. 1,05,000 but that actually sanctioned was Rs. 1,24,400 which represents an enhancement of 51.7 per cent. on the old demand. The total cost of the operations will thus be recovered within eighteen months of the introduction of the enhanced demand.

The settlement of the Pakpattan and Dipalpur Tahsils of the Montgomery District commenced in October 1919 and the special staff was disbanded in June 1922. The orders of Government were passed on the report of the Pakpattan Tahsil in 1921-22 and the Settlement Officer submitted his assessment proposals on the Dipalpur Tahsil also during that year. While his proposals were under consideration by Government two kanungos only were entertained in order to prepare the

registers and forms for the distribution of the demand over holdings, and the rest of the staff disbanded. The Settlement Officer received orders on his last report in December 1922. The new assessment was announced forthwith and the settlement operations finally concluded. The duration of the settlement was estimated in the forecast report at 33 months: the actual duration was 39 months; but as already observed, during six months of this period almost the whole staff was disbanded. The total cost was Rs. 2,85,085 against an estimate of Rs. 2,46,271. The excess was due to the increase made during settlement in the salaries of every class of official employed. The enhancement estimated in the forecast was Rs. 1,55,000 but that actually sanctioned was Rs. 1,73,141 which represents an increase of 46 per cent. on the old demand. The total cost will be recovered from the enhanced demand in two years.

12. As noted last year, it is very difficult to obtain funds from the Punjab Legislative Council with its Zamindar majority for re-assessment purposes. The Governor was compelled during the year under report to certify the necessity of expenditure on settlements in order to enable the Government to obtain funds for the re-settlement of the tracts in which operations were due to commence in the autumn immediately following. These areas are :—

(a) Bhakkar Tahsil and Sadat Miani villages of the Mianwali District

(b) Attock District,

(c) Sheikhpura District excluding—

(i) the area irrigated by the Rakh Branch of the Lower Chenab Canal,

(ii) those villages of the Sharakpur Tahsil which were transferred from the Chunian and Lahore Tahsils of the Lahore District; and

(iii) the non-irrigated tract transferred from the Raya Tahsil of the Sialkot District,

and (d) Gujranwala District (excluding the non-irrigated tract transferred from the Pasrur and Daska Tahsils of the Sialkot District) and those villages of the Sialkot District which are irrigated by the Upper Chenab Canal.

All the preliminaries necessary to re-settlement operations in each of these tracts have been completed ; and each will be fully reported next year.

It is not contemplated to commence any important re-assessment operations in the next two years. The detail of assessments shortly due for revision is as follows : —

- |                                                                                                                |                |
|----------------------------------------------------------------------------------------------------------------|----------------|
| (i) Urban assessment (Hoshiarpur<br>Mandi).                                                                    | } Rabi 1925.   |
| (ii) Urban assessments (Private<br>Mandis in all 3 tahsils except<br>Pattoki Mandi) Lahore Dis-<br>trict.      |                |
| (iii) Sialkot Tahsil (Urban assess-<br>ments).                                                                 | } Kharif 1924. |
| (iv) (a) Irrigated villages of the<br>Gujrat, Kharian and Phalia<br>Tahsils.                                   |                |
| (b) Eight villages transferred<br>from Shahpur District to<br>Phalia Tahsil affected by<br>Lower Jhelum Canal. | } Rabi 1926.   |
|                                                                                                                |                |

For the first three of these no special settlement staff is likely to be required, and from the preliminary reports which have been received of the condition of the villages in the Gujrat District it seems probable that it will be possible greatly to curtail re-assessment operations there.

13. In the Sirsa Tahsil of the Hissar District the small staff employed for the distribution of the demand over holdings (*bachh*) was reduced at the end of January, and settlement operations finally concluded in February.

In Shahpur, one Settlement Officer and one Extra Assistant Settlement Officer were employed throughout the year. Two Tahsildars were employed till the 31st of March 1923 and thereafter one till the 6th September when this appointment also was reduced. The schedule provided for a staff consisting of 7 Settlement Naib-Tahsildars, 10 field and seven office kanungos up to 30th September. It was found possible gradually to reduce establishment, as work progressed and at the end of the year only four Naib-Tahsildars and eleven kanungos remained.

In Lyallpur, the Settlement Officer, Extra Assistant Settlement Officer, three Naib-Tahsildars and one kanungo were employed throughout the year. The rest of the staff was gradually reduced. One Naib-Tahsildar left on 2nd December 1922 and three Naib-Tahsildars and nine kanungos in the end of March 1923.

In the Jhang District one Settlement Officer, one Extra Assistant Settlement Officer, two Settlement Tahsildars, five Settlement Naib-Tahsildars and 26 kanungos were employed.

In the Muzaffargarh District the additional staff employed during the year was one Settlement Officer, one Extra Assistant Settlement Officer, 6 Tahsildars, 17 Naib-Tahsildars and 69 kanungos. Of these, 2 Tahsildars, 6 Naib-Tahsildars and 27 kanungos were reduced at the end of March when settlement operations in the Muzaffargarh and Alipur Tahsils came to a close.

14. Three Survey parties, Nos. 1, 22 and 23, of the Government of India, Survey Department, worked in the Punjab at a total cost of Rs. 3,90,539. The following topographical survey operations were carried out by No. 1 Party (Northern Circle) of the Survey of India :—

(1) Revision survey, on the scale of 1 inch=1 mile, was completed over an area of 2,876 square miles in the Dera Ghazi Khan, Jampur, and Rajanpur Tahsils of the Dera Ghazi Khan District.

(2) Original survey, on the scale of 1 inch=1 mile, was completed of 313 square miles in the south-western portion of the Alipur Tahsil of the Muzaffargarh District and 233 square miles in the south-eastern portion of the Tribal tract of the Dera Ghazi Khan District.

(3) Original survey, on the scale of 1 inch=2 miles, was carried out over an area of 1,056 square miles in the south-western portion of the Tribal tract of the Dera Ghazi Khan District; thus completing the programme approved by Government.

The Punjab Riverain Survey Party (No. 22) worked during the field season along the Indus river in the districts of Muzaffargarh, Dera Ismail Khan and Dera Ghazi Khan and along the Chenab and Jhelum rivers in the Jhang District and were employed on boundary survey in the Sialkot District during recess.

In the riverain area they continued the work of traversing and laying down base lines. Nine hundred and fifty-nine linear and 970 square miles of main circuits with 2,960 linear and 627 square miles of minor traverses were completed and 14,678 theodolite stations were fixed in 90 villages. Twenty-one corners of 7 squares in 17 square miles were demarcated with permanent mark-stones on both banks of the Indus river to serve as a basis for future survey and demarcation of boundaries and fields now in the bed of the river. Six missing stones of 4 old base lines along the Indus river in the Muzaffargarh District were relaid at the request of the Settlement Officer. Fifteen hundred and fifty-four plotted and four hundred and seventy-six boundary "massavis" (Settlement mapping sheets) on the scale of 1/2640 and forty 4-inch sheets were traced and supplied to the Settlement Officer, Muzaffargarh. In addition 205 boundary "massavis" on the scale of 1/2640 were partly compiled in advance for the next field season's work; 273 miscellaneous traces were prepared; all the traverse stations marked during the field season were plotted on the forty-two 4-inch sheets; 23 volumes of field books and 10 volumes of set up of riverain work of the year were completed.

The work of boundary survey carried out by this party in the Sialkot District consisted in surveying with plane table the boundaries of the newly constituted tahsils of that district as shown on the original field sheets of the area which had been, topographically surveyed, on a scale of 1 inch=1 mile in the field seasons 1910-11. The work was commenced on 17th July 1923 and finished on 14th September 1923, the heavy monsoon rains having seriously retarded the progress of the survey.

The Punjab (No. 23) party carried out survey operations in connection with the Sutlej Valley Irrigation Project in parts of Multan, Montgomery, Lahore and Ferozepore Districts. Two thousand four hundred acres rectangles previously laid out were broken up into eight thousand nine hundred and eighty-nine 100-acre rectangles over an area of 1,177 square miles. Besides, 1,560 linear miles of traverse were run for the purpose of laying down the main corners of 2,400 acre rectangles and 556 corner-stones of such rectangles were embedded.

Precise levelling was also carried out for the 'Sutlej Valley Irrigation Project as follows :—

- (a) 81 miles of Primary levelling, for the new level from (i) Mithra to Khanpur, (ii) Khanpur to Reti.
- (b) 1,250 miles of Secondary levelling, consisting of 625 miles in the British area and 625 miles in Bahawalpur State.
- (c) About 13,750 miles of Tertiary levelling over a rectangulated area of about 2,045 square miles in the British area.

The party of revenue staff which commenced sub-rectangulation work in the Sind-Sagar Thal in the cold weather of 1919-20 under Munshi Ganda Singh, Extra Assistant Commissioner, completed it at the close of the field season 1922-23.

The work done in the Thal is detailed below :—

| Season.                                       | Number of 10-acre rectangles laid out and demarcated with stones. | Number of 20-acre rectangles laid out and demarcated with stones. | Number of stones fixed on the corners of rectangles. |
|-----------------------------------------------|-------------------------------------------------------------------|-------------------------------------------------------------------|------------------------------------------------------|
| 1919-20 ...                                   | 1,790                                                             | ...                                                               | ...                                                  |
| Hot weather of 1920 and field season 1920-21. | 138,700                                                           | ...                                                               | 126,220                                              |
| 1921-22 ...                                   | 233,360                                                           | ...                                                               | 210,158                                              |
| 1922-23 ...                                   | 119,510                                                           | 7,095                                                             | 114,410                                              |
| Total ...                                     | 493,360                                                           | 7,095                                                             | 450,788                                              |

In addition to this work, 42 stones were fixed in place of the missing stones at the corners of 100 acre rectangles and the soil survey of 534,100 acres was completed.

The total cost of this party since the commencement of the work was Rs. 7,16,484.

The prompt and punctual completion of this task in a difficult terrain reflects great credit on Munshi Ganda Singh, Extra Assistant Commissioner, in charge and his staff.

Rectangular survey operations in connection with the Nili Bar (Sutlej Valley) Canal and Colonization Project which were commenced in 1920-21 continued during the year under Mirza Ihsan-ullah Khan. This party surveyed an area of 1,385,625 acres and sub-divided it into 55,425 25-acre rectangles. The cost of these operations fell considerably below the original estimate of Rs. 1,97,087.

15. There were no important alterations in the district boundaries but mainly for administrative convenience to suit the new situation which has arisen as a result of the development of rail, postal and telegraphic communications, an alteration of tahsil boundaries was made in the Hissar District, whereby the Tohana Sub-Tahsil was reduced from 110 villages to 95, and transferred from the Fatehabad to the Hissar Tahsil.

The claim of the Sirmoor State to a rectification of boundary where the State border merges with the Ambala District is still unsettled.

The correct definition *in situ* of the boundary between the Sialkot District and the Kashmir State has been under consideration: and preliminary steps taken so that it may be possible to erect boundary pillars next year.

The formation of the district of Sheikhpura has naturally affected the administrative arrangements of neighbouring districts, and in particular it has been found advisable for reasons of convenience and economy to remove the headquarters of the Zafarwal Tahsil to Narowal, where the new Tahsil will be served by the railway. The offices are at present in a hired building. The expenses of under-trial prisoners, travelling allowance and cost of carriage of treasure will be so reduced by this change of head-quarters as to cause a considerable saving to Government. It will now be unnecessary to take the telegraph to Zafarwal as previously contemplated and the accommodation set free at Zafarwal provides quarters for the police, which otherwise it would have been necessary to build. The move has not been made without some opposition on the part of a section of the Zafarwal inhabitants, and considerable obstruction was experienced when Council was asked for funds to cover the initial expenditure.

16. Accommodation is generally sufficient. Gurdaspur Hissar and Dera Ghazi Khan report congestion, while at Sialkot and Gujranwala the rooms destroyed by fire still await funds for rebuilding. A new building has been provided at Jhelum and an additional room at Multan. Proposals are reported to have been made for the extension of the Dera Ghazi Khan room while the Gurdaspur extension has been held up for want of funds.

Destruction work is generally well in hand. The only destruction reported from Multan is that of mutation papers over 12 years old. Sheikhpura and Mianwali report that additional staff is necessary. Proposals will be examined in due course. No damage from white ants is reported.

The Copying Agency Department continues to be a success. In a few cases the time prescribed by rule for supplying copies is exceeded but generally the audit reports of the Examiner, Local Fund Accounts, disclose fewer serious irregularities. Income is in some districts still reported to be less than expenditure. Owing however to the fact that in the past expenditure on permanent clerical staff has been debited to another head it has not been possible to say exactly what the financial result is. This defect is being remedied with effect from the budget for 1924-25 and it is hoped that the income as a whole will exceed costs.

The proposed scheme to have a fixed scale of pay for copyists has had to be dropped owing to the many difficulties reported by district officers and Commissioners. The rules regulating the working of Agencies have however been revised and brought up to date and the difficulties in the way of recovering fees for copies of Revenue records have been closely examined.

The system of supplying excerpts from Revenue Records progresses favourably. It seems to be popular with the litigant public but the experiment of allowing excerpts to be granted to the non-litigant public met with no response in the Jullundur Division and it has been dropped. The post of special kanungo, Kangra, was abolished owing to insufficient use being made of his services. Additional appointments were made in the Hoshiarpur and Ferozepore Districts. One case of misappropriation of Government money was reported and dealt with departmentally.

17. Land and other revenue paid by money order amounted to Rs. 27·23 lakhs in 27 districts against 25·38 lakhs in 27 districts last year, and an average of 21·88 lakhs during the last five years. The districts of Gurgaon and Montgomery show a satisfactory increase of 1·41 and 1·45 lakhs, respectively. The districts in which the largest amounts were paid by money order were :—Gurgaon Rs. 4·10 lakhs, Karnal 2·82 lakhs, Montgomery 2·59 lakhs and Sheikhpura 1·78 lakhs. The system continues to grow in favour particularly with headmen who reside at a distance from tahsil sub-treasuries and have only small sums to pay in. Those who have to pay in large sums still prefer to bring the money to the tahsil in person, partly because they have not complete confidence in the post, partly because it is cheaper to do so and partly because by doing so the payer gets his receipt on the spot and goes home satisfied, whereas otherwise he may have to wait for several days for the money order receipt. Some Deputy Commissioners remark that if the commission on revenue money orders were remitted, almost the whole of the land revenue would be recovered through the post. There is no reason however why Government should relieve headmen entirely of the duty to carry revenue collections to the nearest sub-treasury and pay them in there. All that need be done is to ensure that headmen shall not be unduly inconvenienced in the payment into Government treasuries of petty items. If a man has one or two thousand rupees or more to pay in he does not mind the tramp to tahsil head-quarters, but if the sum is only one or two hundred rupees, or even less the long journey may be very irksome. There has been some demand for the remission of money order commission fees ; and at the instance of the local Legislative Council the proposal has been on two occasions brought to the notice of the Government of India but infructuously.

Apart from the amount paid by money order, Rs. 10·22 lakhs in currency notes were sent by insured post in 21 districts against 8·64 lakhs in 13 districts last year. The districts in which the largest payment by this means were made were :—Attock 2·25 lakhs, Sheikhpura and Gujrat 1·16 lakhs each and Lahore 1·11 lakhs. The Deputy Commissioners of Hissar, Ambala, Simla, Rawalpindi, Mianwali and Jhang, have not reported on this point. The figures

show that this system of paying land revenue is increasing in popularity but the progress is slow because of the apprehension lest the insured covers, containing currency notes, be tampered with in transit.

The system of collection of land revenue on successive fixed dates for each village on a regular roster, introduced experimentally in certain districts, continues to work satisfactorily and deserves extension.

In consequence of a proposal initiated in the Legislative Council the Financial Commissioner has added the following rule to the rules determining the methods by which land revenue may be paid.

"Selected lambardars approved by the Collector will be allowed to pay land revenue and all sums recoverable as land revenue from the estate or sub-division of an estate in which they hold office, by cheques on the Imperial Bank of India, provided that there is a Branch of the Imperial Bank at the headquarters of the district in which the said estate is included."

This method of payment would be convenient if practicable; but it is feared that very few lambardars are in a position to take advantage of it.

The system of having paid contractors for the supply of commodities to touring officers has continued to work satisfactorily and the innovation of 1920 may now be pronounced a success.

During the year under review, the Drainage Board held one emergent and three ordinary meetings.

(b) Drainage Board.  
Mr. C. V. G. Scott, M. Inst. C. E., continued as Superintending Engineer to the Board.

The Hudhara Nallah Drainage Scheme affecting the Amritsar and Lahore Districts, though finally approved and both administratively and technically sanctioned at an estimated cost of 13½ lakhs, could not be started owing to financial stringency.

Early in the year, work on the Sarusti Nallah Drainage Scheme was put in hand in the lower, the most important section, by the District Board, and a good start was made. Unfortunately the District Engineer resigned, and during the

interregnum that ensued the work stopped with the result that the lower section of the drainage did not become effective as a protective work during the monsoon of 1923. Eventually the work was resumed under the supervision of the Sub-Divisional Officer, Public Works Department. This procedure adds very considerably to the cost of the scheme, as departmental charges have now to be met.

A project is under preparation for training the Aik Nallah so that it will act as a drainage work while preserving the existing vested interests in irrigation from the *Nallah*.

The condition of the bunds in the Gurgaon District was investigated by the Board. It was found that many had fallen into such a state of disrepair that not only did they not assist irrigation but they constituted a menace to the district. With the consent of Government, the Drainage Board assumed control of the system as a temporary measure, the Drainage Board Engineer being appointed a Collector under the Minor Canals Act for the purpose. The Board will complete a contoured survey, restore the bunds to a workable condition, and formulate a plan for their future maintenance. Work had commenced on 21 of the 35 bunds before the close of the year.

At the request of Government the Board considered in detail several complaints of waterlogging attributed to seepage from the canals, and on its recommendation, local committees consisting of the Deputy Commissioner, the Drainage Board Engineer, and an officer nominated by the Chief Engineer, Irrigation Department, have been appointed for the classification of all such tracts in the seven districts affected. Government have also added to each committee a non-official member of the Punjab Legislative Council.

The total Budget grant to the Board exclusive of the special sum expended on Gurgaon bunds, was Rs. 1,31,415 only; the budget for the bunds amounted to Rs. 42,100.

During the year under report the Rural Section of the  
 (c) The Board of Board of Economic Enquiry, Punjab,  
 Economic Enquiry. held three meetings but the Urban  
 Section and the Joint Board did not meet.

*Rural Section.*—Professor Bhalla's Report on an Economic Survey of certain villages in the Hoshiarpur District of

which mention was made in last year's report, was received from the Press, and made available to the public at the nominal price of Re. 1 per copy.

The Board also drafted a General Questionnaire for use in economic enquiries throughout the Province.

This draft Questionnaire with certain modifications has been adopted in an enquiry into economic conditions in the Dera and Hamirpur Tahsils of the Kangra District. An Investigator has been engaged and this enquiry is proceeding satisfactorily. Similarly mortgages in a part of the Ferozepore District have been made the subject of a special enquiry, which is still in progress.

A "Thesis on the supply of milk and ghee in the Province" for the preparation of which the Board assisted the Punjab University financially, has been sent to the Press.

The Board also considered notes on :—

(1) Well Irrigation in its relation to modern conditions of agriculture and (2) the economic value of goats. The Board was of opinion that while with the first it was not directly concerned, the second was of great economic importance to the Province. The Board decided to collect such information as was available on the subject before undertaking a formal enquiry.

An important alteration in the constitution of the Board took place during the year, Government having accepted the recommendation of the Board that the Chairman of the Rural Section be appointed by name instead of *ex-officio* as heretofore. Mr. C. M. King, C.S.I., C.I.E., I.C.S., was, on the recommendation of the Board, appointed Chairman.

The Board having been declared a Non-Official Body, it has been arranged that its accounts be audited by an approved firm of chartered accountants. The question of appointing a Publisher for the Board's publication, etc., is also receiving attention.

A sum of Rs. 20,400 was allotted to the Board during 1922-23. Of this Rs. 2,970-15-0 were spent by the Rural Section and Rs. 992-10-6 by the Urban Section.

18. The number of suits decided in which enhancement of cash rents of occupancy tenants was asked for was 791 as compared with 755 in the previous year, while the number of cases in which the landlord failed to secure an enhancement fell from 104 to 85. In districts in which a marked decline in the number of institutions is shown the fall in prices of agricultural produce and the increase in stamp duty are generally quoted as causes; but the figures for the Province as a whole are normal; and the variation from last year insignificant. It is remarkable that no less than 435 of the total cases are contributed by the adjoining districts of Hoshiarpur and Jullundur; and the special reason for the continued frequency of suits of this nature in this tract will be the subject of a further enquiry.

An interesting tribute to the beneficial working of the Co-operative Societies is paid by the Deputy Commissioner, Sialkot, who attributes the decline from 50 cases in 1920-21 to 4 this year in his district to compromises effected by this agency.

19. There were 18 decrees for ejectment of occupancy tenants under section 39 of the Tenancy Act, as against 31 last year. The total number of ejectments of occupancy tenants actually made fell from 43 in the preceding year to 9.

Under sections 40 and 45 (6) of the Tenancy Act, the total number of decrees for ejectment of tenants-at-will was 2,048, as against 2,142, in last year. The number of ejectments ordered under section 45 (5) rose from 5,499 in the preceding year to 6,959, an increase of 1,460. The figures show a great increase in those of the two years preceding; and indicate the determination of landlords to participate in the increasing prosperity due to the improved harvests by raising rents. The aggregate number of cases in which ejectments were actually made rose from 4,384 to 4,790. Hissar Rohtak and Ferozepore are the districts in which these cases are most common.

20. No jagir having been notified during the year under the Descent of Jagirs Act, the number of notified jagirs remains at 149.

21. As already observed in paragraph 1 the climatic conditions of the year under report were favourable ; and the supply of water in all canals, with the exception, to some extent, of those in Dera Ghazi Khan and Shahpur, was ample. The total irrigated area was 11,455,473 acres as against 11,245,656 last year, and represented no less than 36 per cent. of the total area sown.

The Irrigation Branch estimates the average value of the crops raised on all the canals during the year at Rs. 40.41,20,055, giving an average rate of Rs. 46 per acre assessed or a little over twice the total capital outlay on all the canal systems up to date. The corresponding rate was Rs. 63 in 1921-22 and Rs. 55 in 1920-21. The decrease in 1922-23 is mainly due to the sudden fall in the value of all kinds of agricultural produce especially of wheat, of which the following details are illuminating :—

*Year. Total area of wheat assessed to water rates. Total value of wheat.*

|         | Acres.    | Rs.          |
|---------|-----------|--------------|
| 1918-19 | 2,954,232 | 23,50,61,652 |
| 1919-20 | 3,312,673 | 25,42,70,951 |
| 1920-21 | 3,021,715 | 20,42,47,144 |
| 1921-22 | 3,395,271 | 31,24,72,448 |
| 1922-23 | 3,582,103 | 17,45,27,315 |

Fifty-five miles were added to the length of channels, raising the total to 19,794 miles at the end of March 1923.

Perennial canals are dealt with in the Irrigation Department Administration Report. It will suffice therefore here to notice the working of the smaller inundation canals which are managed by the Irrigation Department.

The general working of the Shahpur private inundation canals continues to improve ; and the water advantage and canal royalty rates amounted to Rs. 37,163 and Rs. 29,909, respectively, as compared with Rs. 32,814 and Rs. 26,726 last year.

In the district of Montgomery, the Upper Sutlej Inundation Canals functioned normally, flow commencing about the middle of May and ceasing about the end of October 1923. The matured area on the Sutlej Inundation Canals was 278,054 acres, an increase of 16,043 acres.

The canal advantage rate realised was Rs. 2,95,935 as against Rs. 2,40,330 in the previous year. The increase is partly due to the satisfactory working of the canals and partly to the enhanced rate of assessment in Pakpattan Tahsil as a result of the recent settlement.

The Inundation Canals in the Multan District showed a very great improvement. On the Sidhnai Canals Crump and Harvey outlets were introduced in supersession of the antiquated models hitherto in vogue. The series matured an area of 284,474 as against 191,848 acres last year and a revenue of Rs. 9,82,541 as against Rs. 5,59,060 was realized. The Chenab series matured 169,436 against 107,589 acres; and the Sutlej series (excluding the Hajiwah) 267,334 acres as against 213,973\* last year. The consolidated land revenue and water rates on these two systems rose to Rs. 6,04,612 and 6,13,869 from Rs. 3,61,322 and 4,01,616 a net increase of Rs. 4,52,543. The matured area on the Hajiwah increased to 31,123 acres from 14,764 acres and the consolidated revenue realized was Rs. 36,265 as against Rs. 15,278.

The Chenab and Indus series in the Muzaffargarh District also continued to improve in spite of the vagaries of the rivers, the area irrigated rising to 371,975 from 336,268 acres. The amount of consolidated water advantage rate and water rate during the year rose to Rs. 2.60 lakhs from Rs. 2.37 lakhs, a satisfactory testimony to the vigilance and skill of the local irrigation officers.

In Dera Ghazi Khan the Inundation Canals opened later than usual and ceased to flow in September. The supply from hill torrents also was unsatisfactory and the harvest generally poor. In the circumstances, the realization of 2.61 lakhs, a fall of .02 lakh only from all kinds of water rates is not unsatisfactory.

22. The area irrigated by canals under district management remained approximately constant for the Province as a whole. Nothing has as yet either been planned or done to increase the efficiency of the Rangoi Canal in the Hissar District, regarding which year after year the same report is received, *viz.*, that the bed of the canal having silted up, and the bed of the Ghaggar, which feeds it, having scour-

\* District authorities reported 793,973, a mistake which was not detected till after the statement had gone to Press.

ed, supplies can only reach the canal when the flood is very high. The area actually irrigated was 1,188 acres in spring and 70 in autumn, a total of 1,258 against 1,276 last year.

The area matured by the Gurgaon bunds fell from 4,895 to 2,643 acres, with the result that there was a proportionate fall in income from Rs. 7,849 to Rs. 4,223. The decrease is due partly to the local failure of rains and partly to breaches in some of the bunds.

Rupees 18,772 as against Rs. 20,961 last year, were spent on maintenance. The latter figure was noted as being exceptionally high. But the whole system has been carefully examined at the instance of the Deputy Commissioner and it has been found that these bunds, of which there are 35, and not 32, as stated last year, demand an attention, which, situated in out-of-the-way corners of the district as they are they have seldom received. The Financial Commissioner laid the case before the Drainage Board : and in due course Government transferred as a temporary measure control of the bunds to the Board. A special staff has been appointed to repair the dangerous places, take levels and prepare the data necessarily required before the policy to be adopted in future can be determined. Irrigation, agricultural, sanitary and general drainage considerations are involved and until these investigations are completed, it is not possible to decide which Department should be asked to take ultimate control. It is a matter for satisfaction that the Deputy Commissioner drew attention to the position in time to prevent any loss of life or property such as might have occurred had the neglect continued and any of the big bunds burst under pressure of a heavy monsoon.

The Sarusti Canal in the Karnal District irrigated only 31,011 acres as against 66,651 acres last year, sufficient water to supply the reservoir not having come down from the hill streams.

But in spite of this decrease in area receipts from water rates rose from Rs. 35,855 to Rs. 56,687. The reason given by the Collector is that 1st class crops were largely substituted for crops paying a cheaper rate.

In Kangra the kuhl system had adequate supplies and was worked efficiently. These kuhls are small canalstak-

ing out of mountain streams and constructed and maintained by associations of land-owners whose fields are irrigated. No separate canal rate is charged, but the lands irrigated are assessed to land revenue in their irrigated aspect.

In Hoshiarpur, the Shah Nahr Canal irrigated 12,985 acres against 15,172 last year; and the acreage matured reached the high figure of 12,700. A new head was constructed for the Budlan Branch and expenditure (chiefly on this account) exceeded income by Rs. 17,165; thus reducing the balance in hand at the close of the year to Rs. 17,759.

The Grey Canals continue to show improved working. The area irrigated exceeded last year's figure by 29,411 acres and the water-advantage rate by Rs. 18,006.

The effect of the Sutlej Valley Project on the future of these canals and on the rights of the irrigators is receiving attention.

In the Nammal reservoir in the Mianwali District there were 163 million cubic feet of water at the commencement of the rains: but so scanty was the fall that at the end of September the water had risen to 259 million cubic feet only. The area irrigated fell in consequence from 12,113 acres to 5,124. Masonry outlets were introduced during the year and proved satisfactory.

The cusec duty in the spring 1922-23 was 223 acres and the average depth of water over the area irrigated was 1.50 feet, as against 1.40 feet last year.

The Kitchin and Irving Canals and the Mehdi Khan Canal in the Montgomery District ran satisfactorily. The area irrigated and matured by the former, which began to flow in (Kitchin) May and (Irving) June, and ceased in (Kitchin) October and (Irving) September, was 31,277 and 23,035 acres, as against 21,399 and 16,860 acres last year, while the area irrigated and matured by the Mehdi Khan Canal which opened and closed with the Irving Canal, was 3,019 and 2,469 acres as against 891 and 609 acres last year. The expenditure on repairs and maintenance of these canals during the year was Rs. 23,528 as compared to Rs. 21,970 last year.

Other works under the management of the Deputy Commissioner, Montgomery, to which the provisions of the Punjab Minor Canals Act do not apply are :—

- (1) Sanateke Bund ;
- (2) Tibbi Bund ; and
- (3) George Cut.

The flooded and matured area of these bunds was 13,668 and 12,193 acres as against 12,625 and 11,862 acres last year. No water rate is levied on the area flooded and irrigated by these bunds.

The Gark and Garkana Canals from the Ravi irrigated and matured an area of 3,473 and 2,299 acres as against 1,867 and 1,310 acres in the year just closed. The income derived from "water rate", levied at Re. 0-8-0 per acre matured, during year, was Rs. 1,470 as against Rs. 655 last year.

In Dera Ghazi Khan the hill torrents' flow was quite insufficient in the summer of 1922 and the rodkohe harvest was poor.

The opening balance of Nagha (canal clearance fund) was Rs. 2,044. The total collections during the year amounted to Rs. 4,773 and the cost of establishment to Rs. 3,916, leaving a balance of Rs. 2,901 at the close of the year.

In Shahpur the water advantage and canal royalty rate imposed on private inundation canals amounted Rs. 37,163 and Rs. 29,909, respectively, as compared with Rs. 32,844 and Rs. 26,726 for the last year. The increase was due to adequate supply of water in the canals and consequent good rabi harvests.

23. (1) The administration of the Act for the year 1922-23 was satisfactory. Six thousand four hundred and sixty-five acres were acquired for various public purposes at a cost of Rs. 14,81,762 as against 4,460 acres for Rs. 12,63,926 last year, the increase being mainly due to the progress of the Sutlej Canals Project. The total average sale-price per acre was Rs. 229 as compared with Rs. 283 in the previous year. The highest rate reported was Rs. 2,847 per acre paid for 80 acres of land taken up close to Gujranwala Town for the new Railway Station.

Land Acquisition Act,  
I of 1894.

(2) The most important cases of acquisition were of 4,912 acres for the Sutlej Valley Project and 328 acres for the Sirhind Canal, both in the Ferozepore District.

(3) There was a marked decrease from 104 to 35 in the number of cases of occupation of land for which compensation had not been paid at the end of the year. The highest number reported was 13 in the Gujrat District, and the Deputy Commissioner is paying special attention to them. The oldest case is in the Karnal District and dates back to December 1920. No explanation in regard to this has been given by the Deputy Commissioner. Five of the cases date back to 1922.

(4) One hundred and eighty acres were surrendered during the current year. The district reporting the largest area was Gujranwala with 84 acres surrendered by the Irrigation Department. All the lands were restored to the original owners. It is presumed that the 30.11 acres recorded as restored in the Rawalpindi District, was given back to the original owners. This should have been reported by the Deputy Commissioner.

(5) The registers are reported to be well kept and up-to-date and the provisions of the Act seem to have been generally observed. In only one case, *i.e.*, namely, the case of the 3.57 acres acquired for Rs. 5,583 for a sewage farm in the vicinity of Sialkot City did the owners appeal to the Civil Court. In that case, however, the District Judge upheld the award and the plaintiffs had to pay to Government the costs of the appeal amounting to Rs. 270.

(6) The work is well in hand and as many as 21 districts show no pending cases.

24. At the close of last year there were outstanding Rs. 16.24 lakhs granted as loans under Act XIX of 1883, of which Rs. 4.05 lakhs represented the year's distribution.

Land Improvement Loans  
Act, XIX of 1883.  
Statements XVII, XIX  
and XX.

In the year under report, Rs. 3.71 lakhs were distributed, principally in Gurgaon (75,370). In this connection, Deputy Commissioner, Gurgaon, writes "Efforts are being made to encourage well-sinking in order to reduce the uncertainty of the harvest in this insecure tract. In addition to this, the Persian wheel has been introduced and is steadily gaining in popularity now that its enormous efficiency and cheapness compared with the *chara* has begun to be realis-

ed". "A little attention to the problem of well-irrigation would repay tenfold the expenditure thereon. The possibilities of improvement in this district are enormous. The District Board has not the money or the staff to take up the subject properly; all that it has done and can do is to point the way and prove what can be done. To show the value of the work done by the District Board, the cultivators themselves declare that when the water is fairly near the surface, the efficiency of their cattle is more than doubled by the use of a Persian wheel, so that the well in which a Persian wheel has been put is worth two wells without them". No loans were distributed in Ambala, Simla, Kangra and Lyallpur.

Total collections amounted to Rs. 2 lakhs, leaving a balance of Rs. 17.95 lakhs still outstanding at the end of year. Of this sum Rs. 28,976 represents arrears of principal, an increase of Rs. 2,539 over the corresponding amount last year, which is accounted for chiefly by suspensions in Sialkot (4,003), Ferozepore (6,444) and Montgomery (7,192).

Arrears of interest at the end of the year under report amounted to Rs. 14,467 chiefly in Montgomery (2,297), Sialkot (2,525) and Sheikhpura (3,270). The interest realised was Rs. 5-0-7 per cent. on the mean balance, as against a decennial average of Rs. 5-11-0 per cent. Improvement loans were mostly taken for the construction of new wells for irrigation purpose and were with a few exceptions in District Multan, where immediate necessary steps were taken for its recovery, faithfully applied and the instalments as a rule punctually paid. In the Province as a whole, 3,665 new wells were sunk at private expense, as against 4,255 last year or a decrease of 590 wells; the number of those sunk with the aid of advances fell from 362 last year to 335.

Remissions of land revenue were given for 4,135 wells, which fell out of use, against 1,495 last year, while protection certificates were granted for 1,572 wells against 1,032 in the previous year.

25. At the close of the last year, there were outstanding 30.57 lakhs advanced as loans under the Loans under the Agriculturists' Loans Act (XII of 1884), of which Rs. 20.32 lakhs represented the year's distribution.

Loans under the Agriculturists' Loans Act (XII of 1884).  
Statements XVIII and XX.

In the year under report, thanks to the exceptional season, Rs. 4.12 lakhs only were required for distribution, principally in Gurgaon (60,055), Muzaffargarh (55,974), Dera Ghazi Khan (55,865), Montgomery (42,260) and Multan (39,990). Collections amounted to Rs. 18.09 lakhs, leaving a balance of Rs. 16.60 lakhs only outstanding at the end of the year. Recoveries were markedly satisfactory in Gurgaon and Mianwali. Of the balance outstanding Rs. 9.02 lakhs represents arrears of principal (a figure lower by Rs. 8.30 lakhs than the corresponding amount last year), to be accounted for chiefly by the arrears in Hissar (6,25,705), Jhelum (70,133), Ferozepore (69,987), Sialkot (47,183) and Dera Ghazi Khan (36,477). The difficulty of recovery of arrears from the big landlords of Dera Ghazi Khan was noted last year, and this year the Commissioner found it necessary to intervene. It is hoped that the arrangements made by him for repayment will be observed.

Arrears of interest at the end of the year under report amounted to Rs. 17,858. The interest realised was Rs. 4.11.7 per cent. on the mean balance as against Rs. 3.6.6 per cent. last year.

26. This paragraph relates to all Government lands under the control of Deputy Commissioners whether unclassified forests or other Government lands. In previous years the budgets in connection with these forests were prepared by the local authorities and submitted to the Accountant-General, Punjab, direct and were not seen by the Financial Commissioners. Under the new budget procedure, according to which the Local Government and not the Accountant-General is responsible for the preparation of the provincial budgets, the Financial Commissioners as Heads of Departments are required to exercise a strict control over expenditure connected with their departments. Accordingly this year, for the first time, the forest budget has been prepared by the Financial Commissioners and a special scrutiny of budget figures has been necessary. The staff employed in connection with forest reserves and grazing grounds has been debited in some districts to the minor head "Forest Reserves and Grazing Lands" and in others to "General Administration." Where necessary reclassification has now been made and the establishment in each district subjected to a special scrutiny.

In Hissar the Government forest lands (*birs*) are under the control of the Deputy Commissioner and consist of the Sirsa Bir with an area of 423 acres, the Hansi Bir of 344 acres and the Hissar Bir of 1,840 acres. All three Birs are leased for cultivation. The Hissar Cattle Farm, which comprises 39,844 acres, is under departmental management.

Seven hundred and fifty-five acres of Government waste lands in Sarbasirpur village of Gurgaon Tahsil are under the control of the Collector of Gurgaon. Arrears outstanding for the past two years were collected, receipts thus increasing by Rs. 1,776. The Financial Commissioner recommended to Government a proposal of the Deputy Commissioner, Gurgaon, to commence operations for reclamation and re-afforestation in the Gurgaon hills where the denudation of the hill-sides threatens shortly to be complete. Re-afforestation would not only improve the tree growth, prevent erosion, regulate the flow of water and increase the grazing capacity of grazing grounds, but would also ensure the safety of the people from the floods which will otherwise be inevitable. The proposal had the strong support of the Forest Department, but financial stringency compelled Government to exclude the project from the budget.

In Karnal "forest lands" consist of twelve Government Birs with an area of about 11,000 acres, and more than 5,000 acres of other Government lands, including Nazul lands held by Government tenants. Most of these lands have been given out as usual on annual leases for grazing and cultivation purposes. Administrative sanction has been accorded to the formation of a settlement of criminal tribes in one rakh: and the details are being worked out by the Deputy Commissioner of Criminal Tribes.

In Simla the important forests are the Kot Khai and Kot Guru forests, which consist of two isolated patches of British territory 34.4 and 16.8 square miles, respectively, in area, entirely surrounded by the territories of Protected States. Though these forests are under the control of Deputy Commissioner, the Forest Department gives general assistance and the marking of trees required by right-holders is carried out by them. There was no development calling for special notice in the year under report.

The Deputy Commissioner of Kangra has charge of 324,804 acres of unclassed forests. The object of Government

is not to derive income from the forests but solely to put at the disposal of the people all forest areas, which it is not essential to protect; and to protect efficiently, subject to reasonable use (*bartan*) by the people, the remaining areas in the best interests of the people and of their descendants. The income from these forests has been Rs. 22,333 against Rs. 24,135 in the preceding year, while income from *tirni* (grazing dues) increased from Rs. 14,250 to Rs. 15,773. These forests are managed by the Deputy Commissioner through the agency of four Naib-Tahsildars, each assisted by a local forest committee representing the right-holders. These local committees cannot as yet be said to be working successfully or to realise adequately the duty that rests on them to improve the forests. The Deputy Commissioner of Kangra has accordingly reported against the present scheme of management and has urged the re-transfer of these forests to the Forest Department. The Financial Commissioner, while not prepared to recommend so radical a change, has under preparation a re-organisation of forest staff.

In Hoshiarpur an area of 24,647 acres of unclassified forests and other Government waste lands is under the direct control of the Deputy Commissioner. The falling-off of Rs. 12,020 in receipts from "other sources" is an aberrant of the fact that no chil trees (*Pinus Longifolia*) were sold.

All Government lands, with the exception of 4 acres in Ferozepore Tahsil, were leased out for cultivation. The total income was Rs. 13,872 as against Rs. 16,113 last year.

The Lahore District contains 30 unclassified forests. Of these Rakhi Chandrai was given out last year on a special 40 years' lease for dairy farming purposes. The remaining 29 rakhs continue to be given out wholly or partially on leases for cultivation on various terms. The lessee of one of them has been granted proprietary rights on payment of the full price of the land held by him on lease. The sale-proceeds of grass amounted to Rs. 2,095 as against Rs. 10,240 for the preceding year, the decrease being due to the fact that grass was not sold but reserved for grazing.

In Gurdaspur there are the Shahpur Kandi forests covering 29,319 acres. The soil is the property of the zamindars and Government control is limited to supervision on behalf and with the assistance of the proprietors. The income was Rs. 8,830 and expenditure Rs. 6,753, leaving a net profit to the right-holders of Rs. 2,077. The figures,

both of income and expenditure, show a decrease of Rs. 5,378 and Rs. 3,811, respectively, attributable, partly to a reduction in resin operations from 30,600 blazes to 20,000 blazes and partly to a fall in the price of resin. As reported last year, the accounts of these forests still continue to appear in the budget, but the Punjab Government have now transmitted to the Government of India the Financial Commissioner's recommendation that the transactions of these forests should be excluded from the provincial accounts and the income and expenditure recorded separately, as an excluded local fund.

The area of unclassed forests and Government waste lands in the Sialkot District, which consists chiefly of Rakhs is 2,050 acres. The charge of Rakh Chenakhi (467 acres), was transferred from the Forest Department to the Civil authorities at the close of the year. Rakh Dhingranwali (177 acres) was leased to the American Mission Society. Rakhs Kot Mandianwala, Kot Jandoo, Govindke and Mokhal were held by the criminal tribes and the occupants were granted occupancy rights, and in some cases long leases were granted by Government. The transfer of 257,337 acres of dry rakhs in the Thal and Khushab ranges from the Forest Department to the control of the Deputy Commissioners of Shahpur, Gujrat, Sialkot and Gujranwala, to which a reference was made in the report of the preceding year has now been completed and a small extra establishment costing Rs. 420 per annum has been entertained for the management of Rakhs Bhedpur and Dhulpur in the Shahpur and Gujrat Districts, respectively.

In Gujranwala, of the five rakhs transferred last year to the control of the Deputy Commissioner, only two have been leased out for grazing purposes, while the remaining have been given out on two years' leases for temporary cultivation to persons whose lands have been spoiled by water-logging. Of the four (additional) rakhs transferred this year, Rakh Qila Ram Rang, consisting of 252 acres was sold to Rai Sahib Dr. Maharaj Kishen Kapur for Rs. 20,000 and possession was delivered on the 1st of July. The remainder have been leased out for grazing purposes as usual. In the Beranwala reservoir, a further 2,080 acres have been allotted permanently to colonists and 148 acres as compared with 268 in the preceding year were given out on temporary cultivation.

In Gujrat 659 acres of waste land were under the control of the Deputy Commissioner at the beginning of the year, of which 395 acres have been allotted, leaving 264 acres for allotment. The income has increased by Rs. 9,801 owing to the increase in cultivation during the year.

In the Shahpur District there are 141 rakhs classified as "Plains", "Hill", "Thal" and "Salt Range" and covering 363,805 acres. The total income from these and other Government lands in charge of the Deputy Commissioner was Rs. 11,98,881 as against Rs. 10,69,900 last year. This figure includes the income from occupancy and other tenancies in the Lower Jhelum Canal Colony. The increase is mainly due to an increase in the area given out for temporary cultivation.

Thirty-one rakhs of the Jhelum District comprise an area of 27,322 acres. The total demand on account of these was Rs. 835, of which Rs. 640 have been collected, the balance being due next year.

Deputy Commissioner, Rawalpindi, controls 2,345 acres of forest and waste land. The increase of Rs. 1,921 over the income of last year is due to the additional rent realized for the use of encamping grounds for weekly cattle fairs.

In the Attock District there are 31 unclassed forests and rakhs comprising an area of 87,892 acres. They are given on yearly leases. The income rose from Rs. 4,919 to Rs. 7,204, which was mainly due to the rise of income from revenue, malikana, tirni and sales of trees, etc.

In Mianwali there are 594,675 acres of waste land. Of these, 47,647 acres were leased out for temporary cultivation. In the report for 1921-22 it was stated that the closing of these rakhs to temporary cultivation was under consideration, and after further correspondence it was decided to take no action till the Financial Commissioner had had an opportunity of visiting the district on tour.

In Montgomery the total area of unclassed forests and Government waste lands has been reduced to 937,951 acres from 985,587 acres reported last year.

The decrease is due to—

- (a) the transfer of 47,652 acres to the Lower Bari Doab Colony in the two Ravi Tahsils :

(b) sale of 197 acres in Pakpattan Tahsil to the grantees in the Sohag Para Colony. On the other hand as the result of remeasurement the area shown in the Dipalpur Tahsil has increased by 213 acres.

Of this area 189,225 acres, as compared with 207,978, were given on temporary cultivation. The tirni (grazing dues) demand for the year was Rs. 27,025, of which Rs. 8,000 were remitted, and the balance recovered in full. No amount was outstanding at the end of the year.

In Dera Ghazi Khan out of an area of 364,826 acres under the control of the Deputy Commissioner 310,857 acres consists of 92 rakhs. Of this, 38,395 are leased on cash and 23,757 on kind. The balance of Rs. 3,823 outstanding at the beginning of the year has been recovered and steps are being taken to recover the balance of the current year, viz., Rs. 3,415. In Chhaoni Drahma 12 new long-term leases were granted for 12 tracts of land previously held on lease for a short period. There has been a decrease of Rs. 6,320 in land revenue and of Rs. 955 in malikana (proprietary due) which is partly due to decreased sowings in *Kankut* areas on account of insufficient moisture and partly to grant of protective leases, on well lands from Kharif 1922. The fixed land revenue and *malikana* have otherwise increased by Rs. 3,525 due to the introduction of revised assessment rates in Dera Ghazi Khan Tahsil. The Dhundi Estate shows a decrease of Rs. 72,206 as against an increase of Rs. 42,381 reported last year. This decrease is due to damage to rice crop by insects, low market rates in comparison with previous years, and reduced supply in the canals, which was the more noticeable as they had run through the previous winter.

For the year under report the total income from lands dealt with in this paragraph amounted to Rs. 80,53,217 as compared with Rs. 71,44,105 last year.

27. In the Ambala District Reclamation experiments were continued in the Naraingarh Tahsil, in the Kharar Tahsil at Darra Kharoni (20 acres) and Kausal (92 acres) in the Rupar Tahsil at Sanara (26 acres), Fatehpur (70 acres) and Bhogian (38 acres). The plants on the higher parts of the hills have

generally failed owing to the intensity of heat and the scarcity of water, except at the Sanana plantation : elsewhere the plants are doing well.

Only four cases under the Act were decided during the year as compared with eleven cases reported last year. In three the accused were discharged : only in one was a conviction obtained. Extension of operations was hampered by the financial stringency and the budget demand of the local authorities had to be reduced to a figure sufficient only to maintain, but not extend, the area already under treatment.

In Hoshiarpur the number of villages notified under the Chos Act, *viz.*, 126 under Section 4 and 9 under Section 5, remained unaltered. The monsoon, though late, was good, and in all the latter and in most of the former villages handsome profits were made by sale of the grass, the conservation of which is attributed to the operation of the Act.

The enquiry referred to in last year's report was completed by the Commissioner, Rai Bahadur Pandit Hari Kishan Kaul, and in consequence of his recommendations Government appointed, in July 1923, a committee consisting of the Deputy Commissioner of Hoshiarpur as Chairman, Mian Beli Ram, M.L.C., and Mr. L. B. Holland, Deputy Conservator of Forests, as members to report on the working of the Act. The Committee has not yet submitted a report.

28. The total area of the Province according to the entries in the latest revenue records, is 56,104,854 acres. Of these nearly 35 millions are owned by "Agricultural Tribes," over 5½ million acres by "Others" and approximately 16 million acres consist mainly of common lands, village sites and Government property, including forests. There has been a decrease as compared with the figures recorded in the same statement last year of 241,696 acres in the gross and 103,609 acres in the cultivated area. The reason for this reported difference, which the Financial Commissioner is not at present prepared to accept, is under enquiry from the several districts concerned.

General statement of  
owned and mortgaged area.

Statement No. III.

The total land revenue assessed including jagir and other assigned revenue (Rs. 36,75,180), was Rs. 4,52,59,745 (fixed 2,41,17,001, fluctuating 2,01,13,533 and miscellaneous 10,29,211) giving an incidence of Re. 1-8-5 on cultivated (29,686,021 acres) of Re. 1-6-9 on sown (31,788,857 acres) and Re. 1-9-5 on matured area (28,513,062 acres). The figures given in this paragraph do not agree exactly with the figures given in the statements, *e.g.*, the total cultivated area according to column 7 of statement III is 28,716,410 and not 29,686,021 acres, as stated. The reason for this difference is that in this paragraph, the figures given by the Director of Land Records in his Season and Crop report for the year under report have been followed. These are based on annual returns whereas the figures in column 7 of statement III are taken from statement 6 in the village note-book which is subject to quadrennial revision only. Similarly the figure for miscellaneous land revenue, *viz.*, Rs. 10,29,211 differs from the total of miscellaneous land revenue, *viz.*, 54,36,174 given in columns 29 and 30 of statement VIII. That statement is compiled from land revenue accounts and exhibits receipts which accrue to Government in its capacity as the *grand seigneur* of all land in the Punjab and includes items which are not properly annual demands and should strictly be debited to capital account. Receipts under the following heads :—

| Collections from estates held under direct management— |                                                                | Rs.         |
|--------------------------------------------------------|----------------------------------------------------------------|-------------|
| Fluctuating assessment of Canal irrigated lands.       | { Land Revenue and Malikana assessed by Deputy Commissioners.  | 24,08,040   |
|                                                        | { Land Revenue and Malikana assessed by Irrigation Department. | 1,48,30,258 |
|                                                        | { Water advantage rate assessed by Irrigation Department.      | 4,25,031    |
| Fluctuating assessment of other lands.                 | { Land Revenue and Malikana assessed by Deputy Commissioners.  | 19,03,977   |
|                                                        | { Land Revenue and Malikana assessed by Irrigation Department. | 2,55,022    |
|                                                        | { Revenue on building sites in Colony towns.                   | ...         |
|                                                        | { Other items ... ..                                           | 13,183      |

|                                                                                                         | Rs.      |
|---------------------------------------------------------------------------------------------------------|----------|
| Rents of lands leased for a single year or harvest.                                                     | 4,99,687 |
| Tirni ... ..                                                                                            | 1,19,842 |
| Collection during the current year on account of previous years on account of fluctuating land revenue. | 52,010   |
| Other items under other land revenue ...                                                                | 3,63,070 |
| Collection during current year on account of previous years on account of other land revenue.           | 80,701   |

have been included.

Those on account of—

|                                                                                                                                      |           |
|--------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Sale of Government Estates which include cultivated lands.                                                                           | 24,40,110 |
| Sale-proceeds of waste lands including nazarana ...                                                                                  | 14,55,972 |
| Recovery of cost of settlement from assignees ...                                                                                    | 4,096     |
| Recoveries on account of acreage rate for canal and survey demarcation (land revenue share).                                         | 2,336     |
| Haq-ul-tahsil .. ..                                                                                                                  | 25,629    |

| Receipts from quarries and minor mineral products in lands not under the management of the Forest Department and receipts from mines | 64,695    |

have been excluded.

Columns 27 and 34 deal with a miscellaneous number of other items, *e.g.*, sale of trees, grass, old bastas, rent of escheated land, canal royalty rate, revenue on colony village sites; some of which are properly credited to land revenue and some of which are similar to those which have been excluded. The total value is comparatively insignificant and the figures will not be vitiated if the total be considered as due half to capital and half to revenue receipts.

29. Statistics of transfers are given in statement No. III and statements Nos. XXIV, XXVI and XXVII. Comparison of figures can only be made with caution: because while the statistics in statement No. XXIV are compiled from annual records, those in statement No. III (column 10 of which gives the total area under mortgage with possession) are compiled from statement No. 6 in the village note-books, a statement which is only brought up to date for any one village once in four years.

Transfers.  
Statements XXIV, XXVI,  
and XXVII.

When a land-owner, some of whose lands are already under mortgage, finds himself with money in his pocket as the result of a good harvest and has, moreover, the prospect of another good harvest ahead of him, he finds himself faced with alternative investments. He may either redeem his own land under mortgage or he may acquire new land either by purchase or mortgage. The temptation to the latter course is the stronger because as a result of the good harvest credit is easier and he is not likely to be pressed for his debt. This is perhaps the reason why in the year of good harvest under report, though sales to agriculturists have increased (*vide* paragraph 31) the total mortgage debt discharged was considerably less than that discharged last year and the area mortgaged has exceeded the area redeemed. This decrease is not confined to any one area but spread over the whole Province.

The important figures are as follows :—

|                                                                                              | This year.      | Last year.      | References.                |
|----------------------------------------------------------------------------------------------|-----------------|-----------------|----------------------------|
|                                                                                              | Acres.          | Acres.          |                            |
| Permanent transfers for value with possession of privately owned land (cultivated and waste) | 223,601         | 263,232         | Col. 18 of statement XXIV. |
| Excess of area bought by agriculturists over that sold by agriculturists.                    | 27,180          | 11,700          | Paragraph 31 of Report.    |
| Total area mortgaged (including transfers for debt by order of Court).                       | 336,186         | 340,043         | Col. 8 of statement XXIV.  |
| Area redeemed ...                                                                            | 314,337         | 377,919         | Col. 13 of statement XXIV. |
| Value of area mortgaged ...                                                                  | Rs. 578.4 lakhs | Rs. 692.2 lakhs | Col. 11 of statement XXIV. |
| Mortgage debt discharged ...                                                                 | 286.8 "         | 370.1 "         | Col. 16 of statement XXIV. |

From these figures one would expect to find that the gross area under mortgage had increased, but on the contrary it is recorded as having declined from 4,051,741 acres to 3,986,510 acres. As has already been explained these latter figures are taken from the quadrennial, while the former are taken from the annual statement, and exact comparison is impossible. The cultivated area sold (125,745 acres) represents only 44 per cent. of the total cultivated area of the Province; and would seem at first sight a negligible factor. But small as the fraction is, the general

movement is in the right direction and would seem to indicate that on the whole the economic position of the agriculturists was slightly strengthened.

The districts in which the largest areas of cultivated land were sold were Hissar, Dera Ghazi Khan and Ferozepore. The large increase of 11,456 acres in Hissar is due to the fact that village Sheikhupura in Hansi Tahsil and the villages of Siswal and Guzar in Hissar Tahsil, comprising an area of 12,190 acres, were sold by the Skinner family during the year. Village Sheikhupura changed hands twice in twelve months. Figures for other districts in no case reach 10,000 acres, and call for no special comment.

The Redemption of Mortgages (Punjab), Act II of 1913, is proving successful. The Deputy Commissioners of Ferozepore, Shahpur and Jhelum in particular report that the mortgagors feel a great relief on account of the simplicity of the procedure in getting mortgaged lands redeemed from reluctant mortgagees without having recourse to prolonged and ruinous litigation in civil courts.

The area (ownership) transferred by gifts was 86,902, or 5,914 acres more than that of last year. Such gifts are generally made for charitable purposes or to relatives for services rendered, but in the Sheikhpura District where there was an increase of 1,514 acres under this head the Deputy Commissioner reports:—

“The increase is due partly to the transfer of land by gifts in Machhrala village for increasing the number of voters for Council and partly to the transfer of land in the Mirowal and Kirto Zails in the names of prospective candidates for the post of Zaildar to show that the candidates are big landowners.”

The total area of all kinds of land transferred by exchange was 57,939 acres as compared with 56,411 acres last year. The continuing increase in the area exchanged is due to the consolidation of holdings under the auspices of Co-operative Societies. An increase is reported from 107 to 133 in the number of societies and from 3,397 to 5,255 in membership. Of these societies one hundred and fifteen were in the three districts of Gurdaspur, Jullundur and Hoshiarpur where the co-operative spirit is well developed. The work is laborious and intricate, but the benefits conveyed by consolidation are out of all proportion to the ex.

penditure. In two villages of the Batala Tahsil rents have risen by 25 per cent. and in one by 100 per cent. in the consolidated area. Eight new wells have been sunk in three villages; in one, 62 acres of old waste have come under cultivation, as a result of re-adjustment: in another a long boundary dispute between Sikhs and Mussalmans has been settled by so consolidating the land as to give each party a separate parcel. One owner, whose mortgage debt of Rs. 4,800 was scattered over 40 fragmented acres, has now released 24 acres and arranged for the same debt to be secured on 16 acres consolidated. The Financial Commissioner cordially acknowledges the very valuable work being achieved by Mr. Calvert and his staff.

Our statistics, as at present preserved, do not show the average size of holdings in the Punjab, a factor of considerable importance to economists, and in July 1923 the Financial Commissioner authorised the Director of Land Records, Punjab, to carry out an enquiry through the Kanungo agency into the size and distribution of holdings in the Punjab. The result had not been reported at the close of the year.

30. Columns 18, 19, and 21 of statement No. XXIV show sales and permanent transfers of land for value. The statement is compiled from the mutation registers but the figures for area transferred are not subject to any special check and the price quoted is probably inflated in all cases in which there is possibility of pre-emption. Further no attempt is made to classify land. Valuable house property in Simla, if entered in our revenue records, will come into the same statement *pari passu* with, it may be, an acre of uncultivated fallow in an outlying portion of Dera Ghazi Khan. Obviously precise accuracy cannot be claimed for figures based on such data. Nevertheless as the same factors of error apply and have applied year by year, deductions made from them may be accepted as a correct indication of the general trend of prices and as a rough and ready guide in particular respects. The statement shows that the average price of cultivated land has fallen from Rs. 385 per acre in 1921-22 to Rs. 314 and it has been claimed by some people that there is a serious slump in land values.

The figure for this year is still high as compared with Rs. 184 reported in 1918-19, Rs. 275 in 1919-20 and Rs. 258, the average for the 5 years ending 1921. It also compares favourably with the pre-war figure of Rs. 249 (1913-14). Moreover although most districts show a decline in prices there are some in which there has been a rise. After consideration of the reports of each district the view of the Financial Commissioner is that partly in sympathy with the general decline in business, which is reflected in the estate as in all other markets, and partly by reason of the general falling back of the prices of agricultural produce in the direction of pre-war rates, the price of land in the Province as a whole has declined. But he is disposed to consider this decline rather as the swing of the pendulum towards normal conditions after a period of exceptional boom than an indication of any general depression. The tendency appears to be healthy rather than unhealthy. Measured in terms of land revenue the sale price for the Province as a whole represents 228 years' purchase of the land revenue as against 292 last year; and 6 at the commencement of British occupation. The mortgage money paid for land, the ownership of which was mortgaged during the year, was Rs. 20.93 lakhs against Rs. 543.32 lakhs in 1921-22, and represents 138 times the land revenue against 122 times, in the previous year. The average mortgage money per acre on the whole area thus mortgaged was Rs. 175 against Rs. 177 last year: the gross average so transferred being 2,98,442 acres or 7,710 acres less than last year.

Column 8 of statement  
No. XXIV.

31. Mughals of the Sheikhpura District were notified as an Agricultural tribe within the meaning of the Punjab Alienation of Land Act, 1900.

Land Alienation Act.  
Statements XXV and  
XXVI.

The area purchased by Agricultural tribes exceeded by 27,180 acres the area sold by them. On the other hand the area redeemed by them was less than that redeemed from them by 33,166 acres, and the area mortgaged by them exceeded the area mortgaged to them by 18,462 acres. District Officers are unanimous in reporting that the Act is well understood and popular among those whom it is designed to benefit; and that evasions are comparatively seldom detected. To what extent, this is the result of

smooth working of the Act and to what extent it is the consequence of subtle evasion cannot be definitely determined. The Settlement Officer, Muzaffargarh, writes "From my experience of the district I would say that in most cases the full facts were not brought to light. What usually happens is that if "A", a non-agriculturist, covets the land of one of his agriculturist debtors "B" he harrasses B till the latter sells, probably without real consideration, to "C" another agriculturist hopelessly in debt to A. C then mortgages the land to A under the Act, and after a few years and changes of officers, when the previous transfers have been forgotten, an application for permission to sell to A is submitted by C and is supported by the most convincing figures. By a fortunate quarrel among my staff I discovered a brisk trade in recommendations of sale by a kanungo who was nearing retirement, but usually it is very difficult to detect such practices till after they have succeeded when they are freely talked about."

There can be no doubt but that the Act unpopular as it is with professional classes, has been of great benefit to the zamindars.

### 32. The total number of—

Business Returns,  
Statements XXVIII and  
XXIX.

|                                           |         |
|-------------------------------------------|---------|
| Revenue cases pending at the beginning of | 19,843  |
| the year.                                 |         |
| Cases instituted during the year          | 151,979 |
| Total for disposal                        | 171,822 |
| Total disposed of...                      | 154,338 |
| Balance pending                           | 17,484  |

Disposals have thus overtaken institutions by 2,359 cases. This number of disposals though less than the figure 157,942 recorded last year, is higher than that recorded for any other year. Moreover, the number of Revenue officers employed was 595 against 636 last year. The average number of disposals was thus approximately 11 cases per officer higher than last year.

This volume of work would have been still more satisfactory had it not been for the fact that a good deal of the time of Revenue officers was taken up in the compilation

and check of electoral rolls for the Provincial and Central Legislatures. There were fewer institutions and in consequence fewer disposals in three classes of cases :

|                                                    | <i>Decreases in disposals<br/>as compared<br/>with last<br/>year's figures.</i> |
|----------------------------------------------------|---------------------------------------------------------------------------------|
| Revenue officers' cases under the Land Revenue Act | 2,893                                                                           |
| Cases under the Redemption of Mortgages Act ...    | 1,013*                                                                          |
| Cases under the Land Alienation Act ...            | 536                                                                             |

The Deputy Commissioners of Gurdaspur and Jhang suggest that one of the reasons for the decrease in litigation is the recent increase in court-fees. Another reason which has been suggested is that the fall in prices of agricultural produce has left the zamindars with less money to waste in litigation. Neither of these suggestions seems entirely satisfactory, for there has been an increase of over 5,000 disposals under the Tenancy Act. Some of these may be attributed to the general increase in outturn, but most of them must be due to increased institutions. District Officers suggest that improved harvests have made it possible for landlords to obtain higher rents and they have, therefore, had recourse to the courts to eject tenants who refuse to accept new conditions. The total number of cases under the Tenancy Act was 24,822, or 42 per cent. of the number of holdings : the number of ejectments ordered was 4,300, or 08 per cent only.

In the courts of Commissioners 741 Revenue-Judicial and 1,486 Executive appeals were decided against 734 and 2,035, respectively, in the preceding year. The file of cases pending at the close of the year rose to 440 from 356. The total number of Judicial and Executive appeals pending for more than three months was only 38 against 67 at the end of 1922. Returns from the Commissioner, Jullundur Division, are particularly satisfactory. There were only 20 cases pending before him at the close of the year and of these not one was more than three months old.

In the courts of the Financial Commissioners the total number of pending cases fell from 94 in 1913-14 to 38 at the close of the year. The number of cases pending for more than three months was only one.

The general record of work shows a considerable advance on the outturn of recent years. Officers have been assisted

by the fact that the year was happily free from serious crop failure, epidemics and disturbances. They were thus able to devote more attention to revenue routine than has always been possible in recent years. The Financial Commissioner is glad to acknowledge the effort that has been made throughout the Province to return to a pre-war standard of outturn. Nevertheless the returns from many districts show that mutation cases are not being dealt with as promptly as they should be and the delay in partition cases is frequently inexcusable. Further it is to be feared that some Deputy Commissioners do not pay that attention to the verification of land revenue records, which is essential if these records are to continue to have the presumption of correctness legally attributed to them. It is true that in some districts the Deputy Commissioner's attention has been distracted by other matters which appear to be of greater immediate importance. There are, however, few matters of greater abiding importance than the maintenance of accurate records of land tenure. The District Officer who spends time in impressing this duty on his subordinate revenue officer and in checking their work on the spot will find himself repaid not only by a greater certainty of the correctness of his records but by a far more intimate knowledge of the people in his charge and their resources than he would obtain in any other way.

33. *Ambala*.—Diwan Tek Chand, O.B.E., I.C.S., was Commissioner throughout the year and spent 75 days on tour.

Tours of Commissioners  
for the financial year  
1922-23.

*Jullundur*.—Rai Bahadur Pandit Hari Kishan Kaul, C.S.I., C.I.E., was Commissioner for 334 days and spent 104 days on tour. Lieutenant-Colonel J. C. Coldstream, O.B.E., I.A., was Commissioner for 31 days and did no touring.

*Lahore*.—Mr. H. P. Tollinton, C.I.E., I.C.S., was Commissioner for 356 days of which 47 days were spent on tour; Mr. A. Langley, C.I.E., I.C.S., was Commissioner for 9 days and did no touring.

*Rawalpindi*.—F. H. Burton, Esquire, I.C.S., was Commissioner throughout the year and toured for 87 days.

*Multan*.—Sheikh Asghar Ali, O.B.E., I.C.S., was Commissioner throughout the year and spent 77 days on tour.
